SAVE R VOTE (Safe Auditable Verifiable Elections Require Voter
Observation of Touchscreen Equipment) is a grass roots organization
sponsored by Democracy for America of Temecula Valley, CA

WELCOME TO POLL WATCHING IN RIVERSIDE COUNTY

Democracy for America – Temecula Valley
32204 Calle Resaca
Temecula, CA 92592
NOVEMBER 7TH 2006

Dear Election Integrity Citizen

As the Executive Director of SAVE R VOTE, a project of Democracy for America – Temecula Valley (DFA-TV), I wish to welcome you to **the most important civic engagement any citizen can participate in**. The importance of VERIFYING the legitimacy of the voting process as well as the report of the results of an election is the cornerstone of American Democracy. Without citizens taking the time and being given the right to observe every aspect of the electoral process (without violating voter privacy), there can be NO assurances that the reports of the election results are anything more than a “trust me” report from a smoke filled back room. Certainly we thought those days were long behind us, but with electronic voting, an election can be turned in a matter of seconds, and citizen vigilance is one of the biggest safeguards to minimize the chances of that happening.

You probably know that the new Sequoia Edge II voting machines – referred to as DREs (Direct Electronic Recording) now come equipped with a printer – known as a VVPAT or Voter Verified Paper Audit Trail. Part of your duty as a poll watcher is to act as an observer of how well the machines perform. If a voter reports that the DRE switched his or her vote from Candidate A to Candidate B., you need to note that (in detail explained in this manual). If a printer jams, or has to be replaced, you should note that and the reason, etc. We observed about a 20% failure rate on the machines in the June 6th primary, and turnout was light. The county reported “minimal problems” with the machines, certainly a very different perspective from our direct observations. It is possible that failure rates will be much higher this time, and this needs to be thoroughly documented.

This project is all about “process” and not about the poll workers who are generally very dedicated and desirous of doing the best job possible. Our goal and purpose is to observe whether all processes are adhered to exactly, and to note what variations occur, when they occur, and to the extent possible, why they occur and what was done, if anything, to correct the problem. And I cannot stress strongly enough, it is NOT about any political party, candidate or proposition on the ballot. SAVE R VOTE never takes any position on any candidate, party or proposition and focuses solely and exclusively on how well the laws and processes related to the election system are adhered to.

Your reports will be accumulated into a master report to assist the Board of Supervisors and the Registrar of Voters to identify areas for improvement for future elections.

I thank you from the bottom of my heart for taking on this citizen observer task. You are truly making a difference in the effort to increase transparency in the electoral process in Riverside County.

Tom Courbat
Executive Director
SAVE R VOTE
Riverside County, CA
Birthplace of E-Voting in the U.S.

Notes for Trainer's

Orientation to Save R Vote Training Materials

Purpose:

The purpose of the training manual is to provide an easy system for recording Election Day observations at the polling sites. This includes chain of custody (security), observations of procedures, and functioning of electronic voting equipment. Observation at the polling site starts with setting up the site the night before the election and continues until all reports from the site are delivered to the ROV office, or designated location. The intent is that these materials will provide an orientation as to what should be happening in a basic chronological sequence thereby creating a base of knowledge for observing possible anomalies at the polling site. The intent is to keep it easy for the volunteer while collecting accurate documented data. With all poll watchers using the same information and recording forms the data can be compiled consistently in any given precinct.

Process utilized in developing these observation materials:

The local R O V training guide book for election workers was referenced for the basic content, time lines and processes to be utilized in the preparation and conducting of election day activities at the Polling Site. The codes were checked and the electronic equipment manuals were consulted in preparing these materials. (The Sequoia Edge II DRE Electronic Voting System is utilized in the county where these materials were developed.) No scanners are used at the polling places.

When utilizing the Poll Watchers Guide:

It is recommended that materials be placed in a 1" notebook. This allows for tabbing of the sections and a hard surface for the poll watcher to record their observations.

Segment 1 is an Introduction to the SRV Project - "Trust But Verify". Each Poll Watcher is provided with a tag identifying them as a SAVE R VOTE Poll Watcher.

Segment 2 is Chain of Custody (Pre Poll Opening, Poll Closing and Posting of the Results at the Precinct).

Segment 3 relates directly to observing the processes as voters cast their ballots electronically. We are asking for a tally of voters entering the Polling place as a cross reference for the activator card, the DRE or the printer records, see pages 29, 30 and 31.

Segment 4 contains additional report forms

Segment 5 is related to logistical and legal information. Included are the following: 1. An agreement between S R V and the poll watcher, 2. Riverside County's Poll Watcher Guidelines, 3. General information sheets (including schedule, and a poll watcher evaluation).

SRV Notebooks will be returned following the close of polls to the SRV person observing pickup site activities at Pickup Site (location is provided).

Scheduling:

We chose to divide the day into four, four hour sections and one 2 hour. The recommended schedule on page 47 of the printed materials, this is optional. Some of our watchers have opted to take more than one segment of the day. Persons who have to work on Election Day are taking the evening segments.

It is very important that when the poll watcher enters the polling place they go directly to the Election Inspector and introduce themselves and assure them of your/our purpose and intent to not in any way interfere with the election process. They should be wearing their SRV name tag.

Polling site selection:

In selecting Polling Sites we considered the ethnic mix, economic, urban / rural and type of space (school, fire station, home etc.) If you are covering a high percentage of the polling sites I would recommend using a random selection process.

Consideration was to the time of day the volunteer preferred to work and since many were senior citizens when possible within 10 to 15 miles of where they lived. The same person who did the pre election night observation should also monitor the closing.

Election Day Coordination:

Field Operation Coordination: This person sees that all the materials are delivered to the Pre Election person who then hands the materials off to the election morning person. The Field Operation Coordinator is available to the teams at all times via cell phone. If the poll watcher sees or hears anything they question they call the SRV Field Operation Coordinator at once, we place their phone number several places in and on the notebook.

Forms have developed for: 1.The "Pick UP" stations (Identified location for precinct materials from a region to be turn in for transport to the RoV office).

2. Delivery / arrival at the ROV office and 3. Recording of the Results Report at the polling sites.

Acknowledgements

Many thanks to the many citizens who have contributed time, effort and resources to SAVE R VOTE (SRV) project of Democracy for American of Temecula Valley, (DFA-TV) CA. We have had well over 200 people working over the past three years in and on this project in a variety of ways. Then there have been the ones who have helped carry the torch of leadership. They are Jim Woodward, Paul Jacobs, Jerry Ewig, Rick Palordy, Barbara Lupro who have assisted in so many ways.

Special thanks has to go to Tom Courbat and Maxine Ewig . Tom has taken the SRV effort to the highest of levels. Tom has provided local, regional, state and national leadership in the “Election Integrity” effort. Maxine Ewig has spent well over 300 hours in the preparation of the Poll Watcher’s Guide.

The SRV Team of DFA – TV would like to acknowledge all of you who are willing to take this effort and utilize it to make a difference in your local communities.

Some who have reviewed these materials have said that these materials are arguably the most comprehensive training manual for poll watchers (observers) in the country. The writer has extensive experience as a teacher and administrator and thus used her experience and expertise to create a living document that can be used by anyone throughout the country by just modifying the sections that refer to Sequoia to sections that contain reference to the brand of machines being used in another county. We all here at SAVE R VOTE and, indeed, the entire Election Integrity movement, owe a huge debt of gratitude for Maxine’s tireless work on this document.

This Poll Watcher’s Guide is intended for distribution far and wide and will be available to election transparency groups throughout the U.S. For additional information contact Dan Ashby of Election Defense Alliance at the link below, <http://electiondefensealliance.org/takeaction>

SAVE R VOTE

(Safe Auditable Verifiable Election Require Voter Observation of Touchscreen Equipment)

Save R Vote believes that transparent, verifiable and auditable elections require voter observation of all processes.

Save R Vote is a non-partisan, citizen-driven election monitoring project sponsored by Democracy for America of Temecula Valley.

Save R Vote's Purpose is to bring together citizens to promote fair, transparent and accurate elections in Riverside County, CA.

Save R Vote's Mission is to observe and document procedures and any anomalies that arise with the voting systems in Riverside County.

Save R Vote's Goal is to evaluate Riverside Country election processes and to produce a citizen observation report which documents Riverside County's process according to the following criteria:

- **Compliance with California State Election Code**
- **Performance of equipment and staff interface with equipment**
- **Transparency and auditability of the election system**

Save R Vote Organizational Chart November 2006

America of Temecula Valley

Chain of Custody

Chain of custody means the security of the voting equipment and the ballot at all times.

- Election Eve Setup
- Election Night Poll Closing

pages 8 - 11

pages 12 - 20

Election Eve Set Up

Reference Information - Election Eve setup

Chain of Custody: *SECURITY of the Ballot from time it leaves Registrar of Voters Office to the time it is returned.*

Polling Place: *An accessible location, adequate space for a check-in table and privacy around five (5) Voting Stations. (Largest Precincts will be given 10 DREs.)*

Election Eve Workers: 3 required, 4 to 5 preferred, the head person is called an "Election Inspector" She/he will be overseeing the polling sites. A "Ranger" is assigned to 4 to 10 polling sites to provide assistance to the Inspector. The Ranger is the only one who can change the AVVPAT's.

Equipment Needed:

- **DREs** (*Direct Recording Electronic device*) An electronic touch screen (looks like a computer monitor) that is a recording device with a computer program memory, and a memory card.
- **AVVPAT** (*Accessible Voter Verifiable Paper Audit Trail*) printers will arrive in a plastic tub with the DREs and be stored in a secure location. They will be placed back in the tub at the close of the voting and be picked-up with the DREs and returned to ROVs office at a later date.
- **Ballot Box:** This blue box will contain the paper materials needed for the election, Roster Books, Street Index, Card Activator (2), Activator Cards, and A Paper Ballot Kit. The Ballot Box will arrive with the Election Inspector.
- **Each Polling place is to receive a "Paper Ballot Kit".** (SRV is asking the RoV to provide a sign for each Polling Site stating paper ballots are available.)
- **RED Pouch:** A security pouch in which to transport documents (Election records and voter memory cards.)
- **Table and Chairs:** Check in space for registered voters

Number of "Polling-Set-Up" at a location: Each "Set-up" will have 5-10 DREs, and it's own workers, (for this election the larger Precincts will receive 10.)

Precinct Number (s) for each "Set Up": Information will be provided on assignment sheet.

Space layout: Voter privacy is of highest priority this includes the paper ballot voter, too.

Poll Watcher Location: Place your chair in a location where you can observe the registration table and the DREs. If you are close enough to hear comments and questions it might be insightful. **See page 31**

DREs NOTE Serial Number of each machine: _____

Printers: Do Number matched to DREs Y / N / DNO Is one set aside in reserve? Y / N / DNO

Printer serial numbers _____

Components Installed and Checked:

Were all parts available for set up? Y / N / DNO
Were power cords daisy chained between each voting machine? Y / N / DNO
Did election official (s) know how to unpack and set up DREs? Y / N / DNO
If no explain: _____

When power was turned on did a green light come on? Y / N / DNO
When the screens were raised did a message come on saying,
"Ready to Open Official Election?" Y / N / DNO
Were machines powered down before screens were reclined? Y / N / DNO
Did the election Official seem to use space effectively? Y / N / DNO
Was voter privacy considered? Y / N / DNO
Was a private place established for paper ballot voter? Y / N / DNO

Sketch the layout of Polling place showing the DREs and the Election Table.

Please use a sheet from "Observation Form" section to make notes or report additional observations. (pages 34 - 40)

Closing of the Polling Place

Reference Information

The Election Inspector is to go to the door and identify the last person in line and declare the polls closed. If a voter is in line at 8:00 p. m. they are allowed to vote.

Once the last voter has voted and departed the following activities should start to happen:

The process is designed for 2 teams to perform the closing activities (paper work and other activities) and they will be working simultaneously.

Closing of the Polling Place

Data Recording Form

Polling Site Address _____ CA _____
 Street City Zip
 Person Observing _____ Time _____ Date _____

(Y = yes N = no DNO = did not observe)

Did voter traffic permit final "paper work" to begin before Polls closed? Y / N / DNO

Did Elec. Official proclaim aloud at 8:00 p.m. "the polls are closed"? Y / N / DNO

Did the Election Official declare the last person in line as the last voter? Y / N / DNO

Confirmed all voters have left the polling place Y / N / DNO

Team 1 (2 people)

Starting at one end of voting units (DREs) Election Officials performed the follow steps:

1. Broke the red plastic seal on the Polls Open/Closes cover Y / N / DNO

2. Turned switch to Closed Y / N / DNO

3. Completed 1 and 2 on each machine Y / N / DNO

Poll workers returned to the end of voting units with red "Transport Bag" and the "Electronic Ballot Statement" (EBS)

4. One person in front and one in back, used the "E B S" and recorded in the first column the Edge Voting Unit (EVU) numbers from each of the unit, Y / N / DNO

5. Removed "Tamper-Evident Seal" from door housing which hold the ballot Cartridge and placed it in the second column of the E B S. Y / N / DNO

6. Returned to first machines and broke the red plastic seal from each ballot cartridge door and "PULLED the CARTRIDGE" (Memory /Card) and placed it in the red "transport Bag". (There should be 5 – 10 total) Y / N / DNO

7. Documented that numbers on each set-up (DRE, Printer, and Memory Card), are the same:

Machine 1 - Y / N Machine 2 - Y / N Machine 3 - Y / N Machine 4 - Y / N Machine 5 - Y / N

8. Recorded three (3) total voter counts, from visible on screen or as called out by election worker for each machine. (Same data as on the Electronic Ballot Statement)

Machine #	Protected Count #	Provisional Count #	Public Count #

If there are more machines record data on next page

Please use a sheet from "Observation Forms" section to make notes or report additional observations pages 34 - 40.

Poll Closing Team 1

Reference Information, continued

The Rosters are used for record keeping and data reported to RoV related to numbers from the precinct.

Below you will find a sample "Certificate of Completion" form. On page 16 there is one for you to complete. Please complete all areas requiring numbers. An Election Worker will be completing one just like it and should be willing to share the information. These numbers will be beneficial when reconciled between the Result Report and the Electronic Report.

Poll Closing Team 1 & 2

Reference Information

Posting of Election Results at the Polling Site

When the polling site is closed and the Results Report (a summation report of all ballots cast for each candidate) has been printed, then the AVVPAT will be removed from the DRE, stored in the tub, and a security tag placed on the tub. This report will go to the RoV's office with the AVVPAT.

Then the Inspector will:

1. Take another AVVPAT, which has a security tag, and attach it to the first DRE and print another copy of the Results Report.
2. She/He will then go down the line to each of the DREs and print the Results Report from each DRE.
3. When all 5 or 10 reports are completed the Inspector will break the security seal.
4. She/He will remove the upper paper spool and cut the paper below the report data.
5. Each DREs report will be cut from the spool and posted to the outside of the door.

The report will look something like Fig. # 15, on page 19.

RESULT Posting

Results will NOT be posted at **private residences or at schools**, but will be secured with security tape and placed in the **Red Transport Bag** and sent to Gateway for posting.

This process adds another measure of transparency to the election process. S R V is pleased that this step has been added to the election process in Riverside County.

RESULTS REPORT INFORMATION

A sample of the "SRV- DRE Results Report Recording Form" is on page 19.

The working copies are in the additional information section of this book starting on page 52

Election Day Observations

Selected Polling sites will be monitored from election eve set up to delivering the ballots to the pickup site.

- | | |
|-----------------------------|---------------|
| • Election Morning Set Up | Pages 21 - 23 |
| • First Voter | Pages 24 - 25 |
| • Election Day (all voters) | Pages 26 - 32 |

Election Morning Poll Opening

Reference Information

ROV's office provided instruction for two teams of workers to open the polling site for a 7:00 a.m. opening. Therefore our observation forms are structured for two teams.

Remember **ALL Political** materials (candidates advertisement) and discussion of candidates must be 100' + away from Polling Place Entrance.

If someone is conducting an exit poll they maybe 25 feet from the exit door.

An election Inspector and a minimum of 2 workers must be present, 4 or 5 are preferred.

Confirm room is set up as shown in drawing from night before, see page 11 for sketch from night before.

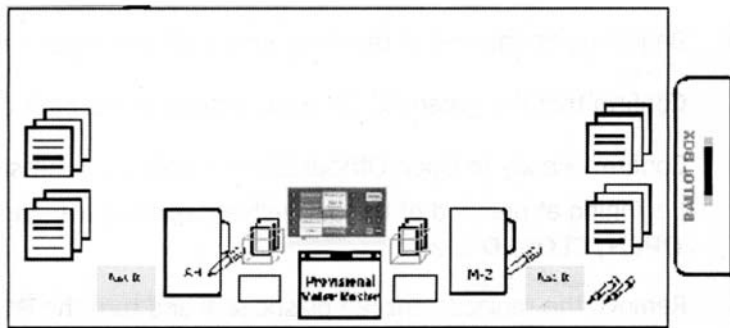

Fig. # 17 Official Election Table Setup

Fig. # 18 Card Activator

Fig. # 19 Activator Cards

Check that all SAFETY Ties and Tapes are in place on DREs. THESE SEALS MUST NOT have been lifted during the night. Check tape color, it should still be yellow. When DREs are turned on the yellow tape should be replaced with a red tie. Election Ranger can change out a printer if it is full or has jammed. There is only 1 extra printer per Polling Site. If another is needed the Ranger must secure it from ROVs Office and bring to Polling Place. The DRE will be out of service until another printer is installed, be sure and note the number of any changes.

Please use a sheet form "Special Observation Forms" section to make notes or report additional observations (page34 - 40).

Polling Site Address

Street	City	State
--------	------	-------

(Y = yes N = no DNO = did not observe)

First Voter

Reference Information

First voter must be first person waiting outside the door at 7:00 a.m. the 1st Voter must vote electronically to be able to perform the final opening procedures. (Remember you are an observer using all your senses and knowledge. If, there is a problem with the electronic screen most likely the voter will signal for the election inspector.)

First Voter Procedural Checklist **PRECINCT# 38031**

California Elections Code 14215, requires that before issuing or receiving any ballots, the Inspector of the Precinct Board must open, exhibit, and close the ballot container(s). The following procedural checklist must be completed by a Precinct Inspector for the "First Voter" that arrives at the Polling Place once his/her eligibility has been established.

After processing and obtaining all required documentation from the 1st eligible voter, have him/her verify that the blue ballot box is empty. Then walk the voter to the voting units and record the voting unit number on the "Public Counter Verification" list below. Show the 1st voter the screen of each voting unit and ask him/her to confirm the "0" (zero) in the lower left corner of each screen identified as the "Public Counter".

Ballot Box Verification		(Initials)	
	Yes	No	
Ballot Box is Empty?			
Ballot Box is Locked?			

Voting Unit Number	Public Counter Verification	(Initials)	
	Yes	No	
	Does the screen display a zero on the public counter?		
	Does the screen display a zero on the public counter?		
	Does the screen display a zero on the public counter?		
	Does the screen display a zero on the public counter?		
	Does the screen display a zero on the public counter?		
	Does the screen display a zero on the public counter?		
	Does the screen display a zero on the public counter?		
	Does the screen display a zero on the public counter?		
	Does the screen display a zero on the public counter?		
	Does the screen display a zero on the public counter?

Fig. # 22 Voter Roster Sheet

The Cards Activation Unit (located on official table) is to only be used by an election official.

- Voter information is entered and appropriate ballot is loaded for each voter.
- Voter takes Activated Card to DRE and inserts in machine. The ballot then appears on the screen, voter selects their candidate, confirms screen and printer reflect their choices. Vote is then recorded in the DRE on the redundant memory and on the Memory Card.

Types of Ballots: Electronic, Absentee, and Paper.

Ballot Box - Absentee and Paper are placed in Ballot Box

First voter confirms blue ballot box is empty. Y / N / DNO

Election official closed and locked the ballot box immediately. Y / N / DNO

First voter records "Voting Unit Number", on a form provided by an election official. Y / N / DNO

First voter checks each DRE to be sure that it shows "0" in the lower left corner of each screen identified as "Public Counter" and initials form Y / N / DNO

First voter is given an activated "Voter Card" Y / N / DNO

First voter inserts the "Voter Card" in DRE and proceeds to vote. Y / N / DNO

First voter confirms screen ballot. Y / N / DNO

Was it correct? Y / N / DNO

First voter confirms printed ballot . Y / N / DNO

Was it correct? Y / N / DNO

First voter returns activator card to election official Y / N / DNO

Election official declares the poll open. Y / N / DNO

Other voters are then allowed to enter the Polling place Y / N / DNO

NOTATIONS: _____

Please use a sheet from "Observation Form" to make notes or report additional observations. (Page 38 - 40)

ELECTION DAY OBSERVATIONS

Reference Information

Watch carefully for persons taking an extra long time. Sometimes this is because the DRE is not reporting / showing the correct selected. **THIS IS OF GREAT IMPORTANCE TO DOCUMENT THIS HAPPENING. The pencil with an eraser on each end is attached to the DRE should help to activate the touch screen.**

When you have completed page 28 you will then have four areas to observe:

- **Tally** number of voters that enter polling place - note if there is anyone turned away and why
- Observe **Card Activator**, Most common problem Printing wrong ballot (a bigger problem in the Primary Elections). The Activated Card is to be removed once selection are printed.
- Observe for **DRE** Problems, the most common problem is screen out of calibration and/or Activator Card getting stuck. Each voter will check the screen for showing correct person marked.
- Observe **Printer** for Problems, the most common problem paper jamming (not pulling straight) on roller, and again the printed ballot should be checked before approving.

TALLY Number of Voters

You will make one mark in the appropriate section for each person who enters the Polling Site. This information will give SRV another source of voter count data to compare with all other sources, such as total public count, paper ballot voters, and for number of person casting a vote at the polling site on election day.

ACTIVATOR CARD

- The "Voter Card" is what each voter is given so they can cast their vote on the DRE.
- The Cards Activation Unit (located on official table) is used by election official only.
- Voter information is entered and appropriate ballot is loaded for each voter.

Step by step process for a voter while in the Polling Place:

Election official verifies voter eligibility	→	Voter Signs In
Election official gets a Voter Card	→	Inserts into Card Activation Unit
Voter Card is given to voter	→	Voter inserts Voter Card into the DRE
Voter follows prompts on the screen to vote	→	Voter confirms both screen and printed paper ballot are correct as voted
Voter Card will pop out of DRE on completion	→	Voter returns Voter Card to election official
Election official clears the card of data	→	Voter Card is then returned it to inventory

Most Common Activator Card Problem:

Activator Voter Card gets stuck in DRE

Activator Card pops out before all of voter's choices are made or recorded

Voter leaves Activator Card in DRE

ELECTION DAY OBSERVATIONS

Reference Information, continued

DRE = DIRECT RECORDING ELECTRONIC Device

The DRE is an Electronic touch screen Recording Device utilized in elections.

It does the following:

1. It creates your **ballot** on screen via the Activated Card (voter selects candidate)
2. It **casts your ballot** and saves your vote on memory card and in the DRE
3. Then your vote is printed on an **AVVPAT** providing audit trail)
4. It becomes the **ballot box** (by copying votes to a printer and storing the votes)
5. It **tallies your vote** with others cast on that DRE and can be programmed to tally the votes from the DREs at the Precinct

The DREs operate with secret software owned by a private company paid for with OUR tax dollars. The Registrar of Voters is responsible for the security, logic and accuracy and transparency of each voters vote.

BE VERY OBSERVANT OF ANYONE GOING OR REACHING BEHIND THE DRE. It has been reported that when the YELLOW BUTTON is pushed, that the function of the machine can be changed allowing many votes to be cast in secret.

Common Problems for DREs

Out of Calibration (Screen does not reflect voter's choice) or Activator Card gets stuck

AVVPAT = Accessible Voter Verified Paper Audit Trail

The purpose of AVVPAT's is for a voter to verify their electronic vote and create a paper ballot to be used in the mandatory random 1% manual tally.

The VVPAT is attached to the side of the DRE.

The paper is on spools (similar to a grocery store tape except you do not get a copy).

The ink is heat sensitive and must be stored in climate controlled space.

It is difficult to read through the glass to check your ballot.

It is possible for a AVVPAT to not only print each ballot but it can total votes cast for each candidate or race, thus provides away for a results report to be made available for posting at the precinct on election night.

The Election Ranger is the one allowed to open a AVVPAT containing an **official ballot**.

The Election Inspector can print and post the Result Report election night for posting.

Common Problems:

Paper Jammed or drifts to the side.

Paper roll completed meaning, printer must be removed and a back-up printer installed or the DRE must come out of service.

Special Needs Options for Vote

Additional Information Sheet

Other ways of casting a vote:

Curbside Voting: Occasionally you may be alerted to a voter who is unable to enter the Polling Place due to the accessibility limitations of the Polling Place. Such voters are identified as Curbside Voters and are permitted to vote by means of a touch screen taken to him / her outside of the Polling Place (EC 14282, EC 12280)

Absentee Ballot: If a voter indicated in the Combined Roster and Index as having been issued an Absentee Ballot presents himself/herself at the polls to vote, the voter may via touchscreen **only if** the issued Absentee Ballot is surrendered. The surrendered Absentee Ballot is to be marked in large letters **“Do Not Count – Voted at the Polls”** sealed, and deposited into the ballot box. The voter then signs and prints his/her address on the line in the appropriate Combined Roster and Index, and is issued an activated Voter Card. (EC 3015, 3016, 14310, 3017, 3010, 3011)

Paper Ballot: Issue the voter a paper ballot if he/she requests to vote a paper ballot instead of using touch screen. **Note: Voters who request a paper ballot and are not in your roster must be issued a “Paper Provisional Ballot”.** Have the voter place the completed ballot in the blue envelope provided, the voter must also complete the back of the envelope and the entry block in the Blue Provisional Voter Roster. Detailed steps are provided in the election official's guide book.

Audio Ballot: The election official knows how to identify the DRE capable of handling an audio voter. Once the audio equipped unit is in Audio Mode, the audio features will function when activated by the Voter Card. A voter may opt for an audio ballot for any reason and a voter is under no obligation to provide reasons as to why he/she wishes to vote an audio ballot. **An Election Officer must never ask a voter to explain why he or she seeks access to an audio ballot!**

Specific Needs: Election Officials have a moral and legal obligation to provide Specific Need Voters with the support they require to cast their ballots in a manner which protects their privacy, preserves the secrecy of their ballots and which respects their individual dignity and civil rights. It may be as simple as offering a chair if they can not stand and etc.

Election Official Hourly Updates:

Once each hour, from 8:00 a.m. until 6:00 p.m., a member of the precinct board must update the posted copy of the Street (Precinct) Index to reflect activity at the polling place. This procedure is done by taking the yellow Post-It pages accumulated during the previous hour and using the x-ref #'s records on them to locate the corresponding voter's on the Street (Precinct) Index. Once located, each voter's name and address are highlighted using the yellow highlighter pen provided. Once the update has been completed, the Post-it pages may be disposed of as the next hour's pages are being accumulated. This procedure may be stopped at 6:00 p.m.

Election Codes

Reference Codes

LEGAL SOURCES FOR VOTING ISSUES

PRIMARY ELECTION

2006

1. Poll Watchers

Citizens are permitted to observe the election procedures at the polling place, provided they comply with standards set forth by election officials.

Source: Poll Watchers are referred to at several points in the Election Code. The best source for our purpose is the "Election Officer Handbook" provided to polling place inspectors and workers by the Riverside County Registrar of Voters. On page 54 the authority for poll watchers is established in the following:

- "Anyone may be a poll watcher"
- "A poll watcher is someone who is observing the procedures at the polls ... who has or has not voted."
- "Although the law allows poll watchers, the following rules and guidelines must be followed" (The specific rules and guidelines are listed in your notebook and are the ones that were reviewed with you during training.)

2. Voting Machines in Plain View

The voting machines must be in plain view for all to see. This prevents tampering and preserves the integrity of the vote. Watching the voting machines is essential to our purpose.

Source: EC 19362 "The exterior of the voting machine and every part of the polling place shall be in plain view of the precinct board and the *poll watchers*."

3. First Voter

When the first voter of the day is determined to be qualified to vote, he/she inspects the ballot box to verify that it is empty. The first voter also confirms the unit number of each DRE and verifies that the DRE screen reflects a "0" in the public counter section.

Source: Registrar of Voter's Handbook, pages 26 and 27.

4. Intimidation of Voters

Persons who appear at the polls for the purpose of voting may not be threatened or coerced.

Source: EC 18540(a) " Every person who makes use of or threatens to make use of any force, violence, or tactic of coercion or intimidation to induce or compel any other person to vote or refrain from voting ... is guilty of a felony."

5. Provisional Ballots

A person who claims to be registered and eligible to vote, but whose name can not be found on the voting list, should be issued a paper ballot and be permitted to vote provisionally. The provisional ballot will be counted in the final tally, if the person's eligibility can be established.

Source: EC 14310(a) "At all elections, a voter who claims to be properly registered, but whose qualification or entitlement to vote can not be immediately established upon examination of the index for the precinct or upon examination of the records on file with the county election official shall be entitled to vote a provisional ballot..."

6. In Line at Close of Voting

At 8:00 PM the polls are closed for voting; however all persons who are in line to vote must be permitted to do so. Anyone arriving in line after 8:00 PM is not allowed to vote. The Inspector should make a loud statement that the polls are closed and identify those in line who will be permitted to vote.

Source: EC 14401 "When the polls are close, the precinct board shall proclaim that fact aloud at the place of the election. After the proclamation no ballot shall be received. However, if at the hour of closing there are other voters in the polling place, or in line at the door, who are qualified to vote and have not been able to do so since appearing, the polls shall be kept open a sufficient time to enable them to vote."

7. Election Observation Panels

Every county in the State that uses an electronic voting system must establish an Election Observer Panel to provide meaningful public observation of the vote counting process. Each such county must submit an Election Observer Panel Plan to the Secretary of State by January 15 of each even-numbered year.

Source: The Secretary of State has issued several directives pertaining to electronic voting machines, including the establishment of Election Observer Panels. Those directives have the force of law pursuant to Section 12172.5 of the Government Code and must be followed by the individual counties. The election observer panel is also required in the Sequoia operating manual as a condition of use of the equipment and software.

8. Posting Election Results at Each Precinct

At the close of elections, the vote of each precinct is supposed to be tabulated by precinct personnel and posted in writing. The cumulative results of the precinct-by-precinct vote tally provides a check against the vote tally performed at the central voting place, typically the Registrar of Voters headquarters. In the 2000 and 2004 elections, this requirement was waived for Riverside County, on the basis that the voting machines did not have a printing capability. In this primary election, the machines will have a printers, so no waiver should be given.

Source: EC 19384 "The precinct board shall, before it adjourns, post conspicuously on the outside of the polling place a copy of the result of the votes cast at the polling place. The copy of the result shall be signed by members of the precinct board. If the machine is provided with a recording device, the statement of result of votes cast produced by operating its mechanism may be considered the "result of the votes cast" at the polling place."

9. Logic and Accuracy Testing

The County is responsible for testing all devices used to tabulate votes (which includes electronic voting systems) no later than seven days before the election to confirm their accuracy. In the 2004 New Mexico presidential election there were a much higher percentage of under votes and "phantom" votes where electronic voting machines were used, than where paper ballots were used. (That election was decided by fewer than 6,000 votes).

Source: EC 15000 "No later than seven days prior to any election conducted pursuant to this code, the elections official shall conduct a test or series of tests to ensure that every device used to tabulate ballots accurately records each vote. The exact method employed in this test shall conform to the voting procedures for the specific voting systems, as adopted by the Secretary of State."

10. One Percent Manual Audit

As a check to ensure the accuracy of the vote count, the County must conduct an audit of the votes from one percent of the precincts. There are approximately, 1,700 precincts in Riverside County so the Registrar must randomly select 17 and manually tally each vote from those precincts. The new DREs have paper rolls that are supposed to permit this manual audit, but there are serious concerns whether the rolls will accommodate a physical count. The Election Observer Panel will be vital in insuring that the precincts are, in fact, chosen randomly and that a true manual audit is performed.

Source: EC 15360 "During the official canvass of every election in which a voting system is used, the official conducting the election shall conduct a public manual tally of the ballots tabulated by those devices cast in 1 percent of the precincts chosen at random by the election official."

11. Non-County Computer Specialists

Computer specialists, other than those employed by the County or the voting machine vendor, may be present during the accuracy testing of the electronic voting tabulators and during the election. This provision adds a technical level check against improper use of the electronic equipment. The actual tabulating programs are proprietary assets of the vendors; therefore, they are not open to inspection by either County or non-County computer specialists.

Source: EC 15004 "The county central committee of each qualified political party may employ, and may have present at the central counting place or places, not more than two qualified data processing specialists or engineers to check and review the preparation and operation of the tabulating devices, their programming and testing, and have the specialists or engineers in attendance at any or all phases of the election."

12. Availability of Vote Tabulating Procedures

The Secretary of State has established directives for each voting system approved by his office. Each county must develop internal procedures to ensure compliance with the procedures of the Secretary of State. The county's procedures must be open for public inspection.

Source: EC 15003 "Elections officials shall adopt semifinal official and official canvass procedures to conform to the applicable voting system procedures that have been approved by the Secretary of State. These procedures shall be available for public inspection no later than 29 days before the election."

13. Observing the Counting of Absentee, Early, and Provisional Ballots

These ballots are not tabulated at the precinct level; instead, they are counted on or before election night at the Registrar of Voter's headquarters. The counting of these ballots is supposed to be conducted with public observation. At the ROV's headquarters, observation of any vote counting activities has been very limited.

Source: EC 15104 "The processing of absentee return envelopes, and the processing and counting of absentee ballots shall be open to the public both prior to and after the election."

Poll Watcher's Information

“Trust But Verify”

Poll Watcher Team of Five Persons - one team per polling site

Proposed “Watchers” Election Day Schedule

(A person can opt to work more than one position.)

Watcher's Title

Schedule:

Chain of Custody & Equipment	Election Eve Set-up	(2 hrs. est.)
	Election Night Close Poll	(2 hrs. est.)
Poll Opener	Election Day	6:15 a.m. – 10:00 a.m.
Morning Watcher	Election Day	9:30 a.m. – 1:30 p.m.
Afternoon Watcher	Election Day	1:00 p.m. - 5:00 p.m.
Evening Watcher	Election Day	4:30 p.m. - 8:30 p.m.

Mode of Operation

Each Polling Site will have a Guide Book for “Watcher's” which includes:

- Check sheets developed for each work period to guide Poll Watcher through their time
- A set of reference information in *Save R Vote* portfolio:

Guidelines for Poll Watchers
Appropriate California State Election Code,
Most common trouble spots for equipment and staff performance
Ways to observe for transparency and auditability of the system
Phone numbers for appropriate contact

“Out Going” and “In Coming” Watchers have a thirty minute overlap to allow for:

- Introductions,
- transfer of information and
- to complete their forms

Poll Watcher Report Forms will be utilized by a writing team.

Poll Watcher Report forms will be used to compile a report reflecting election day observations from all sites observed. *Save R Vote* will utilize this report in planning for future activities. As a Poll Watcher you will be provided a copy of the final report.

The summary will reflect the following three criteria: 1. Compliance with California State Election Code 2. Performance of equipment and staff interface with equipment and 3. Transparency and Auditability of the System.

Poll Watcher Commitment

“Trust But Verify”

A Save R Voter Poll Watcher will position themselves in such away as to be able to view the voting process while avoiding interfering in anyway with the official business of the election process.

The state guidelines are as stated below.

“Anyone may be a poll watcher. A poll watcher is someone who is observing, the procedures at the polls.” The following rules and guidelines must be followed:

- Poll watchers are NOT permitted to disturb voters or interfere with the election process in any way
- Poll watchers may NOT sit at the election table
- Poll watchers are NOT permitted behind the voting equipment or in the “voting area”. Do not allow anyone other than a voter to touch the voting equipment unless he/she shows you Riverside County Registrar of Voter’s ID.
- Poll watchers may NOT remove the Street Index from the voting room. It may be removed from wherever it is Displayed, but must be re-posted
- Poll watchers may not at any time, handle ballots
- In more than one person wishes to use the Street Index, it must be equally shared
- Poll watchers may not photograph or videotape voters for the purpose of intimidation. (E.C. 18541(3))

ANY conversation with voters, ie Exit Polling, must be conducted 25 feet beyond the entrance to the polling place.

These requirements regarding Poll Watcher were provided by the County of Riverside’s Registrar of Voters Office.

I, _____
Name (print) and (Sign)

of _____
Street address City State zip

agree to up hold the above stated rules and guidelines for poll watching in Riverside County for the November 6, 2006 General Election.

This is a sample of an agreement signed by all SRV Poll Watchers, and are on file with SRV a project of Democracy for America – Temecula Valley.

Summary of Election Day Data

To be completed by SRV Coordinator after the Polls Close

Precinct Number _____ Precinct Address _____

Number of curbside voters who signed in _____

Number authorized voters signatures _____

Number of Audio Ballots cast _____

Election Day Poll Watchers Evaluation Form

Please share your thoughts with us related to your experience as a Poll Watcher, such as, materials provided, the training, or anything else you think might be helpful to SAVE R VOTE.

What did you like about being a Poll Watcher, including what worked well for you?

What would you (as a Poll Watcher) like to do or suggest be done differently next time?

How can the SAVE R VOTE team help you perform more easily or differently next time?

Additional space is provided on backside of this page for additional information.

When completed please fold and place in back pocket of this notebook, thanks again for your participation in Save R Vote.

Five copies of this form should be included in the back of the notebook for each Poll Watcher to use.
