Name _____   Date _____

1. There are 598,500 Apple employees in the United States.
    a. Round the number of employees to the given place value.

        thousand: _____

        ten thousand: _____

        hundred thousand: _____

    b. Explain why two of your answers are the same.

2. A company developed a student survey so that students could share their thoughts about school. In 2011, 78,234 students across the United States were administered the survey. In 2012, the company planned to administer the survey to 10 times as many students as were surveyed in 2011. About how many surveys should the company have printed in 2012? Explain how you found your answer.

EUREKA MATH™

Lesson 10:   Use place value understanding to round multi-digit numbers to any place value using real world applications.
