*Key Scale:- (see attached scale)* 

1. Co	mpetency: Demonstrates professional and ethical behaviors						
Performance Criteria:							
	Maintains Professional Student Nurse Role(s)			3	2	1	N/A
1-	Adheres to professional dress code						
2-	Protects and advocates for patient rights (privacy, autonomy, confidentiality)						
3-	Addresses all individuals with dignity and respect without discrimination.						
4-	Complies with hospital policies and regulations						
5-	Adheres to guidelines of the Intensive Clinical Nursing course syllabus						
6-	Accepts and reacts appropriately to constructive feedback						
7-	Provides holistic nursing care to patients						
8-	Carries all delegated responsibilities						
9-	Handles incidents according to hospital policy						
10-	Actively seeks opportunities for learning						
11-	Contributes to group/team activities						

12-       Demonstrates a therapeutic relationship with the patient and family/support person.         13-       Demonstrates correct techniques for health assessment         14-       Gathers relevant laboratory and diagnostic test results         15-       Analyzes relevant laboratory and diagnostic test results         16-       Clusters data to identify patient/nursing problems         17-       Relates pathophysiology of disease(s) to patients' assessment findings, medications, laboratory and diagnostic test results, and medical and nursing information         18-       Develops a plan of nursing care based on findings         3. Competency: Provides individualized patient care and outcome evaluation         Performance Criteria:	2. Competency: Gathers and analyzes comprehensive Patient assessment data							
12- Demonstrates a therapeutic relationship with the patient and family/support person.   13- Demonstrates correct techniques for health assessment   14- Gathers relevant laboratory and diagnostic test results   15- Analyzes relevant laboratory and diagnostic test results   16- Clusters data to identify patient/nursing problems   17- Relates pathophysiology of disease(s) to patients' assessment findings, medications, laboratory and diagnostic test results, and medical and nursing information   18- Develops a plan of nursing care based on findings   3. Competency: Provides individualized patient care and outcome evaluation   19- Establishes priorities of patients nursing care   20- Uses critical thinking strategies in decision-making, planning, and provision of care   21- Demonstrates caring behavior towards patients and families   22- Reports abnormal data and changes in patient condition   23- modifies patient nursing care as indicated by the evaluation outcomes   24- Performs nursing interventions   25- Recognizes own limitations   26- Assesses patient/family understanding of the health care situation   27- Presents information in a clear, professional manner, to patient's family   28- Evaluates patient's nursing care outcomes   28- Evaluates patient's n	Perfo							
13- Demonstrates correct techniques for health assessment   14- Gathers relevant laboratory and diagnostic test results   15- Analyzes relevant laboratory and diagnostic test results   16- Clusters data to identify patient/nursing problems   17- Relates pathophysiology of disease(s) to patients' assessment findings, medications, laboratory and diagnostic test results, and medical and nursing information   18- Develops a plan of nursing care based on findings   3. Competency: Provides individualized patient care and outcome evaluation   Performance Criteria:    Nursing Intervention and Outcome Evaluation   5   4   3   2   1   N/ 19- Establishes priorities of patients nursing care   20- Uses critical thinking strategies in decision-making, planning, and provision of care   21- Demonstrates caring behavior towards patients and families   22- Reports abnormal data and changes in patient condition   23- modifies patient nursing care as indicated by the evaluation outcomes   24- Performs nursing interventions   25- Recognizes own limitations   26- Assesses patient/family understanding of the health care situation   27- Presents information in a clear, professional manner, to patient's family   28- Evaluates patient's nursing care outcomes   28- Evaluates patient		Adheres to Professional Conduct	5	4	3	2	1	N/A
14-   Gathers relevant laboratory and diagnostic test results   15-   Analyzes relevant laboratory and diagnostic test results   16-   Clusters data to identify patient/nursing problems   17-   Relates pathophysiology of disease(s) to patients' assessment findings, medications, laboratory and diagnostic test results, and medical and nursing information   18-   Develops a plan of nursing care based on findings   3. Competency: Provides individualized patient care and outcome evaluation   Performance Criteria:   Nursing Intervention and Outcome Evaluation   5   4   3   2   1   N/   19-   Establishes priorities of patients nursing care   20-   Uses critical thinking strategies in decision-making, planning, and provision of care   21-   Demonstrates caring behavior towards patients and families   22-   Reports abnormal data and changes in patient condition   23-   modifies patient nursing care as indicated by the evaluation outcomes   24-   Performs nursing interventions   25-   Recognizes own limitations   26-   Assesses patient/family understanding of the health care situation   27-   Presents information in a clear, professional manner, to patient's family   28-   Evaluates patient's nursing care outcomes   29-   Persents information in a clear, professional manner, to patient's family   28-   Persents information in a clear, professional manner, to patient's family   28-   Persents information in a clear, professional manner, to patient's family   28-   Persents information in a clear, professional manner, to patient's family   28-   Persents information in a clear, professional manner, to patient's family   28-   Persents information in a clear, professional manner, to patient's family   28-   Persents information in a clear, professional manner, to patient's family   28-   Persents information in a clear, profe	12-	Demonstrates a therapeutic relationship with the patient and family/support person.						
15-   Analyzes relevant laboratory and diagnostic test results   16-   Clusters data to identify patient/nursing problems   17-   Relates pathophysiology of disease(s) to patients' assessment findings, medications, laboratory and diagnostic test results, and medical and nursing information   18-   Develops a plan of nursing care based on findings     3. Competency: Provides individualized patient care and outcome evaluation   Performance Criteria:   Nursing Intervention and Outcome Evaluation   5   4   3   2   1   N/   19-   Establishes priorities of patients nursing care     20-   Uses critical thinking strategies in decision-making, planning, and provision of care   21-   Demonstrates caring behavior towards patients and families   22-   Reports abnormal data and changes in patient condition   23-   modifies patient nursing care as indicated by the evaluation outcomes   24-   Performs nursing interventions   25-   Recognizes own limitations     25-   Recognizes own limitations     26-   Assesses patient/family understanding of the health care situation   27-   Presents information in a clear, professional manner, to patient's family   28-   Evaluates patient's nursing care outcomes     28-	13-	Demonstrates correct techniques for health assessment						
16- Clusters data to identify patient/nursing problems   17- Relates pathophysiology of disease(s) to patients' assessment findings, medications, laboratory and diagnostic test results, and medical and nursing information   18- Develops a plan of nursing care based on findings   3. Competency: Provides individualized patient care and outcome evaluation   Performance Criteria:   Nursing Intervention and Outcome Evaluation   5   4   3   2   1   N/	14-	Gathers relevant laboratory and diagnostic test results						
17-   Relates pathophysiology of disease(s) to patients' assessment findings, medications, laboratory and diagnostic test results, and medical and nursing information   18-   Develops a plan of nursing care based on findings     3. Competency: Provides individualized patient care and outcome evaluation   Performance Criteria:     Nursing Intervention and Outcome Evaluation   5   4   3   2   1   N/   19-   Establishes priorities of patients nursing care     20-   Uses critical thinking strategies in decision-making, planning, and provision of care   21-   Demonstrates caring behavior towards patients and families   22-   Reports abnormal data and changes in patient condition     23-   modifies patient nursing care as indicated by the evaluation outcomes   24-   Performs nursing interventions     25-   Recognizes own limitations     25-   Recognizes own limitations     26-   Assesses patient/family understanding of the health care situation   27-   Presents information in a clear, professional manner, to patient's family   28-   Evaluates patient's nursing care outcomes	15-	Analyzes relevant laboratory and diagnostic test results						
laboratory and diagnostic test results, and medical and nursing information  18- Develops a plan of nursing care based on findings  3. Competency: Provides individualized patient care and outcome evaluation  Performance Criteria:  Nursing Intervention and Outcome Evaluation  19- Establishes priorities of patients nursing care  20- Uses critical thinking strategies in decision-making, planning, and provision of care  21- Demonstrates caring behavior towards patients and families  22- Reports abnormal data and changes in patient condition  23- modifies patient nursing care as indicated by the evaluation outcomes  24- Performs nursing interventions  25- Recognizes own limitations  Teaching, Teamwork and Leadership  26- Assesses patient/family understanding of the health care situation  27- Presents information in a clear, professional manner, to patient's family  28- Evaluates patient's nursing care outcomes	16-	Clusters data to identify patient/nursing problems						
18- Develops a plan of nursing care based on findings  3. Competency: Provides individualized patient care and outcome evaluation Performance Criteria:  Nursing Intervention and Outcome Evaluation  19- Establishes priorities of patients nursing care  20- Uses critical thinking strategies in decision-making, planning, and provision of care  21- Demonstrates caring behavior towards patients and families  22- Reports abnormal data and changes in patient condition  23- modifies patient nursing care as indicated by the evaluation outcomes  24- Performs nursing interventions  25- Recognizes own limitations  Teaching, Teamwork and Leadership  26- Assesses patient/family understanding of the health care situation  27- Presents information in a clear, professional manner, to patient's family  28- Evaluates patient's nursing care outcomes	17-	Relates pathophysiology of disease(s) to patients' assessment findings, medications,						
3. Competency: Provides individualized patient care and outcome evaluation  Performance Criteria:    Nursing Intervention and Outcome Evaluation		laboratory and diagnostic test results, and medical and nursing information						
Performance Criteria:    Nursing Intervention and Outcome Evaluation   5   4   3   2   1   N/ 19-   Establishes priorities of patients nursing care   20-   Uses critical thinking strategies in decision-making, planning, and provision of care   21-   Demonstrates caring behavior towards patients and families   22-   Reports abnormal data and changes in patient condition   23-   modifies patient nursing care as indicated by the evaluation outcomes   24-   Performs nursing interventions   25-   Recognizes own limitations   25-   Recognizes own limitations   26-   Assesses patient/family understanding of the health care situation   27-   Presents information in a clear, professional manner, to patient's family   28-   Evaluates patient's nursing care outcomes   21-   N/ 25-   N/	18-	Develops a plan of nursing care based on findings

Nursing Intervention and Outcome Evaluation  19- Establishes priorities of patients nursing care  20- Uses critical thinking strategies in decision-making, planning, and provision of care  21- Demonstrates caring behavior towards patients and families  22- Reports abnormal data and changes in patient condition  23- modifies patient nursing care as indicated by the evaluation outcomes  24- Performs nursing interventions  25- Recognizes own limitations  Teaching, Teamwork and Leadership  26- Assesses patient/family understanding of the health care situation  27- Presents information in a clear, professional manner, to patient's family  28- Evaluates patient's nursing care outcomes	3. Competency: Provides individualized patient care and outcome evaluation							
19- Establishes priorities of patients nursing care 20- Uses critical thinking strategies in decision-making, planning, and provision of care 21- Demonstrates caring behavior towards patients and families 22- Reports abnormal data and changes in patient condition 23- modifies patient nursing care as indicated by the evaluation outcomes 24- Performs nursing interventions 25- Recognizes own limitations  Teaching, Teamwork and Leadership  26- Assesses patient/family understanding of the health care situation 27- Presents information in a clear, professional manner, to patient's family 28- Evaluates patient's nursing care outcomes	Perfo	ormance Criteria:						
20-       Uses critical thinking strategies in decision-making, planning, and provision of care         21-       Demonstrates caring behavior towards patients and families         22-       Reports abnormal data and changes in patient condition         23-       modifies patient nursing care as indicated by the evaluation outcomes         24-       Performs nursing interventions         25-       Recognizes own limitations         26-       Assesses patient/family understanding of the health care situation         27-       Presents information in a clear, professional manner, to patient's family         28-       Evaluates patient's nursing care outcomes		Nursing Intervention and Outcome Evaluation	5	4	3	2	1	N/A
21-       Demonstrates caring behavior towards patients and families         22-       Reports abnormal data and changes in patient condition         23-       modifies patient nursing care as indicated by the evaluation outcomes         24-       Performs nursing interventions         25-       Recognizes own limitations         26-       Assesses patient/family understanding of the health care situation         27-       Presents information in a clear, professional manner, to patient's family         28-       Evaluates patient's nursing care outcomes	19-							
22-       Reports abnormal data and changes in patient condition         23-       modifies patient nursing care as indicated by the evaluation outcomes         24-       Performs nursing interventions         25-       Recognizes own limitations         Teaching, Teamwork and Leadership         26-       Assesses patient/family understanding of the health care situation         27-       Presents information in a clear, professional manner, to patient's family         28-       Evaluates patient's nursing care outcomes	20							
23- modifies patient nursing care as indicated by the evaluation outcomes  24- Performs nursing interventions  25- Recognizes own limitations  Teaching, Teamwork and Leadership  26- Assesses patient/family understanding of the health care situation  27- Presents information in a clear, professional manner, to patient's family  28- Evaluates patient's nursing care outcomes	20-							
24- Performs nursing interventions       1         25- Recognizes own limitations       1         Teaching, Teamwork and Leadership         26- Assesses patient/family understanding of the health care situation       1         27- Presents information in a clear, professional manner, to patient's family       1         28- Evaluates patient's nursing care outcomes       1		Uses critical thinking strategies in decision-making, planning, and provision of care						
25- Recognizes own limitations       Teaching, Teamwork and Leadership       26- Assesses patient/family understanding of the health care situation               27- Presents information in a clear, professional manner, to patient's family               28- Evaluates patient's nursing care outcomes	21-	Uses critical thinking strategies in decision-making, planning, and provision of care  Demonstrates caring behavior towards patients and families						
Teaching, Teamwork and Leadership  26- Assesses patient/family understanding of the health care situation  27- Presents information in a clear, professional manner, to patient's family  28- Evaluates patient's nursing care outcomes	21- 22-	Uses critical thinking strategies in decision-making, planning, and provision of care  Demonstrates caring behavior towards patients and families  Reports abnormal data and changes in patient condition  modifies patient nursing care as indicated by the evaluation outcomes						
26-       Assesses patient/family understanding of the health care situation         27-       Presents information in a clear, professional manner, to patient's family         28-       Evaluates patient's nursing care outcomes	21- 22- 23-	Uses critical thinking strategies in decision-making, planning, and provision of care  Demonstrates caring behavior towards patients and families  Reports abnormal data and changes in patient condition  modifies patient nursing care as indicated by the evaluation outcomes						
27-       Presents information in a clear, professional manner, to patient's family         28-       Evaluates patient's nursing care outcomes	21- 22- 23- 24-	Uses critical thinking strategies in decision-making, planning, and provision of care  Demonstrates caring behavior towards patients and families  Reports abnormal data and changes in patient condition  modifies patient nursing care as indicated by the evaluation outcomes  Performs nursing interventions						
28- Evaluates patient's nursing care outcomes	21- 22- 23- 24-	Uses critical thinking strategies in decision-making, planning, and provision of care  Demonstrates caring behavior towards patients and families  Reports abnormal data and changes in patient condition  modifies patient nursing care as indicated by the evaluation outcomes  Performs nursing interventions  Recognizes own limitations						
A •	21- 22- 23- 24- 25-	Uses critical thinking strategies in decision-making, planning, and provision of care  Demonstrates caring behavior towards patients and families  Reports abnormal data and changes in patient condition  modifies patient nursing care as indicated by the evaluation outcomes  Performs nursing interventions  Recognizes own limitations  Teaching, Teamwork and Leadership						
29- Demonstrates control of emotion despites stressful situation	21- 22- 23- 24- 25-	Uses critical thinking strategies in decision-making, planning, and provision of care  Demonstrates caring behavior towards patients and families  Reports abnormal data and changes in patient condition  modifies patient nursing care as indicated by the evaluation outcomes  Performs nursing interventions  Recognizes own limitations  Teaching, Teamwork and Leadership  Assesses patient/family understanding of the health care situation						
	21- 22- 23- 24- 25- 26- 27-	Uses critical thinking strategies in decision-making, planning, and provision of care  Demonstrates caring behavior towards patients and families  Reports abnormal data and changes in patient condition  modifies patient nursing care as indicated by the evaluation outcomes  Performs nursing interventions  Recognizes own limitations  Teaching, Teamwork and Leadership  Assesses patient/family understanding of the health care situation  Presents information in a clear, professional manner, to patient's family						

30-	Demonstrates flexibility in adapting to changing situations						
4. Co	mpetency: Adheres to principles of safety and infection control (Medication/procedures/inte	rver	ntior				
	Perform Safe Practice	5	4	3	2	1	N/A
31-	Checks for patient ID and correct procedures at all times						
32-	Uses universal/standard precautions (washing hands, wearing appropriate personal						
	protective equipment, avoiding needle sticks)						
33-	Maintains an environment free from hazards						
34-	Performs appropriate assessments prior to, during, and after Medication administration &						
	any nursing procedure						
35-	Obtains patient medication information including classification, indication, action,						
	dosage, side effects, interactions, and nursing implications						
36-	Calculates medication dosages and IV rates correctly						
37-	Follows correct procedures in preparing and administering medications						
38-	Administers medications according to hospital policy						
	mpetency: Communicates and collaborates effectively with colleagues, patients, and families	S					
Perfo	rmance Criteria:						
	Communication with Clients & with Other Health Care Professionals	5	4	3	2	1	N/A
39-	Adapts communication strategies based on patients' age, developmental level, disability,						
	and/or culture						
40-	Provides accurate information to patients, families, and the health care team—including						
	preceptor						
41-	Conveys mutual respect, trust, support, and appreciation for others						
42-	Collaborates with other health care team members regarding patient care needs						
	mpetency: Documents effectively	1		l			Į
0. 00	Performance Criteria:	5	4	3	2	1	N/A
43-	Uses appropriate terminology, spelling, and grammar in written communications		•			_	1 (/23
44-	Documents accurate, complete, and pertinent information in a timely manner						
45-	Completes documentation according to hospitals guidelines (format, timing,						
	abbreviations, etc) by using information technology
