

Name _____

Garden Pests and Problems: Plant Disease Hunt

Take a walk in the woods or in an open field. **Look** closely at the plants around you. Do you see any signs of plant diseases? Look for spots on leaves (fungus leaf spots), white fuzzy growth on leaves (mildew), or very wilted plants (root rot fungus). These sick plants are good examples of what plant diseases can do in your garden.

Describe what you found here.

Draw a picture here of what you saw.

How many different symptoms did you find? _____
