# PARTNER MANAGEMENT PLAN INSTRUCTIONS

## Gonorrhea or Chlamydial Infection: Partner Treatment

All partners should be treated as if they are infected.

The Washington State Department of Health strongly encourages providers to take responsibility to ensure partner treatment for heterosexuals, by examining and treating all patient's sex partners from the previous 60 days.

If an examination is **not** possible, providers should offer medication for all sex partners whom patients are able to contact. **Free medication is available for your patient's partner(s).**

To obtain **FREE medication** for your patient's partner(s), call or fax a prescription to one of the pharmacies participating in your area. For a **prescription FAX form** and list of participating pharmacies, see page 3 or call **Island County Health Department: 360-221-8482.**

**NOTE: Only participating pharmacies have stocks of FREE public health medication** to dispense to patients for their partner(s).

Island County Health Department may also be able to provide free medication to your patient to give to his or her partner(s), if resources permit.

Island County Health Department recommends you refer **all MSM patients** and **all patients with syphilis or newly diagnosed HIV** to the health department for help notifying partners to ensure that partners receive medication, the opportunity to test for HIV, syphilis, gonorrhea, and chlamydia, and evaluation for HIV Pre-Exposure Prophylaxis (PrEP). Please inform the patient that the health department will contact them to assist with partner notification.

Although the Health Department requests that you refer patients with these risks to us, we also ask that you make every effort to help patients assure that their partners are treated, either by seeing the partners yourself or by offering heterosexual patients free medication to give to their partners.

**Complete the partner management plan** on the Confidential Sexually Transmitted Disease Case Report FAX form to define a partner management plan.

For copies of this case report or questions on how to fill it out, call the Island County Health Department: 360-221-8482.

## Other STDs: Partner Treatment

All patients with infectious syphilis, chancroid, LGV or granuloma inguinale are routinely contacted by Island County Health Department. Patients diagnosed with genital herpes should be advised to notify their sex partners and should be informed that their partners should contact their provider for testing.

## RECOMMENDED REGIMENS FOR ANTIMICROBIALS LISTED ON CASE REPORTS\*

### GONORRHEA—UNCOMPLICATED

Ceftriaxone ..... 250 mg IM as a single dose..... **PLUS** Azithromycin 1g PO as a single dose

#### Alternatives:

Cefixime ..... 400 mg PO as a single dose..... **PLUS** Azithromycin 1g PO as a single dose **OR**

For beta-lactam allergic patients:

Azithromycin....2g PO as a single dose...**PLUS** Gentamicin 240mg IM as a single dose **OR** Gemifloxacin 320mg PO as a single dose

### CHLAMYDIA—UNCOMPLICATED

Azithromycin..... 1g PO as a single dose

**OR**

Doxycycline..... 100 mg PO BID for 7 days

#### Alternatives:

Erythromycin(base).....500 mg PO QID for 7 days **OR**

Ethylsuccinate.....800 mg PO QID for 7 days **OR**

Ofloxacin..... 300 mg PO BID for 7 days **OR**

Levofloxacin ..... 500 mg PO for 7 days

### SYPHILIS—PRIMARY, SECONDARY OR EARLY LATENT (<1 YEAR)

Benzathine penicillin G ..... 2.4 million units IM in a single dose

### SYPHILIS—LATE LATENT, LATENT OF UNKNOWN DURATION, TERTIARY (NOT NEUROSYPHILIS)

Benzathine penicillin G ..... 2.4 million units IM for 3 doses at 1 week intervals
