G. Are there other than psychological explanations of current behaviors/symptoms? (i.e. thyroid dysfunction, closed head injury, medications, poisoning, etc) Yes/No Explain: _____

H. List test(s) planned and time required. (*Note: time required for each test should include administration, scoring and interpretation and brief write-up. ValueOptions does not reimburse for lengthy reports; see Provider Manual for "Sample Psychological Testing Evaluation Form"*)

<u>Specific Test(s) Planned</u>	<u>Hours required</u>
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
Total Time Required:	

Note: See ValueOptions Provider Manual for complete testing guidelines/criteria. Following are two guidelines that have frequent relevance:

1. Testing regarding basic intellectual, cognitive, academic, developmental, psycho-motor and visual-motor functioning is usually considered educational. Testing that is partially or primarily for educational purposes is not a covered benefit. (This disqualifier may be subject to account specific arrangements.)
2. The expectation is that the diagnosis of ADHD can in most instances be made on the basis of DSM-IV-TR criteria alone and such diagnosis does not necessarily require psychological testing. Extended testing for ADHD is not authorized prior to a thorough evaluation with rating scales. (Providers should usually first seek approval for a 90801 and a 90806 for rating scale review and feedback before requesting further ADHD testing. Provide clear explanation in Section C above why initial evaluation was insufficient to answer the ADHD referral questions.)
