This form identifies all test items on the Brockport Physical Fitness Test (BPFT). It can be used as a resource for developing a fitness test for a particular student, recording results, and matching results to fitness zones. The BPFT typically includes four to seven test items: one for aerobic functioning, one for body composition, and at least two for musculoskeletal functioning. (The Target Stretch Test items are considered as a single test for this purpose). It is recommended that an individualized specific test form for each student consisting only of the items taken on the test be subsequently developed for each student and be used for reporting results to students, parents, and guardians. The results may serve as a basis for developing individualized education programs (IEPs) for students.
