Instructor(s): Steve Guercia, Secondwind Water Systems

Agenda:

Learn what's in our drinking water, why it's there and what we do about it. Starting with an overview of how NH geology affects our water quality, the class will cover water quality concerns that commonly affect small public water supplies, including corrosion, metals, hardness, odor, arsenic, fluoride, uranium, radium, radon and bacteria. The treatment technologies appropriate for small public water supplies will then be explained, including the pros/cons and major considerations for each as well as their application to common NH water quality issues.
