

## Self Evaluation and Improvement Plan

Due Date: January 31, 2014

Reflect on the Advanced Math topics that we covered during the first semester. Use your notes, tests, quizzes, textbook etc. to remind yourself of the details of the topics.

This evaluation is to be written as an essay in at least 3 paragraphs using proper grammar and spelling. Evaluation may be typed or written neatly (no torn edges) on a separate piece of paper. Most importantly, I want you to be honest!! If you are not sure how to evaluate yourself or how to go about improving, please see me. This Self Evaluation and Improvement Plan will be counted as a graded assignment.

1. Comment on the topics we studied first semester and your understanding of these topics. Possible questions that might help you reflect: What did you know very well? What did you know so-so? What was new? What was review?
2. Reflect on your grade for the first semester. Were you happy/disappointed with it? Does it reflect the effort you put into the class? Does the grade reflect what you know? Does the grade make sense to you?
3. Devise an improvement plan for semester 2. Consider the following questions in writing your improvement plan:
  - What are you going to do to help improve your grade?
  - What are you going to do to help improve your understanding and ability to demonstrate your mastery of topics?

Name: \_\_\_\_\_

Due Date: \_\_\_\_\_

### Self Evaluation and Improvement Plan

Objectives	 Did not meet	 Good	 Excellent
Has a minimum of 3 paragraphs			
Uses proper grammar and spelling			
Comments on topics studied 1 <sup>st</sup> semester			
Comments on understanding of topics			
Reflects on grade for marking period			
Creates improvement plan that is realistic.			
Typed or written on separate piece of paper.			
Handed in on time			

Additional comments: _____ _____ _____ _____	Overall Grade:
