

# Training Course Details

## JOB HAZARD ANALYSIS

### Before the course

No prior knowledge about the subject is mandatory. However, basic industrial work experience in the field where such activities are carried out is desirable.

### Who'll benefit?

This course is for anyone involved in operations and maintenance that needs to know how to perform JSAs of new or existing tasks. In addition, full-time safety practitioners, safety committee members, safety coordinators, safety specialists, human resources, safety managers, loss control managers, and operations managers can benefit from this course

### What you'll learn?

In this course, you will learn the basics of the performing a Job Safety Analysis (JSA), which is a proven process for controlling operating hazards and costs. You will get a step-by-step overview of the process, and define your role in making it effective. Through lecture, demonstrations, and workshops, you'll learn how to develop and manage a JSA program in your workplace. You'll also learn how to enlist participation from line employees, supervisors, and upper management. The result: Better processes make a safer workplace - and that means improved production and higher profits.

### Program

- Overview of JSA: - Understanding JSAs and when to do them - JSA terminology
- Understanding JSA's relation to continuous improvement in your organization
- Identify the key requirements for a successful JSA
- Recognize the hazards inherent in task performance.
- Develop appropriate solutions and hazard controls
- Example management system
- Workshop: Complete a JSA for example at your site (or using standard examples in course) to reduce personal injuries and operating costs (repeated 2 or 3 times, as time permits)

### Assessment

Theory 60%  
Practical 40%

### Refresher training requirement

Once every 3 years.

## REGISTRATION DETAILS

### Tutor

Dr Amit Pamnani

### Dates

### Durations

1 days
