ENERGY STAR® Certified SuperFlo VS and SuperMax VS pumps from Pentair meet strict energy efficiency criteria set by the U.S. Environmental Protection Agency and the U.S. Department of Energy. These pumps save money, reduce energy use and protect the environment.

EFFICIENT, quiet, rugged pumps—the superior “drop-in” replacements for a Super Pump®.

Our standard SuperFlo and SuperMax pumps, along with our NEW SuperFlo VS and SuperMax VS pumps, move water more efficiently for lower operating cost and super-quiet operation. With a multitude of options — ½ HP-2½ HP, single- and two-speed and new variable speed models — there's a perfect match for virtually every application. And with Pentair's new affordable SuperFlo VS and SuperMax VS pumps, energy costs can be slashed by up to 80%¹ for standard pools. Best of all, these pumps slip right into the same slot as the Super Pump*, delivering superior performance for a true upgrade by every important measure.

*Super Pump® is a registered trademark of Hayward Industries, Inc.

¹Savings based on variable speed pump compared to a single-speed pump running 12 hours per day at an average of \$0.16 per kWh in a 20,000 gallon pool. Actual savings may vary based on local utility rates, pool size, pump run time, pump horsepower, pump rpm, plumbing size and length, pump model, service factor and other hydraulic factors.

SUPERIOR sand filtration for your customers

Sand Dollar and Cristal-Flo II filters feature special internal designs to ensure even distribution of water flow. This helps keep the sand bed level for consistent performance and results in the most efficient filtration possible. The increased dirt-loading capacity of these filters translates into extended time between cleanings, less routine maintenance and greater leisure time enjoyment for your customers.
