

Denim Shirts

Thread and zip recommendations for denim shirts

Coats is the world's largest sewing thread manufacturer. Over the past 250 years Coats has built a reputation as a company that delivers high quality sewing threads in a huge range of substrates, sizes and colours to meet all of your sewing requirements.

Alternative thread types may be used depending on required final quality. The thread size will determine the choice of needle size.

Coats threads & zips

Coats offer an extensive variety of threads and zips for denim shirts. Please see our [thread recommendations](#) and [zip recommendations](#) below.

Premium Woven Casual Soft Wash

Coats industrial sewing threads are available in a range of fibre types and finishes, each designed to meet particular customer needs. Please see this comprehensive range below or, if there are further thread options available, please select an option from the dropdown menu.

Additional Information

The sewing thread recommendations laid out above are intended as a guide to aid the construction of garments with good quality seams. As garments of the same generic type differ in terms of fabric substrate and construction, and both making up methods and post make up processing can greatly vary, these recommendations should be viewed as a good starting point for thread selection.

Garment specific recommendations for thread and needle selection as well as accurate thread consumption figures and onsite technical support can be obtained by contacting your local Coats' office.

These recommendations and consumption figures are intended as a guide only and are given in good faith but without warranty or liability on the company or its employees.
