Instructions:

This IT checklist, with appropriate signatures, must be completed for <u>Information Technology</u> (IT) acquisitions within the Department of Commerce (DOC). It represents a list of important or relevant actions (steps) that must be taken to ensure that security considerations are incorporated into IT acquisitions. *Note: Completion of this checklist is not required for the acquisition of equipment for specialized Research and Development (R&D) or scientific purposes that are not a National Security System.*

In completing the checklist, you can assume that if the answer to a question does not redirect you to a new question further down the checklist, you should proceed to the next question until you obtain the final concurrence signatures. Each checklist question should be addressed in coordination with the Acquisition team including: the Procurement Requestor from the program office, the Procurement Contracting Officer Representative (COR), Operating Unit Approved Program/ Requesting Office IT Security Officer, and Acquisition Contracting Official (CO).

Background:

This checklist was developed to ensure that the acquisition of IT resources complies with Federal and DOC information security policy requirements and to provide a means for COs to document compliance.

	System(s): [Provide full name of system(s) and any corresponding acronym(s)]	Date:
		Duto.
	Procurement Description: [Provide 1-2 sentences on what the IT acquisition is for]	
1	Does this acquisition involve a hardware or software product purchase?	
		Yes 🗌 No 🗌
	If the answer is No, proceed to question 2.	
	If the answer is Yes, include appropriate clauses into the solicitation and contract to ensure this	
	acquisition meets the following:	
	DOC IT Security Program Policy ITSPP media sanitization requirements (MP-6)	
	• FAR 39.101(d) regulations involving NIST common security configuration checklists including	
	Federal Desktop Core Configuration (FDCC) or United States Government Configuration	
	Baseline (USGCB) initiative	
	Personal identity verification requirements from <u>FAR 4.1302</u> and FIPS PUB 201 [in	
	accordance with Homeland Security Presidential Directive (HSPD-12)]	
	• FAR part 11.002 requirements which state that unless the agency Chief Information Officer	
	waives the requirement, when acquiring information technology using Internet Protocol, the requirements documents must include reference to the appropriate technical capabilities	
	defined in the USGv6 Profile (NIST Special Publication (SP) 500-267) and the	
	corresponding declarations of conformance defined in the USGv6 Test Program. To meet	
	this requirement each DOC acquisition of IP protocol technology must express requirements	
	for IPv6 capabilities in terms of the USGv6 Profile (i.e., using the USGV6 Capabilities Check	
	List) and vendors must be required to document their product's support of the requested	
	capabilities through the USGv6 test program (reference <u>http://www.antd.nist.gov/usgv6/</u>)	
	using the USGv6 Suppliers Declaration of Conformity.	
	Proceed to question 2.	
	•	

		1
2	Will any personnel involved in this acquisition perform a function/role that requires access to a system(s) that processes non-public or sensitive DOC data? For example, requiring a DOC e-mail account, system administrator access to a DOC system, vendor installation/maintenance, or contractor personnel operating system(s) that process DOC data.	Yes 🗌 No 🗌
	If the answer is No, proceed to question 3. If the answer is Yes, Contracting Officials should work with the COR to incorporate contract language from Commerce Acquisition Regulation (CAR) Final Rule 48 CFR 13, specifically:	
	 Determine and document contract risk using the <u>Commerce Acquisition Manual 1337.70</u>. Insert the appropriate clauses into the contract based on risk level. Select from the following Security Processing Requirements: High or Moderate Risk Contracts 48 CFR Ch. 13 1352.237.70 Low Risk Contracts 48 CFR Ch. 13 1352.237.71 National Security Contracts 48 CFR Ch. 13 1352.237.72 Foreign National Visitor and Guest Access to Departmental Resources Determine and document appropriate FISMA requirements to be met in the contract, and assist in the coordination with DOC Office of Security (OSY) for personnel screenings, see Chapter 11 Investigative Processing, of the Manual of Security Policies and Procedures, and the IT Security Office involving <u>DOC ITSPP</u> requirements for a Security Assessment & Authorization (A&A). Take appropriate action, in consultation with the COR, OSY, and DOC Office of General Counsel, regarding the personnel screening forms. Determine the appropriate clauses from FAR <u>1352.239-72</u> Security Requirements for <u>Information Technology Resources</u> into the solicitation and contract to ensure that the requirements, such as annual IT security awareness training, are enforceable on contract personnel. Take appropriate action, in consultation with your Privacy Officer, to ensure that the services, systems, and/or products being procured comply with existing privacy laws and policies regarding protection, maintenance, dissemination and disclosure of information. In consultation with the Contracting Officer, make sure FAR and all other applicable clauses protecting personal privacy interests are included (e.g., 48 CFR 24.104).	
	Proceed to question 3.	
3	Will this acquisition involve Government property located at an off-site contractor-controlled facility that will be used for transmitting, processing, and storing DOC data? If the answer is No, proceed to question 4. If the answer is Yes, include FAR 1352.239-72, Security Requirements for Information Technology Resources, into the solicitation and contract. Initiate the appropriate Security Assessment & Authorization (A&A) of the contractor system(s) involved and include clauses to ensure this acquisition meets DOC ITSPP security requirements for transmitting, processing, and storing data. Proceed to question 4.	Yes 🗌 No 🗌
4	Will this acquisition involve a service level agreement? For example, contractor maintenance on DOC system hardware or software, Software as a Service (SaaS), i.e., Cloud Computing, or External Data Storage or Contingency Emergency Back-up facility. If the answer is No, proceed to question 5. If the answer is Yes, initiate appropriate Security Assessment and Authorization of the contractor system(s) involved and include clauses to ensure this acquisition meets DOC ITSPP security requirements for transmitting, processing, and storing data, NIST SP 800-37 Revision 1: Guide for Applying the Risk Management Framework to Federal Information Systems: A Security Life Cycle	Yes 🗌 No 🗍
	Approach (<u>sp800-37-rev1-final.pdf</u>) and SP 800-64 Revision 2, Security Considerations in the	

Information System Development Life Cycle (SP800-64-Revision2.pdf) involving nondisclosure of information. Ensure that data portability, data breach notification, and data disposal are considered in the contract. Insert clauses from Commerce Acquisition Manual 1337.70 Section 3.3 IT Service Contracts, into the contract. Also, ensure FAR part 11.002 requirements cited on page 1, question 1 of this checklist are followed.	
Proceed to question 5.
