

and enclose with your Form K-120 the appropriate schedule to claim any of the following credits:

<b>Credit</b>	<b>Schedule Required</b>
Telecommunications Credit	K-36
Child Day Care Assistance Credit	K-56
Small Employer Health Insurance Contribution Credit	K-57
Community Service Contribution Credit	K-60
Habitat Management Credit	K-63
Single City Port Authority Credit	K-76
Farm Net Operating Loss	K-139F

**Line 23-- Total Refundable Credits:** Add lines 16 through 22 and enter the total on line 23. Enter this amount on line 29, page 2 of Form K-120.

#### **PART II—ADDITIONAL INFORMATION**

All corporations must answer all questions in Part II.

#### **PART III—AFFILIATED CORPORATIONS DOING BUSINESS IN KANSAS**

Every corporation must complete the information required in this section for every affiliated corporation which is doing business in Kansas. If additional space is needed, please enclose a schedule with your return.

#### **PART IV—SCHEDULE OF TAXES**

Every corporation must complete this section in order for the Department of Revenue to verify the amount of taxes to be added back on line 3 of the return. If taxes are included elsewhere in the federal return, you must complete a schedule and enclose it with the Kansas return.

#### **PART V—SCHEDULE OF INTEREST INCOME**

Every corporation must complete this section if they are claiming a modification for interest income on United States obligations on line 7, page 1 of Form K-120.

## **SPECIFIC INSTRUCTIONS FOR FORM K-120AS**

You must complete and enclose Parts VI, VII, & VIII, of Form K-120AS with your Kansas return if the corporation is doing business within and outside of Kansas and utilizing the apportionment formula to determine Kansas income.

#### **PART VI—APPORTIONMENT FORMULA**

Part VI is to be used by corporations which derive income from sources both within and without Kansas for the purpose of allocating and apportioning income. All business income is apportionable to Kansas by one of the following methods:

The majority of corporations will multiply business income by a fraction, the numerator of which is the property factor plus the payroll factor plus the sales factor, and the denominator of which is three.

Railroads will multiply business income by a fraction, the numerator of which is the freight car miles in this state and the denominator of which is the freight car miles everywhere.

Interstate motor carriers will multiply business income by a fraction, the numerator of which is the total number of miles operated in this state and the denominator of which is the total number of miles operated everywhere.

A qualifying taxpayer may elect to multiply business income by a fraction, the numerator of which is the property factor plus the sales factor, and the denominator of which is two. A qualifying taxpayer is any taxpayer whose payroll factor for a taxable year exceeds 200% of the average of the property factor and the sales factor. For additional information relating to this method and to determine if you are qualified, you may review K.S.A. 79-3279 for additional information. If you are qualified to use this method, you are still required to complete the payroll information on Form K-120AS, PART VI, line B.

Single Factor Apportionment – all years beginning after 12/31/01, and at the election of the taxpayer made at the time of filing of the original return, the qualifying business income of any investment funds service corporation organized as a corporation or S corporation which maintains its primary headquarters and operations or is a branch facility that

employs at least 100 individuals on a full-time equivalent basis in this state and has any investment company fund shareholders resided in this state shall be apportioned to this state as provided in this subsection, as follows:

By multiplying the investment funds service corporation's qualifying business income from administration, distribution and management services provided to each investment company by a fraction, the numerator of which shall be the average of the number of shares owned by the investment company's fund shareholders resided in this state at the beginning of and at the end of the investment company's taxable year that ends with or within the investment funds service corporation's taxable year, and the denominator of which shall be the average of the number of shares owned by the investment company's fund shareholders everywhere at the beginning of and at the end of the investment company's taxable year that ends with or within the investment funds service corporation's taxable year.

Descriptions of each of the factors in the three-factor formula follow. The laws applicable to these factors are contained in K.S.A. 79-3280 through 79-3287. The applicable regulations are contained in K.A.R. 92-12-84 through 92-12-103. You may access these laws and regulations in the Kansas Department of Revenue's Policy Information Library at: [www.ksrevenue.org](http://www.ksrevenue.org)

**LINE A—Property Factor.** The property factor shall include all real and tangible personal property owned or rented and used during the income year to produce business income. Property used in connection with the production of nonbusiness income shall be excluded from the factor. Property shall be included in the property factor if it is actually used or is available for or capable of being used during the income year for the production of business income. Property used in the production of business income shall remain in the property factor until its permanent withdrawal is established by an identifiable event such as its sale or conversion to the production of nonbusiness income.

The numerator of the property factor shall include the average value of the taxpayer's real and tangible personal property owned

and used in Kansas during the income year for the production of income, plus the value of rented real and tangible personal property so used. Property owned by the taxpayer in transit between locations of the taxpayer shall be considered to be at the destination for purposes of the property factor. Property in transit between a buyer and seller which is included by a taxpayer in the denominator of its property factor in accordance with its regular accounting practices shall be included in the numerator according to the state of destination. The value of mobile or movable property, such as construction equipment, trucks and/or leased electronic equipment which are located within and without Kansas during the income year, shall be determined for purposes of the numerator of the factor on the basis of total time within Kansas during the income year. Property owned by the taxpayer shall be valued at its original cost. As a general rule, "original cost" is deemed to be the basis of the property for federal income tax purposes at the time of acquisition by the taxpayer and adjusted by subsequent capital additions or improvements thereto and partial disposition thereof, by reason of sale, exchange, abandonment, etc. Property rented by the taxpayer is valued at eight times the net annual rental rate. As a general rule, the average value of property owned by the taxpayer shall be determined by averaging the values at the beginning and ending of the income year. However, the Director of Taxation may require or allow averaging by monthly values if such method of averaging is required to properly reflect the average value of the taxpayer's property for the income year.

**LINE B—Payroll Factor.** The payroll factor shall include the total amount paid by the taxpayer for compensation during the tax period. The total amount "paid" to the employees is determined upon the basis of the taxpayer's accounting method. If the taxpayer has adopted the accrual method of accounting, all compensation properly accrued shall be deemed to have been paid. Notwithstanding the taxpayer's method of accounting, at the election of the taxpayer, compensation paid to employees may be included in the payroll factor by use of the cash method if the taxpayer is required to report such compensation under such method for unemployment compensation purposes. The term "compensation" means wages, salaries, commissions and any other form of remuneration paid to employees for personal services. Payments made to an independent contractor or any other person not properly classifiable as an employee are excluded. Only amounts paid directly to employees are included in the payroll factor. The compensation of any employee on account of activities which are connected with the production of nonbusiness income shall be excluded from the factor. The denominator of the payroll factor is the total compensation paid everywhere during the income year.

The numerator of the payroll factor is the total amount paid in Kansas during the income year by the taxpayer for compensation. Compensation is paid in Kansas if any one of the following tests, applied consecutively, are met: (a) The employee's service is performed entirely within Kansas; (b) The employee's service is performed both inside and outside of Kansas, but the service performed without this State is "incidental" to the employee's service in Kansas (the word "incidental" means any service which is temporary or transitory in nature, or which is rendered in connection with an isolated transaction); (c) If the employee's services are performed both inside and outside of Kansas, the employee's compensation will be attributed to Kansas if: (1) the employee's base of operations is in Kansas; or (2) there is no base of operations in any state in which some part of the service is performed, but the

place from which the service is directed or controlled is in Kansas; or (3) the base of operations or the place from which the service is directed or controlled is not in any state in which some part of the service is performed, but the employee's residence is in Kansas. The term "base of operation" is the place from where employees begin work and to which they customarily return in order to receive instructions from the taxpayer or communications from his customers or other persons, or to replenish stock or other materials, repair equipment, or perform any other functions necessary to the exercise of their trade or profession at some other point or points.

**LINE C—Sales Factor.** For purposes of the sales factor of the apportionment formula, the term "sales" means all gross receipts derived by the taxpayer from transactions and activity in the regular course of such trade or business. The following are rules for determining "sales" in various situations:

- In the case of a taxpayer engaged in manufacturing and selling or purchasing and reselling goods or products, "sales" includes all gross receipts from the sales of such goods or products (or other property of a kind which would properly be included in the inventory of the taxpayer if on hand at the close of the income year) held by the taxpayer primarily for sale to customers in the ordinary course of its trade or business. "Gross receipts" for this purpose means gross sales, less returns and allowances, and includes all interest income, service charges, carrying charges, or time-price differential charges incidental to such sales. Federal and state excise taxes (including sales taxes) shall be included as part of such receipts if such taxes are passed on to the buyer or included as part of the selling price of the product.
- In the case of cost plus fixed fee contracts, such as the operation of a government-owned plant for a fee, "sale" includes the entire reimbursed cost, plus the fee.
- In the case of a taxpayer engaged in providing services, such as the operation of an advertising agency, or the performance of equipment service contracts, or research and development contracts, "sales" includes the gross receipts from the performance of such services, including fees, commissions, and similar items.
- In the case of a taxpayer engaged in renting real or tangible property, "sales" includes the gross receipts from the rental, lease, or licensing the use of the property.
- In the case of a taxpayer engaged in the disposition of non-inventory assets and property used or purchased in the regular course of business, "sales" includes the capital gain or ordinary gain realized from such disposition. The term "sales" does not include the return of capital or recovery of basis with respect to non-inventory capital assets.
- In the case of a taxpayer engaged in the sale or redemption of investment securities, "sales" includes the interest or other income from such transactions. The term "sales" does not include the return of capital or the recovery of principal utilized to make such investments.

The numerator of the sales factor shall include gross receipts attributable to Kansas and derived by the taxpayer from transactions and activity in the regular course of its trade or business. All interest income, service charges, carrying charges, or time-priced differential charges incidental to such gross receipts shall be included regardless of the place where the accounting records

are maintained or the location of the contract or other evidence of indebtedness.

### Sale of Tangible Personal Property in this State

- Gross receipts from sales of tangible personal property (except sales to the United States Government) are in this state if:
  - the property is delivered or shipped to a purchaser within this state regardless of the f.o.b. point or other conditions of sale;
  - the property is shipped from an office, store, warehouse, factory, or other place of storage in this state and the taxpayer is not taxable in the state of the purchaser.
- Property shall be deemed to be delivered or shipped to a purchaser within this state if the recipient is located in this state, even though the property is ordered from outside this state.
- Property is delivered or shipped to a purchaser within this state if the shipment terminates in this state, even though the property is subsequently transferred by the purchaser to another state.
- The term “purchaser within this state” shall include the ultimate recipient of the property if the taxpayer in this state, at the designation of the purchaser, delivers to or has the property shipped to the ultimate recipient within this state.
- When property being shipped by a seller from the state of origin to a consignee in another state is diverted while enroute to a purchaser in this state, the sales are in this state.
- If a taxpayer whose salesman operates from an office located in this state makes a sale to a purchaser in another state in which the taxpayer is not taxable and the property is shipped directly by a third party to the purchaser, the following rules apply:
  - if the taxpayer is taxable in the state from which the third party ships the property, then the sale is in such state;
  - if the taxpayer is not taxable in the state from which the property is shipped, then the sale is in this state.

**Sales to the United States Government:** Gross receipts from the sales of tangible personal property to the United States Government are to be included in Kansas if the property is shipped from an office, store, warehouse, factory, or other place of storage in this state. Only sales for which the United States Government makes direct payment to the seller pursuant to the terms of its contract constitute sales to the United States Government. Thus, as a general rule, sales by a subcontractor to the prime contractor, the party to the contract with the United States Government, does not constitute sales to the United States Government.

**Sales Other Than Sales of Tangible Personal Property:** K.S.A. 79-3287 provides for the inclusion in the numerator of the sales factor of gross receipts from transactions other than sales of tangible personal property (including transactions with the United States Government). Under this section gross receipts are attributed to Kansas if the income-producing activity which gave rise to the receipts is performed within Kansas or if property producing the receipts is located within Kansas.

Gross receipts are attributed to Kansas if, with respect to a single item of income, the income-producing activity is performed within and without Kansas but the greater proportion of the income-producing activity is performed in Kansas, based on costs of performance. In cases where services are performed partly within and partly without Kansas, the services performed in each state will usually constitute a separate income-producing activity; in such case, the gross receipts for the performance of services attributable to Kansas shall be measured by the ratio which the time spent in performing such services in this state bears to the total time spent in performing such services everywhere. Time spent in performing services includes the amount of time expended in the performance of a contract or other obligation which gives rise to such gross receipts. Personal service not directly connected with the performance of the contract or other obligation, such as time expended in negotiating the contract, is excluded from the computation.

**LINE D(1)—TOTAL PERCENT.** If you are utilizing the three-factor formula to apportion income to Kansas, add lines A, B and C.

**LINE D(2)—TOTAL PERCENT.** If you are qualified and are utilizing the elective two-factor formula to apportion income to Kansas, add lines A and C.

**LINE E—AVERAGE PERCENT.** Divide line D(1) or D(2), whichever is applicable, by the number of factors used in the formula. For instance, if you are using the three-factor formula and the corporation does not have payroll anywhere, divide by 2.

### CONSISTENCY IN REPORTING

In completing Form K-120 and K-120AS, if, with respect to prior tax years and to filing other states' tax returns, the taxpayer departs from or modifies the manner in which income has been classified as business income from nonbusiness income, in valuing property or of excluding or including property in the property factor, in the treatment of compensation paid in the payroll factor, or in excluding or including gross receipts in the sales factor, the taxpayer shall disclose by separate enclosed schedule the nature and extent of the variance or modification. Only inconsistencies in the denominators of the property, payroll, and sales factors which materially affect the amount of business income apportioned to Kansas need to be disclosed. Inconsistencies in the determination of nonbusiness income and in the denominators of the factors due to a difference in state laws or regulations must be identified by that state's statute or regulation section number and shown on the separate schedule. The amount of each inconsistency by state is to be shown.

When a taxpayer makes sales of tangible personal property which are shipped from Kansas and assigned to a state in which the taxpayer does not file a return or report, the taxpayer shall identify the state to which the property is shipped, report the total amount of sales assigned to such state, and furnish the facts upon which the taxpayer relies as establishing jurisdiction to tax by such state.

### PART VII—ADDITIONAL INFORMATION

All corporations must answer all questions.

### PART VIII—AFFILIATED CORPORATION INFORMATION

All corporations must complete this section and indicate which of the affiliated corporations have property or payroll or sales in either the “total company” factors or the “within Kansas” factors of the apportionment formula on Part VI of the return.
