Content

INSPIRATION® is a software program that integrates dynamic diagramming and outlining environments to help you organize ideas and information. Easily create and modify concept maps, webs and other graphical organizers using Inspiration's Diagram view. An intuitive interface keeps focus where it should be-on your ideas, not the drawing process. Inspiration's powerful Outline view makes it simple to prioritize and rearrange ideas to create clear, concise essays, reports and more. Use Inspiration in language arts, science or social studies lessons, or anytime your students need to structure research or work. Inspiration is extremely versatile and valuable for: *Brainstorming, Planning, Organizing, Outlining, Prewriting, Diagramming, Concept Mapping, and Webbing*. Whatever the task, Inspiration inspires students to tap their creativity and organize their thoughts. During this workshop, participants will use the power of visual learning to address curriculum standards and will create their own lesson plans and templates to share with their class.

Participants

Regular or special education teachers, therapists, program support teachers, case managers, school psychologists, directors of special education/pupil personnel, guidance counselors, and principals.

Presenter

Marcia Wittrock is a CESA 8 Program Support Teacher, a Special Learning Disabilities Teacher, a trainer for "Framework for Poverty and the IEP process", and the Wisconsin State Parent Support Initiative Coordinator for CESA 8.
