"I have been looking for a suitable software to manage the multiple aspects of the real estate business. From 'Go Connect' to 'Relay' most have been incomplete or unmanageably cumbersome - enter Evernote. From the preliminary intro class, I have been introduced to a system that is capable of handling all aspects of the real estate business and much more. I will definitely be signing up for the Buyers/Sellers Sessions on Evernote. I know there is a lot more this App can do... can't wait!"
