#### ARRIVAL PAPERWORK FOR NEW RESEARCH STAFF

Welcome to Evanston. The enclosed information is designed to assist you in getting acquainted with Evanston and Northwestern University. Also enclosed are various forms to be filled out and returned to the Chemistry Department upon your arrival.

You must meet with a department representative (Tech K148), or another delegate of the Chemistry Department immediately upon arrival to complete any paperwork that you have not completed previously. You will find the necessary forms that are required in the pages below, and it is strongly advised that you complete these prior to your meeting.

## Foreign Nationals - International Office Check in required:

All foreign nationals must register with the International Office upon arrival. This requirement must be completed within 48 hours of your arrival. Take all documents with you, i.e. your visa, passport, etc. Please check in with the International Office prior to checking in with the department.

## Forms that must be completed:

Listed below are the various forms that you must complete. All original forms that are completed, and signed, should be returned to the Chemistry Department.

- 1. **Online Chemistry Department Data Form** This is an internal form. Please fill out this form as completely as possible, including the person to contact in case of an emergency. If you do not know your local address, phone or social security number, please give us this information as soon as you receive it.
- 2. **Personal Data Form** Please complete this form as much as you are able. This form will be sent to the payroll department.
- 3. **Direct Deposit Form** All salary is directly deposited to your banking account. If you do not have this information, please keep this form and complete it as soon as possible. If you do not complete this form, your salary will be paid in the form of a debit card.
- **4. Patent Form** Please read and sign a copy of the Northwestern University Patent Policy. This form will be retained in your file.
- **5. Agreement to Obtain and Maintain Health Insurance** This form indicates your agreement to obtain and maintain health insurance that meets or exceeds the Office of Risk Management's requirements.

## **Information about your Employee ID and NetID:**

You will receive your employee ID and Net ID approximately two weeks after your check in with our office. The department representative will email the information to you. Within the

email, you will need to follow the instructions to activate your NetID and obtain your new Northwestern email.

#### Mailboxes:

Shortly after your arrival, a mailbox will be made for you in the Chemistry mailroom (Tech K146).

## Payroll/Paychecks:

If you are a foreign national, you will need to register through FNIS. You will be contacted by someone in the payroll department instructing you in how to download various forms. You are to complete these forms and bring them to the Payroll Office at 720 University Place. This must be done if you want to have the correct processing of your payroll. For permanent residents and citizens, you will need to complete a W-4 (Illinois and Federal.) These forms can be found here: <a href="http://www.northwestern.edu/hr/payroll/Il-w4.pdf">http://www.northwestern.edu/hr/payroll/Il-w4.pdf</a> and here:

http://www.northwestern.edu/hr/payroll/fed-w4.pdf. Please drop these off to payroll upon your arrival. Alternatively, you may send them via campus mail.

## **Social Security Cards and Numbers:**

To receive your pay you must show Payroll that you have a Social Security card. If you have applied for a card, ask the Social Security Office representative for a letter to the department/payroll.

The local Social Security Office is located at 2116 Green Bay Road in Evanston. You may complete the social security form found here: <a href="http://www.ssa.gov/ssnumber/ss5.htm">http://www.ssa.gov/ssnumber/ss5.htm</a>.

You cannot apply for a social security card until you have been here for 10 days.

#### WildCARD:

The Northwestern University ID card cannot be issued until you have your employee ID. Once you have your ID, please obtain this card from the card office located in the Norris Student Center. The card office is located in the basement. **Please ask for an Indala Wildcard.** 

## **Benefits - Health Insurance/Risk Management:**

You must be covered by health insurance during your stay at the university. Please go to <a href="http://www.northwestern.edu/hr/benefits/">http://www.northwestern.edu/hr/benefits/</a> and review the information. All questions regarding benefits should be directed to one of the representatives at the benefit's office, located at 720 University Place.

If you are an unpaid visiting scholar, you must obtain Visiting Scholar Health Insurance. Please activate your card as soon as it is received. You or your professor/principal investigator will pay

for the insurance, depending upon your agreement. If you are responsible for payment, please make sure you pay your premiums upon your arrival, or shortly thereafter.

## Parking:

Postdoctoral Fellows are eligible for parking privileges. The Parking Office is located at 1819 Hinman Avenue. The cost will be deducted from your paycheck. If you need a temporary pass before the issuance of your employee ID, please let the department representative know immediately. You will be provided with a letter requesting a temporary pass.

## **Photocopies:**

There is a photocopy machine in the chemistry student mailroom (Tech K146).

## Name/Address Change:

If you change your name or relocate during your appointment at NU, you must notify both the department and the university.

Responsible University Official: Associate

Vice President, Innovation and New

Ventures

**Responsible Office:** Innovation and New

Ventures Office

**Origination Date:** September 30, 1974

## UNIVERSITY PATENT AND INVENTION

## **Policy Statement**

Any Invention or Discovery by an Individual who:

- (1) made the Invention or Discovery within the normal field of his or her employment responsibility and activity with the University, or
- (2) makes use of Northwestern University Resources,

is subject to the conditions of the University Patent and Invention Policy. Fulfillment of element "(1)" of this paragraph is made without regard to location or salary source, and specifically includes Individuals employed at affiliated hospitals and institutions.

## Reason for Policy/Purpose

The purpose of this policy is to:

- 1. define what Inventions, Discoveries, and Tangible Research Property (TRP) are subject to this policy;
- 2. define ownership rights to Inventions, Discoveries, and TRP subject to this policy;
- 3. stimulate the timely disclosure of Inventions and Discoveries to the Innovation and New Ventures Office (INVO);
- 4. describe basic principles of the patenting and technology-transfer responsibilities delegated to INVO; and
- 5. describe how proceeds from licensed Inventions, Discoveries, and TRP are distributed.

## **Who Approved This Policy**

**Provost** 

Vice President for Research

## Who Needs to Know This Policy

All members of the Northwestern University Community need to know this policy. Acceptance of this policy is a condition of employment or enrollment.

## **Website Address for this Policy**

http://www.invo.northwestern.edu/policies/patent-invention-policy

## **Contacts**

If you have any questions on the policy or procedure for the University Patent and Invention Policy, you may:

- 1. Call the Innovation and New Ventures Office at 847-467-2097, or
- 2. Send an e-mail to invo@northwestern.edu

## **Definitions**

Bayh-Dole: U.S. legislation found at 35 U.S.C. §§ 200-212

pertaining to the reporting, ownership, patenting and licensing of Inventions or Discoveries made under Federally Sponsored Research Agreements.

Discovery: One or more facts or conditions describing nature

that may or may not be patentable under the patent laws of the U.S. or a foreign jurisdiction.

Federally Sponsored Any grant or contract to conduct research or

Research Agreement: development at Northwestern University wherein

the source of the funds is the U.S. Federal

Government.

Individual: One or more members of the Northwestern

University Community.

Innovation and New

Ventures Office (INVO):

The Northwestern University Office responsible

for patenting and technology-transfer of

Inventions, Discoveries, and Tangible Research

Property subject to this policy.

Invention: A machine, method, manufacture, composition of

matter, or design that may or may not be

patentable under the patent laws of the U.S. or a

foreign jurisdiction.

Inventor: An Individual that made an Invention or

Discovery, or created Tangible Research Property,

subject to this policy.

Northwestern University

Community:

The Northwestern University Community includes: (1) all full-time and part-time faculty;

(2) all non-faculty employees; (3) all students; (4)

all appointees or visitors funded by the

University; and (5) all appointees or visitors who

uses University facilities or materials in the

process of Invention or Discovery.

Northwestern University

Resources:

Northwestern University Resources includes

private or governmental funds administered by the

University; or the use of University space,

materials, or facilities. Northwestern University Resources does not include use of the library.

Tangible Research

Property (TRP):

Tangible Research Property includes, but is not limited to, materials, computer software, computer

databases, prototype devices or equipment, engineering designs or drawings, integrated computer chips, audiovisual works, antibodies, genetically modified animals, and cell lines.

## **Policy/Procedures**

#### **Preamble**

Patentable inventions or discoveries may result from research or educational activities performed by members of the academic community. Northwestern University is committed to disclose and utilize ideas and discoveries for the greatest possible public good; to protect the rights of the University faculty, staff, and student body, as well as those of the institution itself; and to abide by the regulations of agencies providing funds for sponsored programs.

## **Applicability**

Any invention or discovery by an individual who (1) made the invention or discovery within the normal field of his or her employment responsibility and activity with the University, without regard to location or salary source (specifically including individuals employed at affiliated hospitals and institutions), or (2) makes use of Northwestern University Resources, except library, shall be subject to the provisions of the University Patent and Invention Policy. Such an Individual is hereafter referred to as Inventor.

#### When to Disclose an Invention or Discovery

United States patent law permits the filing of a patent application within one year of publication; however, under foreign patent law, any public disclosure disqualifies the Invention or Discovery from patent protection. Therefore, to protect academic priority as well as commercial priority, any Inventor making any Invention or Discovery subject to this policy is encouraged to report it promptly in writing and in reasonable detail to the Innovation and New Ventures Office (INVO) via the University's disclosure web site preferably within 30 days of making the Invention or Discovery. Public disclosure of the research results may affect patent rights.

## Ownership of an Invention or Discovery

All Inventions or Discoveries to which this policy applies are owned by Northwestern University. The ownership rights to an Invention or Discovery are the exclusive property of the Inventor if the University has contributed nothing substantial or essential (as, for example, funds, space, materials, or facilities) to the conception or development of the Invention or Discovery, and the Invention or Discovery is outside the scope of the Inventor's normal field of employment responsibility and activity within the University. Where the University has entered into an agreement for a project sponsored by a government agency or private firm, the terms of that agreement will govern the disposition of patents and licenses.

Members of the Northwestern University Community may not assign, license or otherwise transfer rights in Inventions and Discoveries that are subject to this Patent and Invention Policy to any other party; on the contrary, only the University may do so. Members of the Northwestern University Community who enter into consulting or other agreements with parties outside of the University must ensure that such agreements contain no requirement to assign, license or otherwise transfer rights in any Inventions and Discoveries. For additional guidance

in these matters, refer to the University's Policy on Faculty Conflict of Commitment and Conflict of Interest or the Policy on Staff Conflict of Interest. The Inventor's dean or center director and the Innovation and New Ventures Office must be notified of any patents or Inventions arising from external consulting agreements.

Where there is disagreement among the Inventors, or the Inventors and the University, as to ownership rights or the retention of rights by the University, the Vice-President for Research or his/her designate shall review the case in consultation with the Office of the General Counsel and provide a recommendation to the Provost, with supporting rationale, for resolving the disagreement. Within thirty (30) days after the Provost issues his/her decision, appeals can be made to the President.

## Obtaining a Patent and Release of Intellectual Property Rights

Following disclosure of an Invention or Discovery to the University by the Inventor, the University makes reasonable efforts to determine the potential commercial use and patentability of the Invention or Discovery and seeks to make such contractual arrangements as may be appropriate for development of commercial use. When, in the judgment of the University, there appears to be sound basis for proceeding, the University will apply for a patent at no expense to the Inventor. The University owns the Invention and any patent obtained. The Inventor is expected to cooperate and participate in obtaining patent protection, including signatures on appropriate documents. If the Inventor consults with another patent counsel, he or she must bear all of the expense, realizing that final responsibility for prosecution rests with the University.

If the University does not file a patent application, the University will so notify the Inventor, preferably within ninety (90) days from full disclosure of the Discovery to the University, and the University will release its rights in the Invention or Discovery to the Inventor. The Inventor may elect to seek a patent or to continue prosecution at his or her own expense. If the University desires to terminate the application for a patent after initiating the application process, the University will so notify the Inventor, and the University will release its rights in the Invention or Discovery to the Inventor, subject to the Inventor's agreeing to reimburse the University for any costs incurred by the University in obtaining, maintaining, or marketing the patent before its release to the Inventor. Such reimbursement is payable from proceeds received by the Inventor from the Invention, whether by license, sale, or otherwise. If the Inventor declines to accept the patent, the University, at its discretion, may abandon the property at no cost to the Inventor.

#### **Inventions or Discoveries Arising from Sponsored Projects**

The intellectual property terms of all research agreements are governed by the following principles.

- 1. The Inventor is free to publish or present the results of a sponsored project, subject only to contractually agreed upon delays to permit the sponsor to review the proposed publication or presentation for the use of the sponsor's confidential information and the inclusion of patentable information.
- 2. In those cases where the University agrees to respect the proprietary nature of a sponsor's data disclosed to the University for certain limited purposes, all persons

- working on the project (faculty, staff, and students) are required to treat the sponsor's data as confidential.
- 3. Any Inventions, Discoveries, or patents arising from the sponsored project will be used in the public interest.
- 4. The University owns all Inventions and Discoveries made by Northwestern personnel arising from gifts or sponsored projects.
- 5. As outlined in section entitled "Proceeds from Inventions and Discoveries" below, the University and the Inventor share in the net income received from intellectual property developed under the agreement.

If the proposed contractual requirements of a sponsor are contrary to the University's Patent and Invention Policy and cannot be reasonably negotiated, the Vice President for Research, in consultation with the appropriate senior leadership, will determine whether to accept the proposed sponsorship.

Tangible Research Property (TRP) created by Inventors in the course of their research is owned by the University, except in certain cases of computer software, which will be decided on a case-by-case basis. TRP may be distributed for non-commercial research purposes to academic institutions or to companies. TRP also may be commercialized through license agreements, even though not protected by patent. Any revenue collected from the commercial license of TRP is distributed according to the provisions of section entitled "Proceeds from Inventions and Discoveries."

## Development, Marketing, and Licensing of an Invention or Discovery

A primary goal of the University's technology-transfer efforts is to bring to the public the Inventions and Discoveries owned by the University, using whatever means seem best to develop, market, and license or otherwise commercialize each Invention, consistent with the provisions of this policy. The University may enter into agreements with outside agents to assist in developing Inventions or Discoveries, in obtaining patents, or in promoting or manufacturing Inventions, provided that such agreements are consistent with this policy. If a particular Invention or Discovery becomes subject to such an agreement, the Inventor will be notified about the agreement and any terms governing the relationship between the outside agent and the University.

The University may enter into any licensing agreements deemed beneficial to the University, the Inventor, and the public in general, provided such agreements are not prohibited by a sponsor's rules or regulations. Any terms governing the relationship between the licensee and the University due to such licensing agreements are made in consultation with the Inventor. Per Bayh Dole, the University gives license priorities to startups.

As a general policy, the University does not sell or assign patent rights.

Agreements with companies may involve equity participation by the University and/or the Inventor. Equity includes stock, stock options, warrants, and other non-cash consideration. The University and the Inventor are responsible for negotiating their respective equity positions. Management of the University's equity share is the joint responsibility of the Vice President for Investments and the Vice-President for Research.

#### **Proceeds from Inventions and Discoveries**

If there is more than one Inventor, the applicable royalty percentage will be divided equitably among the Inventors. Their departments and schools or centers will also divide the applicable percentage equitably. The Vice-President for Research or his/her designate retains the right to review the distribution and mediate among the parties. For the avoidance of doubt, to the extent a difference exists between the Inventor(s) identified in the Invention disclosure and the Inventor(s) identified in any resulting patent application, the latter shall control.

The allocation formula recognizes all forms of cash payments, including royalties and various fees from licensing. After recoupment of legal costs, and subtraction of certain costs outlined below, a percentage of the proceeds that the University receives from the licensing of Inventions and Discoveries will be paid to the Inventor, the Inventor's department, and the Inventor's school or center, as specified below. The Vice-President for Research or his/her designate will oversee the distribution of such funds according to a plan developed in consultation with the Inventor and will provide an accounting to the Inventor and the Inventor's department and school or center on an annual basis.

A deduction of 20% to cover operating expenses incurred by INVO will be taken annually from the gross license revenue, with funds exceeding the annual INVO budget moving into a quasi-endowment earmarked for INVO operations, entrepreneurial activities, and research operations as determined by the Provost and vice-president for research. Income then remaining is the net income, which is distributed as set forth below.

To limit administrative costs, if the net income in any year is less than \$10,000, then no distribution will be made in that year to the schools, departments or centers; rather, such net income will be tracked until either (a) the dispersible net income (i.e., the net income summed over several years) exceeds \$10,000 or (b) five years passes, at which time a distribution will be made as set forth below.

So long as the cumulative net income (i.e., the net income from all years) is less than or equal to fifty million U.S. dollars (\$50,000,000), then the distribution will be allocated as follows:

- 1. Thirty three percent (33%) of the net income to the Inventor.
- 2. Seventeen percent (17%) of the net income to the department or departments in which the Inventor serves.
- 3. Seventeen percent (17%) of the net income to the school in which the Inventor serves.
- 4. Thirty three percent (33%) of the net income to the Central Administration.

When the cumulative net income exceeds fifty million U.S. dollars (\$50,000,000) but is less than or equal to five hundred million U.S. dollars (\$500,000,000), then any further distribution will be allocated as follows:

- 1. Thirty three percent (33%) of the net income to the Inventor.
- 2. Ten percent (10%) of the net income to the department or departments in which the Inventor serves.
- 3. Ten percent (10%) of the net income to the school in which the Inventor serves.
- 4. Forty seven (47%) of the net income to the Central Administration.

When the cumulative net income exceeds five hundred million U.S. dollars (\$500,000,000), then any further distribution will be allocated as follows:

- 1. Thirty three percent (33%) of the net income to the Inventor.
- 2. Five percent (5%) of the net income to the school in which the Inventor serves.
- 3. Sixty seven percent (62%) of the net income to the Central Administration.

If there is more than one Inventor, the applicable income will be divided equitably among the Inventors. If there is more than one school, department, or center in which the Inventor(s) serves, the applicable income will be distributed to the school, department or center that administered the academic year salary at the time of the disclosure. The University will review the proposed distribution plan, in light of the declarations of department, school and center affiliations declared at the time of Invention disclosure to the University as well as the sources of salary support at the time of disclosure. A priori, income will be split equally among all Inventors (unless otherwise stipulated on the disclosure form) and, where necessary, will be split among the departments, schools, or centers according to the source of salary support (unless otherwise stipulated on the disclosure form and agreed upon by all the affected unit heads). In the case of student Inventors, distributions to departments and schools will be split according to the source of salary support for the student at the time of disclosure. In cases where students receive no salary, distributions will go to the department and school that housed the student's work. When multiple disclosures are used to develop a single patent or license, then the income is split equally across the disclosures unless a different distribution is agreed upon by all those affected (Inventors, unit heads, etc.). In cases of dispute, the Vice-President for Research or his/her designate will mediate among the parties and, if necessary, propose a distribution plan for approval to the Provost. Distributions to Central Administration are invested on an endowment basis for strategic initiatives of high priority to Northwestern as allowed by the Bayh-Dole legislation.

If the Invention or Discovery is the result of sponsored research and the sponsor regulates the distribution of income, such specific regulations shall take precedence over University policy with respect to distribution of the license revenue.

With respect to any patent matter in which another institution or an outside agency shall share in the income derived from the patent rights, distribution of income shall be made first to the other institution according to agreed-upon terms, and then to the Inventor according to this Patent and Invention Policy.

In the case of Inventions made by undergraduate or graduate students at the University to fulfill class assignments, the University has the right to ownership rights in such Inventions that are:

- (i) conceived or developed with substantial or essential contributions of the University, such as, funds, space, materials, or facilities; or
- (ii) developed in the course of or pursuant to a sponsored research or other agreement the University has entered into with a third party; or
- (iii) created as a "work made for hire;" or

(iv) developed in collaboration with faculty members not responsible for teaching the class.

For purposes hereof, a "work made for hire" will include a work or Invention created by a student as part of his/her employment responsibilities owed to the University, or a work or Invention which the University has in writing commissioned the student to create for the University.

In the event students elect to develop or improve, as their class assignment, ideas or Discoveries that are assigned to the University, or that are otherwise subject to the Patent and Invention Policy, University shall assert ownership rights in those projects. The University does reserve the right to assert ownership rights, if the Invention is made as a class assignment and further pursued as an independent project using significant resources of the University and that of a faculty or staff advisor employed by the University.

Inventions voluntarily assigned to the University by students shall be owned by the University and are subject to the remaining provisions of the Patent and Invention Policy.

## HEALTH INSURANCE FOR RESEARCH STAFF WITH APPOINTMENTS IN THE CHEMISTRY DEPARTMENT, NORTHWESTERN UNIVERSITY

I understand that I must maintain health insurance for myself and my dependents while employed as a Postdoctoral Fellow, Research Associate or Visiting Scholar at Northwestern University.

I understand my health insurance plan must be through Northwestern University or approved by Northwestern University.

If I elect to obtain health insurance through Northwestern, I must:

- Sign up within 30 days to receive benefits
- Submit a copy of the completed and signed enrollment form to the Chemistry Department and
- Re-enroll in benefits on an annual basis

If I elect to obtain health insurance through an outside company, I must:

• I must supply a copy of my health insurance card and insurance coverage information to the Chemistry Department.

\*\*This insurance will be subject to approval by the Risk Management Department at Northwestern University.
