CMA Level II—Project Management & Root Cause Analysis

This course provides participants with the necessary problem-solving skills to address crucial issues confronted on a construction project. *The class will be led by an NCCER Certified Instructor currently working as an upper-level manager and can bring relevant knowledge, experience and examples for illustration and discussion.*

Course Topics: Interpersonal Skills, Issues and Resolutions, Safety, Continuous Improvement, Resource/Quality Control, Estimating/Cost Control, Scheduling, Construction Documents, Construction Planning. Additional certificate for Root Cause Analysis

Who Should Attend?

Project managers, estimators, schedulers, project engineers, project supervisors, and assistant project managers

Pre-requisite: Successful completion of Project Supervision (Level 1 CMA) or 80 or better on NCCER Foreman Assessment or approval and verification by company of supervisor level experience.

Length of course: approximately 18 weeks (Tuesday nights, 6-9 pm);

Next class begins Tuesday, January 25, 2011
