**38th Annual Symposium on
OBSTETRICS &
GYNECOLOGY**

Thursday & Friday
October 11-12, 2012

Eric P. Newman Education Center
Washington University Medical Center, St. Louis

Course Chair
Randall R. Odem, M.D.

Presented By
The Department of Obstetrics and Gynecology

Sponsored By
Washington University School of Medicine
Continuing Medical Education

Dear Colleague,

As Chair of the **38th Annual Symposium on Obstetrics and Gynecology**, it is my pleasure to personally invite you to this extremely relevant and informative meeting. The speakers for this year's symposium are gifted lecturers chosen to update the latest in clinical issues from all branches of obstetrics and gynecology. Focus will be paid to recent developments and applying these to your daily practice. This course will be useful to anyone that provides care to women. The medical center and surrounding area is beautiful in the fall. Bring your family and spend the weekend in St. Louis!

I am really excited about this year's course: it promises to be on target for the practicing physician! I am looking forward to seeing you in October.

Best regards,

Randall R. Odem, M.D.

Professor of Obstetrics and Gynecology

Director, Division of Reproductive Endocrinology and Infertility

LEARNING & PERFORMANCE OBJECTIVES

This course is designed for obstetricians and gynecologists, primary care physicians and other health care providers for women. The intended result of this activity is improvements in knowledge, performance and patient outcomes. After completion of this seminar the participant should be able to:

- Explain current approaches to intrauterine scarring, fertility sparing surgery and genetics for the gynecologist.
- Discuss issues related to the current management of common pediatric gynecologic issues, elective cesarean section, and minimally invasive surgery and the myomatous uterus.
- Discuss practical issues of fertility preservation and what the general obstetrician/gynecologist should know about male infertility and the new developments with cell free DNA testing.
- Explain and appropriately counsel patients on the long-term risk of infertility therapies, the current focus on annual exams and preventive care and the management of patients with prior major vaginal reconstructive surgery.
- Utilize evidence-based information to improve the management of labor and preeclampsia.
- Accurately describe the recent changes in what we know about endometrial cancer etiology, endometriosis and ovarian cancer.
- Discuss and improve management of pregnancy of undetermined location, adnexal masses and preconception care using an electronic health record.

GUEST FACULTY
