### **We Are What We Eat**

A young American doctor went to Guatemala to work. His patients came from all over the country. They were workers with families. Their children also came to the doctor.

The doctor saw that his older patients were very healthy. They lived a long life. But his younger patients were often sick. They had high blood pressure and heart problems. Some younger patients had diabetes, cancer or arthritis. Many of them were overweight.

#### Discussion Questions

Why were his older patients so healthy? Why were their children unhealthy? The doctor asked them about their food. The older people told him they liked to eat traditional foods, such as rice, vegetables and fish. The younger people said they didn't eat their parents' food. They liked to eat the same food as most Americans.

This doctor says what we eat is very important for our health. Do you agree?

### Discussion Topics
