

DS-160 visa form instructions

The DS-160 is an online non-immigrant visa form that replaces the DS156, 157 and 158 forms. It is an electronic form that submits your information directly through to the US Embassy when you submit the form.

There are lots of instructions and information on the website, along with help tips as you complete the form. Please read everything carefully as it's vital that you complete this form correctly, as once you submit the form, corrections cannot be made and this may mean that you aren't able to get your visa at your interview and may have to come in for another interview date.

DO NOT wait until the last minute to complete this form as you may encounter problems with your internet connection and with this being a new global visa application forms, there maybe some unforeseen issues with the form itself. Please keep trying to complete the form until you have been able to submit it.

TIPS:

- **Save often** – remember if you save and go back to the file you saved later, you must have the DS160 link open again when you click back on the file to continue
- Be thorough and specific
- Only use 'do not know' or 'does not apply', if true – NEVER leave any question blank
- Ensure photo meets standards
- Confirmation page should have a clearly printed bar code
- Make sure that you have your passport with you
- Make sure that you have your SEVIS number available (this is sent in a separate pdf form)

This form will time out after approximately 20 minutes. It is important, therefore, that you save the document and save often. There is a "SAVE" button at the end of each section; make sure that you press this before continuing onto a new section.

If you save the document and find that you have made a mistake, you will be able to bring up the saved document, correct the error and continue. If you have not saved the document, you will be required to complete the form from the beginning.

NB If you save a document several times in the same session it will be saved under the same name, however if you open a saved document and then save it again it will automatically rename the document. This is fine – simply ensure you make note of the most up to date version.

Saved files are data files and cannot be open independently of the US embassy website.

You are given only one attempt to successfully load a photograph. If that attempt fails, you may continue completing the DS-160. The confirmation sheet that you receive at the end will have an X in the box where the photograph should appear. This is fine. You should bring the confirmation sheet together with a photograph taken within the last 6 months. Detailed information on the photograph requirements is available from the Department of State website at http://travel.state.gov/visa/temp/info/info_1287.html

NOTE: If there is no activity for 20 minutes or more in the process of completing this online application, your session will expire and all entered data will be lost.

YOU MUST COMPLETE AND SUBMIT THIS FORM ELECTRONICALLY – PAPER COPIES (if you actually print out every page) WILL NOT BE ACCEPTED
