

HIV/AIDS Surveillance Biannual Statistics

Pinellas and Pasco Counties (Area 5)

January 2005

Florida's new AIDS cases climb 24 percent

Source: Gainesville Sun Newspaper at www.gainesville.com

FORT LAUDERDALE (2/18/05) : New cases of AIDS in Florida increased by a surprising 24 percent last year, making it the state's first real jump in more than a decade, health officials said.

Officials said they hope the spike in AIDS cases is only a temporary issue caused by a major campaign of HIV testing that found many new victims.

But some also fear a growing failure of drug cocktails, and an increase in patients who didn't know they were infected until they got sick, contributed to the increase.

In Broward County, AIDS cases went up 49 percent in 2004 compared to the year before, statistics released Wednesday showed. Miami-Dade County's AIDS cases increased 33 percent.

"Am I concerned? A couple years ago I might have said yes," said Lisa Agate, AIDS coordinator for the Broward County Health Department. "We have done a lot of testing. I think that's all catching up."

The exception was Palm Beach County, where AIDS cases were flat and HIV cases fell by 17 percent last year.

"The numbers went down, but it wasn't a good year," said Larry Leed, deputy director of the Comprehensive AIDS Program in Palm Beach County. HIV is still spreading among young adults, and

patients moving from out of state take up federal program grants, which have been flat, he said.

South Florida has been a center of HIV/AIDS for years. While AIDS cases steadily dropped since the early 1990s, new HIV cases began climbing again in 2001.

In 2003, the latest year for which national data are available, Miami-Dade County had the second-highest rate of AIDS cases per capita in the nation, behind New York City. Broward was fourth and Palm Beach sixth. Florida had the fourth-highest rate among states.

Still, Wednesday's statistics did provide some good news - new HIV cases dipped 3 percent. HIV causes AIDS, but patients can live for years without getting sick.

"We are seeing some patterns we don't like," said Thomas Liberti, AIDS director for the Florida Department of Health. "I would not feel so secure if we saw a big jump in HIV, too, but we didn't. I'm encouraged by that. We are going to be watching the trend closely in the next few months."

Note: During this same time period, in 2004, Pinellas County experienced a 21% increase in AIDS cases while Pasco County experienced a 41% increase in AIDS cases. The number of 2005 AIDS cases that will be reported this year will be watched very closely during this year to determine if a trend is in progress.

Duplicated HIV & AIDS Cases Deleted

Source: FL Division of Disease Control Surveillance Report: Jan 2005/Vol 244

The Florida Bureau of HIV/AIDS Surveillance Section participated in a national case de-duplication project in 2004 to determine the extent of case duplication between states through the end of 2001. Of the approximately 19,000 Florida records reviewed, 4,197 were determined to be duplicates because the case was diagnosed and reported in another state prior to being diagnosed in Florida. These cases have been deleted from Florida's database case registry. This has resulted in decreases throughout this report.

Pinellas & Pasco County also "lost" some duplicated "out of state" cases as a result of this study mentioned above. Of the 4,197 cases noted by the state health office, approximately 270 of those HIV/AIDS cases were deleted from the local Pinellas/Pasco HIV/AIDS database so current cumulative statistics in this newsletter will reflect those decreases.

As of March 22, 2005 the HIV/AIDS Surveillance office is currently completing a year-end chart review of HIV/AIDS cases that were diagnosed in the year 2004 in Pinellas and Pasco Counties. We contacted most major area health care providers and hospitals/clinics in the last several months and requested ICD-9 or billing information be sent to us to determine if all cases diagnosed in 2004, or earlier, were reported to the health department. The main purpose

for conducting this evaluation study is to ensure that every patient diagnosed with HIV/AIDS in Area 5 is reported and has access to HIV/AIDS treatments and services, including partner notification and follow-up services offered by the health department. The information is also used to compile local, state and national HIV/AIDS statistics, which are used to justify the need for continued funding of HIV/AIDS prevention programs and patient

care services for our state and local areas. The surveillance office is requesting your continued cooperation and assistance in helping us complete these periodic reviews when requested.

Just as reminder, throughout the year please remember to pick up the phone as soon as you get a positive diagnosis on any HIV test and call us at 727-824-6903. Thanks!

Special points of interest:

- Beth Sudduth will be on maternity leave during most of the upcoming summer months. Please be patient as our new office staff try to manage the surveillance office in her part-time/temporary absence. Thanks!!
- Call the HIV/AIDS surveillance office at 727-824-6903 if you have an HIV or AIDS case to report or if you need specific HIV/AIDS statistical information. Liza Ryan, Jonathan Suarez, Kaki Burmester, Danielle Kahl or myself are here to assist you with reporting and/or statistics you might need! If you're a health care provider in Pasco County and need to report an HIV or AIDS case please call our office or you can call Michael Wydotis at the Pasco CHD at 727-869-3900 (x173).

on each quarterly newsletter so that continuity of data can be maintained.

HIV/AIDS Surveillance Office
Pinellas County Health Department
205 Dr. M.L. King Street North
Disease Control, Room 3-148
St Petersburg, FL 33701

In addition to the staff that we already had as of the mailing of our last newsletter (Ms. Danielle Kahl, Liza Ryan and myself), there have been even more changes within our busy surveillance office that we wanted you to be aware of...

First of all, we wanted to welcome, and introduce you to, our newest data entry operator (i.e. Senior Word Processing Systems Operator), **Ms. Kaki Burmester**. She joined our staff on September 1, 2004 and has been trying to learn as much as she possibly can about surveillance and data entry in the 5 1/2 months that she has been with us. If you call our office you will most likely talk to her before you reach any of the other surveillance staff. Kaki had officially retired as the head of the Pinellas County Vital Statistics office a few years ago but decided that she missed the long hours of work and the endless amount of paperwork that goes along with it! All kidding aside, she is happy to be working with us and will try her best to help you with any questions you might have.

The next staff member we would like to welcome and introduce is **Mr. Jonathan Suarez**, who is our newest administrative assistant—and an extension of my right arm! Jon joined our staff on October 21, 2004 and he's been busy helping us coordinate and conduct our Year-End Review blitz ever since! Most of you have probably either already met him or talked with him in the past 5 months that he has been with us. He is currently a full time USF student, getting his Masters in Public Health, and he also has ambitions of furthering his educational career in medical school in hopefully another year. We are very lucky to have him!

Florida law requires cases of AIDS to be reported by anyone who diagnoses or treats a person with AIDS, with a \$500 fine per case for failure to report. NOTE: A person who tests positive for Human Immunodeficiency Virus (HIV) on or after July 1, 1997 is reportable. Confidentiality is guaranteed. Please send your completed HIV/AIDS case report in an envelope marked "CONFIDENTIAL" to:

BETH SUDDUTH, MPH
PINELLAS COUNTY HEALTH DEPARTMENT
205 DR. M.L. KING STREET NORTH
ST PETERSBURG, FL 33701
(727) 824-6903 ; SUNCOM 517-4403
FAX: (727) 820-4271
EMAIL: BETH_SUDDUTH@DOH.STATE.FL.US

If you need reporting forms, would like to have a brief HIV/AIDS Surveillance In-Service for your staff in your office, or would like to have your HIV/AIDS cases reviewed in your office, please call the above number and speak to Beth Sudduth, Liza Ryan, Jonathan Suarez, Kaki Burmester or Danielle Kahl.
