

SEPA B2B DIRECT DEBIT SCHEME ADVANCE MANDATE INFORMATION SERVICE IMPLEMENTATION GUIDELINES

Abstract	This document sets out the rules for implementing the Advance Mandate Information service included in Version 4.0 of the SEPA Business-to-Business Direct Debit Scheme Rulebook and based on Version 2009 of the payment mandate ISO 20022 XML message standards.

0.3 Purpose of Document

The aim of these Guidelines is to define the rules to be applied to the ISO 20022 XML message standards for the implementation of the SEPA Business-to-Business (B2B) Direct Debits Advance Mandate Information (AMI) Service.

1 INTRODUCTION

This document sets out the SEPA rules for implementing the ISO 20022 XML Payments Mandate message standards to cater for the SEPA Advance Mandate Information (AMI) Service. The SEPA B2B Direct Debit Scheme Rulebook defines data sets which are implemented in the relevant ISO 20022 XML message standard of which the following are covered:

SEPA Direct Debit Scheme Rulebook	ISO 20022 XML Message Standards
DS-14 <i>Creditor to Creditor Bank Advance Mandate Information – Initial Mandate</i>	Mandate Initiation Request (pain.009.001.01)
DS-15 <i>Inter-Bank Advance Mandate Information – Initial Mandate</i>	Mandate Initiation Request (pain.009.001.01)
DS-14 <i>Creditor to Creditor Bank Advance Mandate Information – Amended Mandate</i>	Mandate Amendment Request (pain.010.001.01)
DS-15 <i>Inter-Bank Advance Mandate Information – Amended Mandate</i>	Mandate Amendment Request (pain.010.001.01)
DS-16 <i>Inter-Bank Message for the Response on the Advance Mandate Information Request – Initial or Amended Mandate</i>	Mandate Acceptance Report (pain.012.001.01)
DS-16 <i>Customer to Bank Message for the Response on the Advance Mandate Information Request – Initial or Amended Mandate</i>	Mandate Acceptance Report (pain.012.001.01)

Within the optional SEPA AMI Service, the use of these ISO 20022 XML standards is mandatory between Creditor and Creditor Bank and between Creditor Bank and the Debtor Bank.

1.1 Coverage of the SEPA B2B e-Mandate Implementation Guidelines

The purpose of the SEPA B2B AMI Implementation Guidelines, hereafter referred to as the Guidelines, is to provide guidance on the use of the ISO 20022 XML Payments Mandate message standards as defined in the SEPA scheme rulebooks and supplemented by processing requirements for providing advance mandate information.

The Guidelines are fully aligned to the SEPA B2B AMI requirements as defined in the Rulebook and identify message elements needed for providing the SEPA Advance Mandate Information while recognising message elements that may be available for use in Additional Optional Services (AOS), as shown below.

Global ISO 20022 XML Message Standards			
Message elements from the ISO messages corresponding to Rulebook requirements	Message elements that are mandatory in the ISO messages or needed for Processing	Message elements from the ISO messages available for use by AOS within an EPC Governance framework	Message elements from ISO messages not applicable to SEPA
EPC Implementation Guidelines for SEPA B2B AMI subset, identifying elements <ul style="list-style-type: none"> - to be used as defined in ISO - to be used with SEPA usage rules (from or completing the Rulebook) 		To be developed and documented by AOS Communities	Not available for use in SEPA AMI service
SEPA B2B AMI			

Figure 1

These Guidelines define the SEPA B2B AMI Mandatory Subset² of the Global ISO 20022 XML standard that consists of message elements:

- required in the AMI Service as business requirements
- needed for processing by banks, clearing and settlement mechanisms and bank customers

Elements needed for specific national regulatory requirements are not considered in these guidelines. They have to be dealt with at national level without being regarded as an AOS.

These message elements define the **SEPA B2B AMI Service** and are denoted by yellow shading in the message structures given in the following chapters. Only these elements are further detailed with relevant SEPA B2B Direct Debit requirements, such as the use of the message element, its components or the values that must be used. Usage rules, for example, may indicate limits on the number of repetitions, or code value restrictions, while format rules may be used to indicate the allowable combinations of components of a message element.

These Guidelines also recognise message elements and the usage rules in the ISO 20022 XML standard that may be available for use in an AOS, subject to a governance framework to be defined by the EPC. The definition and documentation of these message elements are a matter for the AOS communities involved. These message elements are denoted by white shading.

Where there are message elements that do not apply to SEPA AMI Service, these are denoted with red shading in the right-most column of the message structures. To date, few such message elements have been identified.

² The SEPA B2B AMI subset is hereafter known as the SEPA B2B AMI Service.

1.2 Use of these Guidelines by the instructing and instructed parties³

- SEPA B2B AMI Service is executed using messages only containing message elements defined as part of the SEPA B2B AMI Subset (shaded yellow in Figure 2).
- AMI Service that include message elements that are defined and documented by AOS communities (shaded white in Figure 2) are considered as SEPA, but not as SEPA B2B AMI Service.
- It is the responsibility of the instructing customer and instructed bank of the message to ensure that message elements defined for use in an AOS are only included in messages sent to AOS community members.
- The instructed bank receiving a message containing AOS message elements, but which is not a member of this AOS community, may ignore the information, that is, not use it for processing, nor forward it to the next party in the chain. The instructed bank, however, may reject the message for this reason.

1.3 Notation Conventions

The Guidelines are presented in the format of the ISO 20022 XML standard.

Index	Mult	Message Element	SEPA B2B AMI Requirements
1	[1..1]	+ Transaction Information	
2	[1..1]	++ Payment Information Identification	
....			
n		++ Message Element that is not part of the SEPA B2B Direct Debit AMI Service but is available for use in a SEPA AOS	
n+1	[0..1]	++ Message Element that is a mandatory part of the SEPA B2B Direct Debit AMI Service	Mandatory
n+2	[0..1]	++ Message Element that is not to be used in SEPA B2B Direct Debit AMI Service	

Figure 2

Where:

- Column 1 indicates the message element Index number in the relating ISO 20022 Message Definition Report, PDF version.

Components and sub-components of message elements that are not allowed in SEPA B2B AMI Service or where no specific SEPA requirements are defined, in which case ISO rules apply, are not represented in full and therefore the Index numbers will have gaps.

³ Instructing and instructed parties include CSMs.

- Column 2 indicates the mandatory or optional status and the number of repetitions allowed in the ISO 20022 XML standard. When the first digit has the value ‘1’, the message element is mandatory; when the value is ‘0’ the message element is optional. The second digit indicates the number of repetitions allowed, where ‘n’ is used to indicate no specified limit.

Column 2 may also indicate conditional relationships between components of a message element, for example, either component 1 or component 2 must be present, but not both (indicated in the column 2 as ‘{Or’ and ‘Or}’).

- Column 3 gives the name of the message element as defined in the ISO 20022 XML standard. When an element contains sub-elements these are indented to the right and noted with a plus sign (+) per level.
- Column 4 specifies the requirements for the provision of the SEPA B2B AMI Service as additional rules to those specified in the ISO 20022 XML standards, as appropriate.
 - Where defined in the Rulebook, the attribute is indicated between parentheses by the attribute name and where applicable, the number, ie, (AT-*nn*) and such message elements are shaded yellow.
 - Where the message element relates to processing requirements, it is shaded yellow.
 - Where the message element specified in the ISO 20022 XML standard is used for the SEPA AMI Service without change (regarding its mandatory or optional status, number of repetitions, the definition and any usage rules), no specific SEPA B2B AMI requirements are provided and is shaded yellow.
 - In addition, for message elements with multiple occurrences in the ISO 20022 XML standard and shaded yellow in these Guidelines, and where a SEPA usage rule limits the number of occurrences, the remaining occurrences are available for use in an AOS.
 - Where the message element is specified in the ISO 20022 XML standard as optional, but is mandatory in SEPA B2B AMI requirements, this is specified as ‘Mandatory’ and is shaded yellow.
 - Where the message element is not available for use in the SEPA AMI service, this is indicated with red shading. Note that these message elements are similarly not available for use in an AOS.

1.4 Character Set

The character set issue centres on the use of the full set of characters in the message elements. Two considerations are:

- While banks and their customers must be allowed to use the character set currently in use at national level,
- Banks and their customers throughout SEPA cannot be required to support the full character set used in SEPA countries.

Therefore:

- The ISO 20022 XML messages allow for the full range of global language requirements (UTF-8)

- Banks and their customers must be able to support the Latin character set commonly used in international communication, as follows:

a b c d e f g h i j k l m n o p q r s t u v w x y z

A B C D E F G H I J K L M N O P Q R S T U V W X Y Z

0 1 2 3 4 5 6 7 8 9

/ - ? : () . , ' +

Space

However, there may be bilateral or multilateral agreements to support one or more sets of characters beyond the Latin character set referred to above.

1.5 General Message Element Specifications

1.5.1 BIC

The BIC used to identify financial institutions (Agents in the ISO 20022 XML standards) may be either BIC 11 or BIC 8.

1.5.2 Identifier of the Creditor (AT-02)

The Creditor is identified in the scheme by an identifier as defined below. In these Guidelines, this identifier is indicated in the ISO 20022 data element 'Creditor Scheme Identification'. The creditor can be a legal entity, or an association that is not a legal entity, or a person.

This identifier must be stable over time, to enable the Debtor and the Debtor Bank to come back to the Creditor for Refunds and complaints, and to check the existence of a valid Mandate at the presentation of Collections by the Creditor.

The Creditor identifier has the attributes defined in the Rulebook under AT 02.

The data element is case and space insensitive.

Format Rule:

- Positions 1 and 2 contain the ISO country code
- Positions 3 and 4 contain the check digits
- Positions 5 to 7 contain the Creditor Business Code. When the Creditor Business Code is not used, then the value is set to 'ZZZ'
- Positions 8 up to 35 contain the country-specific identifier
- Note: the calculation of the check digit requires the following preliminary steps:
 - Disregard positions 5 to 7
 - Take the country-specific part, positions 8 to 35, and delete all non-alphanumeric characters
 - Add the ISO country code and '00' to the right-hand end
 - Convert letters to digits in accordance with conversion table 1
 - Apply the check character system MOD 97-10 (see ISO 7064)

A = 10	G = 16	M = 22	S = 28	Y = 34
B = 11	H = 17	N = 23	T = 29	Z = 35
C = 12	I = 18	O = 24	U = 30	
D = 13	J = 19	P = 25	V = 31	
E = 14	K = 20	Q = 26	W = 32	
F = 15	L = 21	R = 27	X = 33	

Table 1

1.5.3 Mandate Identification (AT-01 Unique Mandate Reference)

This data element is case insensitive. For example: Mandate Identification 123AAa45678, 123aaA45678, 123aaa45678 and 123AAA45678 shall be considered identical.

1.6 Implementation of ISO 20022 XML rules

This document should be read in conjunction with the ISO 20022 XML message standards. ISO rules on the usage of the elements have not been repeated in these Implementation Guidelines.

1.7 Change-Over Date

As from the change-over date, receiving banks may only receive messages, including the r-messages, in the new version.

2 ADVANCE MANDATE INFORMATION MESSAGES

These Guidelines prescribe, where relevant and dictated by the Rulebooks, usage rules for the recommended use of the ISO 20022 XML Payments Mandate messages to cater for the SEPA Advance Mandate Information service. The message elements identified with yellow shading must be provided when mandatory. However, message elements known by the receiver may be filled in by the receiver in order to populate the subsequent inter-bank message.

The elements shaded yellow specify the SEPA B2B AMI Requirements and are defined in the Rulebook, are required for inter-bank and customer-to-bank processing or are mandatory in the ISO message standards.

The approach is based on

- pain.009.001.01 being used for both the customer-to-bank and the inter-bank request on the initial mandate
- pain.010.001.01 being used for both the customer-to-bank and the inter-bank request on the amended mandate
- pain.012.001.01 being used for both the customer-to-bank and the inter-bank response on both the initial and amended mandate

2.1 Creditor to Creditor Bank Advance Mandate Information (DS-14) – AMI request on the initial mandate

2.1.1 Use of Mandate Initiation Request (pain.009.001.01)

The message is used to transport the AMI request on the initial mandate from the Creditor to the Creditor Bank.

The message caters for a single request.

2.3 Creditor to Creditor Bank Advance Mandate Information (Based on DS-14) – AMI request on the amended mandate

2.3.1 Use of the Mandate Amendment Request (pain.010.001.01)

The message elements identified with yellow shading must be provided. However, message elements known by the receiver may be filled in by the receiver for populating the subsequent inter-bank message. This is a matter between the bank and its customers.

The message is used to transport the AMI request on an amended mandate from the Creditor to the Creditor bank.

The message caters for a single cancellation request.

2.3.4 Message Element Specifications

The following amendment reason codes have been defined for use in the AMI service message.

ISO Code	ISO Name	Definition
MD16	RequestedByCustomer	Amendment by the Debtor
MD17	RequestedByOriginator	Amendment by the Creditor
MD18	RequestedByOriginatorAndCustomer	Amendment by the Creditor and the Debtor

2.4 Inter-bank Advance Mandate Information (DS-15) – AMI request on the amended mandate

2.4.1 Use of the Mandate Amendment Request (pain.010.001.01)

The message is used to transport the AMI request on an amended mandate from the Creditor bank to the Debtor bank.

The message caters for a single request.

2.4.4 Message Element Specifications

The following reason codes have been defined for use in the AMI service messages.

ISO Code	ISO Name	Definition
MD16	RequestedByCustomer	Amendment by the Debtor
MD17	RequestedByOriginator	Amendment by the Creditor
MD18	RequestedByOriginatorAndCustomer	Amendment by the Creditor and the Debtor

2.5 Inter-bank Message for the response on the Advance Mandate Information Request (DS-16) – AMI response to an AMI request

2.5.1 Use of the Mandate Acceptance Report (pain.012.001.01)

The message is used to transport the positive or negative response to an AMI request (initiation or amendment). This response is sent by the Debtor Bank to the Creditor Bank. The message caters for a single response to an AMI request.

AG01	TransactionForbidden	Direct debit forbidden on this account
MD01	NoMandate	No Mandate
MD02	MissingMandatoryInformationInMandate	Mandate data is missing or incorrect
RC01	BankIdentifierIncorrect	Bank identifier code is incorrect (ie, invalid BIC)
RR04	Regulatory Reason	Regulatory Reason
SL01	SpecificServiceOfferedByDebtorBank	Specific service offered by Debtor Bank
MD09	NoMandateServiceOnCustomer	Account blocked for direct debit by the Debtor
MD16	RequestedByCustomer	Refusal by the Debtor
FF01	InvalidFileFormat	Operation/transaction/code incorrect, invalid File format
AG02	InvalidBankOperationCode	Operation/transaction/code incorrect, invalid File format

List of changes in Inter-bank Business-to-Business Direct Debit Implementation Guidelines Relative to v3.0

(This list is for information – the changes included the body of the document are the changes in effect)

SYMBOLS USED

1. Column one contains the identification number of the Change
2. Column two contains the reference(s) to the relevant sections of the Direct Debit Guidelines
3. Column three contains a description of the change
4. Column four contains a status code:
 - REJ: Rejected by the SPS WG
 - PEN: Issue pending in the SPS WG
 - ACC: Accepted in Guidelines
5. Column five contains the type of change:
 - TYPO: Typing and layout errors
 - CLAR: Clarification of the text
 - CHAN: Change or further alignment with Rulebook content

Reference	Chapter / Section / Paragraph / Bullet	Description	Status	Type
11/001	1.5.2 Identifier of the Creditor (AT-02)	Additional clarification on Creditor Identifier: the data element is case and space insensitive	ACC	CLAR
11/002	1.2 Use of these Guidelines by the instructing and instructed parties	Paragraph updated as follows: 'AMI Service that include message elements that are defined and documented by AOS communities (shaded white in Figure 2) are considered as SEPA, but not as SEPA B2B AMI Service'. The word 'SEPA' was deleted in front of 'AMI Service' at the start of the paragraph and info between brackets was moved (before it was at the end of the sentence).	ACC	CLAR
11/003	1.1, 1.2, 1.3 & 2	Replace 'Core' by 'B2B AMI'	ACC	TYPO
11/004	1.3 Notation Conventions	Paragraph updated as follows: 'Column 1 indicates the message element Index number in the relating ISO 20022 Message Definition Report'. (instead of 'Column 1 indicates the message element Index number in the ISO 20022 XML standard, ISO Core Documentation')	ACC	CLAR
11/005	2.1.3, Index 2.9 2.2.3, Index 2.9 2.3.3, Index 2.17 2.4.3, Index 2.17	Deleted data and marked white	ACC	CHAN
