

Parent or Legal Guardian Consent for Body Piercing of a Person Under 18 Years of Age

Health Risk Awareness

It is important to be aware of the potential health risks associated with body piercing such as allergic reactions, skin infections, hepatitis, prolonged bleeding, swelling, scarring and general discomfort. Existing medical conditions such as allergies, heart disease, diabetes, skin disorders or conditions that affect the immune system may increase the risk of complications from body piercing. Before providing consent for body piercing, speak with a physician regarding potential health risks for your child.

Body Piercing Consent Requirements

New York State Public Health Law Article 4-A, Section 460-a, prohibits the owner, operator or employee of a body piercing studio from body piercing a person under eighteen years of age unless a parent or legal guardian provides written consent. To provide consent, the parent or legal guardian must complete and sign this form in the presence of the owner of the body piercing studio or in the presence of the studio's body piercing specialist. The original written consent will be retained by the body piercing studio and will expire twelve months from the date it was signed.
