POTENTIAL HEALTH EFFECTS

EYE SKIN INHALATION INGESTION  
Primary Route of Exposure: X X X

EFFECTS OF OVEREXPOSURE

Acute:

Eyes:

May cause minimal irritation, experienced as temporary discomfort.

Skin:

Brief contact may cause slight irritation. Prolonged contact, as with clothing wetted with material, may cause more severe irritation and discomfort, seen as local redness and swelling.

Other than the potential skin irritation effects noted above, acute (short term) adverse effects are not expected from brief skin contact; see other effects, below, and Section 11 for information regarding potential long term effects.

Inhalation:

Vapors or mist, in excess of permissible concentrations, or in unusually high concentrations generated from spraying, heating the material or as from exposure in poorly ventilated areas or confined spaces, may cause irritation of the nose and throat, headache, nausea, and drowsiness.

Ingestion:

If more than several mouthfuls are swallowed, abdominal discomfort, nausea, and diarrhea may occur.

Sensitization Properties:

Unknown.

Chronic:

No adverse effects have been documented in humans as a result of chronic exposure. Section 11 may contain applicable animal data.

Medical Conditions Aggravated by Exposure:

Because of its irritating properties, repeated skin contact may aggravate an existing dermatitis (skin condition).

Other Remarks:

None

---

#### 4. FIRST AID MEASURES

---

##### Eyes:

Flush eyes with plenty of water for several minutes. Get medical attention if eye irritation persists.

##### Skin:

Wash skin with plenty of soap and water for several minutes. Get medical attention if skin irritation develops or persists.

##### Ingestion:

If more than several mouthfuls of this material are swallowed, give two glasses of water (16 oz.). Get medical attention.

##### Inhalation:

If irritation, headache, nausea, or drowsiness occurs, remove to fresh air. Get medical attention if breathing becomes difficult or respiratory irritation persists.

##### Other Instructions:

Remove and dry-clean or launder clothing soaked or soiled with this material before reuse. Dry cleaning of contaminated clothing may be more effective than normal laundering. Inform individuals responsible for cleaning of potential hazards associated with handling contaminated clothing.

---

#### 5. FIRE-FIGHTING MEASURES

---

##### Ignition Temperature - AIT (degrees F):

Not determined.

##### Flash Point (degrees F):

410 (COC)

##### Flammable Limits (%):

Lower: Not determined.

Upper: Not determined.

##### Recommended Fire Extinguishing Agents And Special Procedures:

Use water spray, dry chemical, foam, or carbon dioxide to extinguish flames. Use water spray to cool fire-exposed containers. Water or foam may cause frothing.

##### Unusual or Explosive Hazards:

None

##### Extinguishing Media Which Must Not Be Used:

Not determined.

##### Special Protective Equipment for Firefighters:

Wear full protective clothing and positive pressure breathing apparatus.

---

## 6. ACCIDENTAL RELEASE MEASURES (Transportation Spills: CHEMTREC (800)424-9300)

---

### Procedures in Case of Accidental Release, Breakage or Leakage:

Ventilate area. Avoid breathing vapor. Wear appropriate personal protective equipment, including appropriate respiratory protection. Contain spill if possible. Wipe up or absorb on suitable material and shovel up. Prevent entry into sewers and waterways. Avoid contact with skin, eyes or clothing.

---

## 7. HANDLING AND STORAGE

---

### Precautions to be Taken in

#### Handling:

Minimum feasible handling temperatures should be maintained.

#### Storage:

Periods of exposure to high temperatures should be minimized. Water contamination should be avoided.

---

## 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

---

### Protective Equipment (Type)

#### Eye/Face Protection:

Safety glasses, chemical type goggles, or face shield recommended to prevent eye contact.

#### Skin Protection:

Workers should wash exposed skin several times daily with soap and water. Soiled work clothing should be laundered or dry-cleaned.

#### Respiratory Protection:

Airborne concentrations should be kept to lowest levels possible. If vapor, mist or dust is generated and the occupational exposure limit of the product, or any component of the product, is exceeded, use appropriate NIOSH or MSHA approved air purifying or air supplied respirator after determining the airborne concentration of the contaminant. Air supplied respirators should always be worn when airborne concentration of the contaminant or oxygen content is unknown.

#### Ventilation:

Adequate to meet component occupational exposure limits (see Section 2).

#### Exposure Limit for Total Product:

None established for product; refer to Section 2 for component
