## Restaurant Dining Invoice Template (VAT)

### Features and Facts

---

It's a common practice to provide an invoice, receipt or payment voucher in the restaurant, cafe, fast food, coffee shop and other food businesses. **Restaurant Dining Invoice Template** offers a sample layout that helps you create and print the document with easy.

Note If you were coming here when looking for a template for your hotel business, visit [Hotel Receipt Template](#). This template has one tax named VAT set by default. For an edition that has no tax, visit [Restaurant Dining Invoice Template \(No Tax\)](#) here on InvoicingTemplate.com.

A restaurant is a business which prepares and serves food and drinks to customers. Meals are generally served and eaten on premises, but many restaurants also offer take-out and food delivery services. Restaurants vary greatly in appearance and offerings, including a wide variety of cuisines and service models ranging from inexpensive fast food restaurants to high-priced luxury establishments. If you are providing invoice / receipts / vouchers to the customers, clients, takeaways, home delivery and companies, whether it's a printed paper form or electronic document, make it looks professional and beautiful.

Although there are already several [service invoice templates](#) available here on InvoicingTemplate.com, Restaurant Dining Invoice Template (Restaurant Dining Receipt Format) has been customized to meet the specific business needs. Like all retail businesses, the restaurant deals directly with its customers. A professional and beautiful invoice or bill tells your customer that you are caring about your business even on the particulars. A restaurant invoice is known by many names; in England, it is known as the bill, while in America and other parts of the world, it is also known as the check. No matter how it is named, it shows not only prices quoted in the menu, and also some extra charges like Value Added Taxes (VAT) and service charges.

By using Excel formulas, **Restaurant Dining Invoice Template (Restaurant Dining Receipt Format)** is able to calculate line total, subtotal, discount, tax and total payable automatically.

As you can see from **Restaurant Dining Invoice Template (VAT)**, one benefit of using Excel as your invoice creator, as compared to other invoice template formats like Microsoft Word invoice template and PDF invoice template, HTML invoice template or even Photoshop invoice template, is that you can easily apply formulas to do calculations. This means that, once the basic figures are entered on the form, like Quantity and Unit Price, or Hours and Hourly Rate, or Days and Daily Rate, the calculation of totals and taxes is done automatically.

Note that the "Discount" field used on this template is a custom field, meaning it does not appear in the default template shipped with Uniform Invoice Software setup program. The discount field is added to the Invoice Header database table.

Adding a custom field to the Invoice Header table in the database makes it possible to save the field value to database along with the other data of an invoice. For example, adding the custom field Company Name to the Invoice Header database table allows you to save the company name of a customer to the database when you save an invoice. If you use Uniform Invoice Software version template Restaurant Dining Invoice Template (VAT) and add the custom field to the invoice form, the value is saved from or retrieved to Restaurant Dining Invoice Template (VAT) whenever you save or reload an invoice.
