Sales Invoice Form with Discount Amount Features and Facts

By moving the shipping fields back into the printable area on the Excel Invoice form, the original service invoice template now becomes a sales invoice template that supports per customer discount amount.

Most invoice templates available here on InvoicingTemplates.com have the printable area defined on the center of the Invoice worksheet with white background. This printable area, which is identified by Excel range name Print_Area, defines what will be printed when you execute the Print command in Excel. To setup/define the Print_Area name in Excel 2013, first select the cells you want to add to Print_Area, and then click Page Layout > Print Area > Set Print Area. When you save your workbook, the print area is saved too.

This **Sales Invoice Form with Discount Amount** invoice template in Excel spreadsheet format, and as the name implies it is a sales invoice template that has shipping fields inside the printable area. To do this, we simply move the shipping fields back into the printable area, including Shipping Name, Shipping Address, Shipping City State Zip, Shipping Country and Shipping Contact. The controls, such as the text labels of the shipping fields, the "select a shipping address" icon button, the "Same As Bill To" button should also be move into the printable area. Moving an ActiveX control on an Excel spreadsheet is easy if you know the trick - before you can move a control, first switch to design mode. In design mode, even if you have Uniform Invoice Software installed, it won't response to your click event. If you browse our invoice template gallery, you may see many of the invoice template samples are created by moving the fields in or out of the print area.
