

Dear Congressman,

I write to you in order to express my deep concern with the **Fast Track bill** that is currently being introduced in congress. Fast Track will allow harmful trade agreements like the Trans-Pacific Partnership agreement (TPP) to evade any congressional oversight! Furthermore, the intellectual property and investment chapters of the TPP other trade agreements will seriously hinder access to live saving medicines locally and abroad:

- The TPP should not undermine public health flexibilities included in the TRIPS agreement by adopting even more harmful intellectual property measures (e.g., patent term extension or data exclusivity rules).
- Trade Agreements should not include Investor State Dispute Settlement systems that allow corporations to circumvent legal process and supreme courts in order to seek damages (especially in cases where a country's regulatory authority is in question).

**Oppose the Fast Track decision on the TPP. Don't be part of the decisions allowing for millions of deaths.
VOTE NO ON FAST TRACK**

Sincerely,

(name)
