nada.com/advantage

Vehicle Risk Analysis

Vehicle characteristics impact loan risk as much as the borrower's credit history. NADA Used Car Guide's vehicle risk analysis service can help you better understand vehicle risk so you can structure more profitable loan programs.

- Gain a more precise understanding of vehicle risk to help drive business growth and minimize future losses
- Efficiently identify stronger- and weaker-performing vehicles
- Fine-tune loan terms based on a specific vehicle's level of risk
- Estimate probability of default based on equity position

Remarketing Planning

Staying on top of changing wholesale market conditions is the key to remarketing success. NADA Used Car Guide's remarketing planning service can help you make more informed remarketing decisions on your off-lease or repossessed inventory.

- Set realistic asking prices using up-to-date market data
- Optimize returns by planning around seasonal factors and supply volatility
- Determine how mileage will impact prices under certain scenarios
- Assess internal performance versus competitive benchmarks

Portfolio Analysis

Understanding the value of your portfolio today and in the future is critical to developing plans for continued success. NADA Used Car Guide's portfolio analysis service can help you better manage and maximize portfolio performance.

- Monitor equity position based on loan parameters and current/forecasted used vehicle prices
- Identify over- and underperforming segments, brands, models and vehicles
- Estimate default probabilities
- Estimate loss severity in the event of default
- Address capital requirements
- Inform collection strategies

Stress Testing

It would be great if the market never changed, but we all know it does—sometimes drastically. NADA Used Car Guide's stress testing service can help you determine how your portfolio would perform under various hypothetical scenarios.

- Evaluate portfolio performance under hypothetical economic and market scenarios
- Identify the factors most stressful to segments or certain vehicle types
- Estimate default probabilities
- Estimate loss severity in the event of default
- Estimate capital allocation

NEW!

NADA Values Online

The new NADA Values Online introduces New Vehicle Values, inventory valuation, vehicle valuation trends and custom reporting to help you see vehicle values from every angle. Since it's web-based, there is no software to install and your entire staff can use it at the same time, without the need for additional user licenses.

NEW New Vehicle Values for new vehicle pricing guidance

NEW Inventory valuation for saving and easily updating vehicle valuations

NEW Vehicle valuation trends for quick insight into wholesale and retail transactions

NEW Custom reporting that lets you select the data that best fits the deal

NEW Typically equipped MSRP values for practical value comparisons

- 10 guidebooks in one, including values for passenger cars, light-duty trucks, motorcycles, RVs, commercial trucks, etc.
- Ability to scan a VIN or select a specific make and model
- Includes New Vehicle Values (low, average, high) and Auction (low, average, high), Trade-in (rough, average, clean), Clean Loan and Clean Retail values for used passenger cars and light-duty trucks
- Certified Pre-Owned (CPO) values, available for Clean Retail valuations only
- Automatically calculated accessory and mileage options for accurate valuations

DEVELOPER TOOLS

Integrate NADA Used Car Guide's pricing and content into your own systems, websites and applications for internal use, resale or client-facing sites by choosing from our wide selection of developer tools. Give us a call and we'll help you choose from our APIs and other integrated data solutions to best suit your needs.

**Get all this info
and more online!**
nada.com/products

NADA Web Service

Integrate NADA Used Car Guide values into any online application for internal use or resale. NADA Web Service is a SOAP-based development tool that enables secure, real-time access to the NADA Used Car Guide data supported on our servers—eliminating the need to maintain the data on your own network.

- Obtain values by VIN or make and model for used passenger cars, light-duty trucks and commercial trucks
- Auction (low, average, high), Trade-in (rough, average, clean), Clean Loan and Clean Retail values
- Automatic accessory and mileage adjustments
- Rolling 20 years of data updated monthly for used passenger cars and light-duty trucks; commercial truck data dating back to 2000.

NADA .NET API

Use the .NET interface to integrate NADA Used Car Guide values into your Windows®-based and online applications. NADA .NET API consists of .NET assemblies and a vehicle valuation database that resides on a SQL Server database.

- Obtain values by VIN or make and model for used passenger cars, light-duty trucks and commercial trucks
- Auction (low, average, high), Trade-in (rough, average, clean), Clean Loan and Clean Retail values
- Automatic accessory and mileage adjustments
- Rolling 20 years of data updated monthly for used passenger cars and light-duty trucks; commercial truck data dating back to 2000

NADA Appraisal API

Integrate NADA Used Car Guide values and your information from NADA Appraisal into any online application. NADA Appraisal API is a RESTful web service that allows developers to view existing appraisals—customer, vehicle, checklist and adjustment tables, and photo URLs.

- Access to existing appraisals
- Auction (low, average, high), Trade-in (rough, average, clean), Clean Loan and Clean Retail values
- Rolling 20 years of data updated monthly for used passenger cars and light-duty trucks
- NADA Appraisal API is available exclusively for NADA or NIADA member dealers

866.976.6232

NADA Data Files (Current and Historical) with VIN Decoding

NADA Used Car Guide values in a raw data file format make it easy to integrate used vehicle data into your database and applications.

- Obtain values by VIN or make and model
- Auction (low, average, high), Trade-in (rough, average, clean), Clean Loan and Clean Retail values
- For a range of used vehicles, including passenger cars, light-duty trucks and commercial trucks
- Also available without VIN decoding

Call for pricing
866.976.6232

NADA VIN Batch Processing

Rely on NADA VIN Batch Processing when you need the value of an entire portfolio of vehicles, but don't have your own internal system to automate the process. NADA VIN Batch Processing is ideal for direct marketing, tax assessment, risk management or investment purposes.

- Submit a list of VINs via email or FTP
- Available with or without mileage and accessory adjustments
- Available for used passenger cars, light-duty trucks, commercial trucks and motorcycles
- For a similar product that may fit your needs, see e-Valuator® Portfolio on page 26

Call for pricing

AuctionNet® Raw Data Files

Tap into the industry's top source for wholesale vehicle sales data. AuctionNet Raw Data Files give you more than 80% of the nation's auction transaction data from Manheim, ADESA, ServNet, ABC and key independent auction houses. Includes comprehensive description updates to increase the value of the data you pull, allowing for greater statistical analysis.

- Over 85% of vehicles include trim-level data for more accurate vehicle values
- Comprehensive list of vehicle attributes and descriptions, including
 - Base MSRP
 - Body type
 - Cylinders
 - Drive type
 - Exterior color
 - Fuel type
 - Induction type
 - Interior color
 - Liters
 - Make type
 - NADA Used Car Guide vehicle class
 - Sale age
 - Transmission
- Delivered weekly via FTP with improved file layout
- Available as an annual subscription or customized data sets, with optional historical data files available to suit your needs
- For a range of used vehicles, including passenger cars, light-duty trucks and commercial trucks
- Data includes year, make, model, mileage, sale type, sale week, sale price and region
- See AuctionNet Weekly Market Report for a related online product on page 12
