This handout will be a guide to what is expected of you when you write a current event summary. In preparing a summary, you should proceed in three steps, some of which overlap.

**1. Read the Article carefully.**

Read the article twice. Skim the article for organization and major ideas. Read the article a second time. Read the introductory paragraph carefully. Usually the whole idea of the article is expressed in this paragraph.

**2. Take notes** in your own words, using your own abbreviations and write a summary.

**3. Compare your summary with the article.**

Is your summary complete and accurate? Is it free of all grammatical errors?
