US ARMY CORPS OF ENGINEERS, SAVANNAH DISTRICT INDIVIDUAL PERMIT CHECKLIST

This checklist is to assist you in submitting complete and proper information. Please keep in mind that this is not an exhaustive list. Each project has unique components and **more or less information may be required** by the project manager to complete the Individual Permit (IP) review process on any given project. However, this list contains information typically necessary for this office to process an IP. We appreciate your cooperation in providing this information at the time of your request. Failure to provide this information may delay our response to you. Please also provide an electronic submittal (Compact Disc) of your application in Microsoft Word format.

1.	Jurisdictional Determination (JD) request including either an Expanded Preliminary JD (EPJD) request or an Approved JD (AJD) request. Refer to the information required in the EPJD checklist or AJD checklist. If you have already received a verified JD from the US Army Corps of Engineers (USACE), provide the USACE project number. Provide a copy of the verified JD and all associated exhibits. Note: Exhibits to be provided should include those displayed in the EPJD or AJD example.
2.	A completed CESAS Form 19, titled "JOINT APPLICATION FOR A DEPARTMENT OF THE ARMY, CORPS OF ENGINEERS PERMIT, STATE OF GEORGIA MARSHLAND PROTECTION PERMIT, REVOCABLE LICENSE AGREEMENT AND REQUEST FOR WATER QUALITY CERTIFICATION AS APPLICABLE" available at: http://www.sas.usace.army.mil/regulatory/permits.html. If you do not have a sufficient amount of space on the form, attach a supplemental sheet(s) and refer to the applicable letter for which you are providing further information. This form must be filled out completely and include all contact information and written permission (signature) from the property owner or the owner's legal representative for USACE personnel to property.
	access the property. a Name, address, and phone number of applicant, current property owner(s), and
	agent/consultant (if applicable).
	b Confirmation of property ownership. Provide copies under which you claim title to the property. If the applicant is not the owner of the property, provide a copy of the owner's deed and written permission from the owner to carry out the project on the land. If the deed references a specific plat, it must also be included.
	c Coordinates of center of property or review area in decimal degrees (xx.xxxx°N, -xx.xxxx°W format). Linear projects should also include decimal degrees location of the start and end of the review/project area.
	d Location of property or review area (road names, cross streets, nearest town, City, County, etc).
	Note: you do not need to provide the "Military District" in this section. Also, the "Approximate elevation of lot" can be determined by using the US Geological Survey Topographic Map available at: http://store.usgs.gov/b2c_usgs/b2c/start/(xcm=r3standardpitrex_prd)/.do
	e Size of property or review area in acres.
	fName of nearest named waterbody (stream/river/lake) to which the property or review area is hydrologically connected, closest TNW, name and number of drainage basin (if the property is connected to an unnamed tributary, then specify the nearest named waterbody, e.g. unnamed tributary to Savannah River), if not identified in EPJD or AJD submittal.
	g Signature of applicant and agent plus a statement designating agent's authority to represent the applicant.

h.	Project impacts - A complete description of the acreage of wetland impacts, linear feet of
	stream impacts and/or any other impacts to waters of the US from the proposed activity. This
	description needs to describe the amounts and types of wetland impacts, stream impacts and/or
	any other impacts to waters of the US (e.g. filling, conversion of forested wetland to maintained
	herbaceous wetland, clearing, etc) and also include: the distance of the project extending beyond
	Mean Low Water (MLW) into the waterway, the total widths from MLW to MLW, the distance
	from each adjacent dock located upstream and downstream of the proposed structure.
i.	Proposed Use for the project (e.g. private, public, commercial, other)
j.	Adjacent Property Owners provide names and addresses of adjacent property owners/lessees
J	on pre-typed address labels. In addition, please complete the "Adjoining Property Owners
	Notification Forms" and provide the completed copies of the adjacent property owner
	notification form, if for some reason the adjacent owners do not respond, please provide this
	office with a copy of a "Proof of Mailing".
k.	Scheduling of the activity. Provide a description of each type of impacts to waters of the US
	and a proposed timeline for each activity (e.g. proposed start date, proposed completion date).
1.	Status of project site work (e.g. is any portion of the work for which authorization sought now
	complete, if so, include completed work on site plans/drawings; indicate date work began and
	was completed; if not complete, indicate percentage of work completed; if work was authorized
	by USACE permit or verification letter, provide USACE project number and project description
	for authorized impacts and compensatory mitigation).
m.	Status of additional permits, approvals, certifications or documentations required.
	i Section 401 Water Quality Certification
	ii Coastal Zone Management Consistency
	iii Coastal Marshlands Protection Act
	iv Stream Buffer Variance Application
	v NPDES Permit
	vi Stormwater Management Plans
	vii Floodplain Management Plans
	viii Land Disturbance Permits
	ix Any other required permits, approvals, certifications, or documentation
n.	Denials of additional permits, approvals, certifications or documentations (e.g. has any agency
	denied approval for the activity described herein or for any activity directly related to the activity
	described herein? If yes, explain).
0.	Discharge of Dredge and/or Fill Material and Bulkhead installation
	i Type of material to be dredged or used as fill.
	ii Composition of material to be dredged or used as fill.
	iii Quantity of material to be dredged or used as fill in cubic yards.
	iv Method of dredging (if applicable).
	v Plans and location for disposal of the dredged material (if applicable).
	vi Location(s) of the discharge site(s).
	vii Source of the fill material.
	viii Method of discharging material.
	ix Method of transportation of dredged material (if applicable).
	xProposed use of fill area(s), including specific structures to be erected on fill area or
	platform. xi. Type of construction equipment to be used
	xi. Type of construction equipment to be used

- p. ____ Description of Avoidance, Minimization and Compensation: Provide a brief explanation describing how impacts to waters of the United States are being avoided and minimized on the project site. Also, provide a brief description of how impacts to waters of the United States will be compensated for, or a brief statement explaining why compensatory mitigation should not be required for those impacts. Further clarification must be provided in Section 10 below.
- q. ____Water Quality Certification: In some cases, Federal law requires that a Water Quality Certification from the State of Georgia be obtained prior to issuance of a Federal license or permit. Applicability of this requirement to any specific project is determined by the permitting Federal agency. The information requested below is generally sufficient for the Georgia Environmental Protection Division to issue such a certification if required. Any item, which is not applicable to a specific project, should be so marked. Additional information will be requested if needed.

a. Please submit the following:

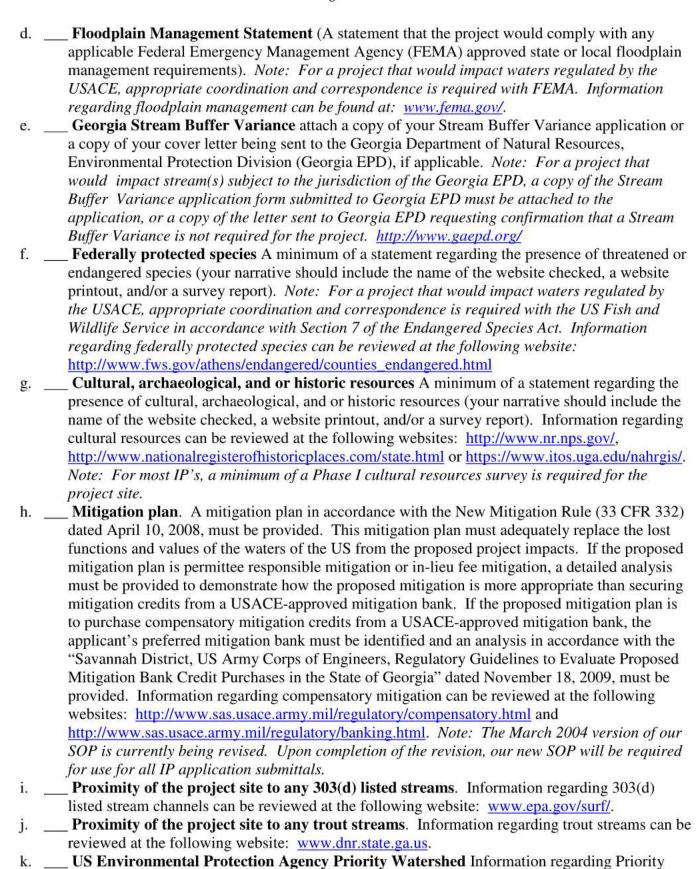

- 1. A plan showing the location and size of any facility, existing or proposed, for handling any sanitary or industrial waste waters generally on your property.
- 2. A plan of the existing or proposed project and your adjacent property for which permits are being requested.
- 3. A plan showing the location of all points where petro-chemical products (gasoline, oils, cleaners) used and stored. Any aboveground storage areas must be diked, and there should be no storm drain catch basins within the dike areas. All valving arrangements on any petro-chemical transfer lines should be shown.
- 4. A contingency plan delineating action to be taken by you in the event of spillage of petro-chemical products or other materials from your operation.
- 5. Plan and profile drawings showing limits of areas to be dredged, areas to be used for placement of spoil, locations of any dikes to be constructed showing locations of any weir(s), and typical cross sections of the dikes.

b. Please provide the following statements:

- 1. A statement that all activities will be performed in a manner to minimize turbidity in the stream. Identify and provide a description of all minimization measures taken associated with the proposed project.
- 2. A statement that there will be no oils or other pollutants released from the proposed activities which will reach the stream.
- 3. A statement that all work performed during construction will be done in a manner to prevent interference with any legitimate water uses.

	r Signature of applicant verifying that: Application is hereby made for a permit or permits to authorize the activities described herein; Water Quality Certification from the Georgia Environmental Protection Division is also requested if needed. I certify that I am familiar with the information contained in this application, and that to the best of my knowledge and belief such information is true, complete and accurate. I further certify that I posses the authority to under take the proposed activities.
3.	Required Drawings – Must submit at least one black and white copy of all drawings on 8½" X 11" paper in order for drawings to be legible and reproducible. Color drawings and larger drawings may also be
	provided and are encouraged to provide clarification. All drawings must also include: scale, north arrow,
	title block with date, property name, drawing number/preparer, revision dates, roads and waterway names
	and project/property boundaries.
	a Overall Site Exhibit(s) (e.g. existing bank lines; mean high water and mean low water line if the
	activity is in a tidal waters; water depths around the activity; dimensions of the activity and
	distance it extends from the high and low water lines into the waterbody; location of existing
	structures, if any, in navigable waters in the immediate vicinity of the proposed activity, including structures located on the adjacent properties; ordinary high water lines in non-tidal
	waters; boundaries of wetlands and/or streams; acreage of wetland and/or linear footage of
	stream impacted by the proposed project, etc.); label which part is existing and which part is
	being proposed if the activity is a modification; label total square footage of proposed project;
	include additional construction drawings as needed to clearly depict the proposed project and
	how the project would be completed. Walkways, decks, and bridges show the typical height
	above marsh vegetation, and height above any waters.
	h Wotore Fill Fyhihit
	b Waters Fill Exhibit c. Elevation and/or Cross Section Drawings (e.g. water elevation as shown on plan view drawing)
	 b Waters Fill Exhibit c Elevation and/or Cross Section Drawings (e.g. water elevation as shown on plan view drawing)
4.	
4.	c Elevation and/or Cross Section Drawings (e.g. water elevation as shown on plan view drawing) Photographs should be representative of the site and may include pictures of the wetlands, soils, tributaries, etc on the site. Photographs will help in determining the need for a site visit, if not identified

	g.	National Wetlands Inventory (NWI) Map, available at:
		http://www.fws.gov/wetlands/Data/Mapper.html.
	h.	Infra-red maps (optional).
	i.	Engineering Surveys, e.g. two foot or less topographic map of the site (optional).
	j.	LIDAR is highly recommended where available and eases the review of a project including:
		desktop verification requests, re-verification requests and determining whether a site visit is
		necessary.
	k.	Verified GPS exhibits or surveys of jurisdictional waters on-site. If not verified, an EPJD or
		AJD request in accordance with the requirements identified in the EPJD or AJD checklists.
	1.	Engineering Surveys, e.g. two foot or less topographic map of the site (optional).
6	Ad	ditional Items for a Complete Application
0		Project name/Legal Property Description. The name of the subdivision or project (e.g.
	и.	Lakeview Subdivision, Joe's Country Store expansion).
	h	Historic land use and existing conditions of the proposed project site.
		Description of each water of the US located on the proposed project site and a description of
	٠.	any proposed impacts to waters of the US on the project site.
	d.	Past Actions including JDs, Permits, etc with the Corps Action ID number.
		Purpose for the proposed activity/discharge (e.g. a detailed description of the proposed activity,
		a complete project purpose statement).
	f.	Need for the proposed activity/discharge (e.g. an intended use and need for the proposed project
		based on type of project, locality).

€.	Standalone 404(b)(1) analysis. Complete a draft 404(b)(1) analysis for your proposed project, which	ch
	is available at: http://www.sas.usace.army.mil/regulatory/regulatory.html .	

10 Culverts in streams and/or wetlands the following information should be provided in your project
description if culverts are proposed.
a Culvert type
b Culvert size
c Depth to which culvert will be embedded
d Culvert design, if multi-barreled; and
e Floodplain culverting, if required
Questions can be directed to the following offices:
