Ideas about Classroom Organization
EDCI 271 Project 3 Worksheet

<http://distance.soe.purdue.edu/visionquest/index.htm>

Classroom organization is a critical component of successful technology integration. Before you can begin using technology in your classroom, you need to think about how you will arrange your classroom and how you will ensure that every student has the opportunity to use the computers that are available. In the spaces below, record your own ideas about using technology. Following this, explore the ideas of the different teachers who are featured on the VisionQuest CD (see URL above). On a separate page, **in a word-processed document**, compare your responses with the teachers' responses on each of the three questions (approximately 100 words for each question). Begin by describing the **grade level** that you intend to teach and, if at the middle or high school level, the content you will teach. **Turn in this worksheet and the word-processed comparison.** (Point value: Completed worksheet = 1 point; Comparisons with teachers on each of the three components = 3 points each, 100 words each. Total Value = 10 points)

1. Briefly describe *how* you will use technology in your classroom. Record how the teachers on VisionQuest use technology.

Your Ideas	
Jefferson High School	
Westlane Middle School	
Indian Creek Elementary	

2. Briefly describe *who* will use technology in your classroom. Who will decide who gets to use the computers when? Record the ideas of the teachers on VisionQuest.

Your Ideas	
Jefferson High School	
Westlane Middle School	
Indian Creek Elementary	

3. Briefly describe *when* you will use technology in your classroom. Record the ideas of the teachers on VisionQuest.

Your Ideas
