What should Firefox do with this file?

Open with

Save File

Do this automatically for files like this from now on.

Note* : Please have [Winzip](#) software installed on your machine so that you can extract the files purchased from ProposalHelper quickly. [WinZip](#) is the world's most popular Zip utility for file compression, encryption, packaging, and data backup. If you do not see a '.zip' extension to your downloaded file, just rename the file to add the .zip extension at the end of your filename.

Why do people use Zip files?

- Zip files compress data and therefore save time and space and make downloading software and transferring e-mail attachments faster.
- Only one download is required to obtain all related files, and file transfer is quicker because the archived files are compressed.
