

Complex Environment Devices

Watertight, Severe Duty Insulated and
Corrosion Resistant devices for harsh
industrial environments

 **COOPER** Wiring Devices

Watertight, Severe Duty Insulated & Corrosion Resistant Devices

Arrow Hart® delivers superior performance in the harshest environments

Our family of complex environment devices excel where standard wiring devices are most susceptible to failure: physically abusive areas containing a host of contaminants that attack device integrity like oils, chemicals, water and moisture, UV exposure, ozone and corrosive airborne contaminants.

Table of Contents

Watertight Devices	4
Severe Duty Insulated Devices	11
Corrosion Resistant Devices	16
Complex Environment Protection Accessories	19

Arrow Hart offers a complete range of solutions for use in complex environments.

- Watertight devices provide safe and reliable watertight connections, ideal for use in wet locations and hose-down areas
- Severe Duty Insulated devices offer superior resistance to UV exposure, ozone and a wide variety of damaging fluids typically found in industrial applications
- Corrosion Resistant devices are engineered to perform where moisture and humidity create corrosive environments
- A full line of accessories are available, designed to compliment the unique performance characteristics of our industrial devices

ARROW/HART®
Watertight Device Applications:

- Food Processing
- Petrochem Production
- Marinas/ Shipbuilding

A complete line of devices designed for complex environments

Select from a complete offering of straight blade and locking devices intended for use in complex and harsh environments, including a wide range of plugs, connectors, receptacles and accessories.

ARROW/HART

Severe Duty Insulated Device Applications:

- Industrial Manufacturing
- Mining & Agriculture
- Warehousing & Refrigeration

ARROW/HART

Corrosion Resistant Device Applications:

- Chemical Processing
- Temporary Power
- Machine Shops/ Millworks

Watertight Device Applications

The most complete offering of watertight wiring devices

Arrow Hart® has the broadest line of industrial locking and straight blade watertight devices. Select from the most extensive offering of plugs, connectors, receptacles and accessories – all providing superior watertight protection.

Application

Watertight devices have been designed for industrial applications in which electrical connections are exposed to liquid splashing and hose-down.

Watertight devices are ideal for industrial manufacturing, food and beverage processing, agriculture applications, chemical production, shipyards and marinas plus wastewater treatment facilities.

These products have excellent resistance to physical abuse, hose-directed water, oils, chemicals, corrosive liquids, airborne particulates and contaminants, UV exposure and ozone attack.

Properly mated plugs and connectors, plugs and receptacles and closed receptacles form a multi-point watertight seal that resists 1,000 psi water spray.

ARROW/HART®

Watertight Device Features & Benefits

Innovative design and rugged materials make our watertight devices your best solution

These versatile products are ideal for food processing plants, oil refineries or chemical processing plants — anywhere that moisture, dirt or corrosive elements may be a factor.

1 Spring-loaded self-closing flip lid cover ensures a watertight seal when the receptacle is not in use – even in water spray at 1,000 psi

2 Nickel-plated power contacts and terminal assemblies

3 Stainless steel mounting and assembly screws provide corrosion resistance

4 The flip lid cover in the closed position facilitates OSHA lockout/tagout requirements

5 Glass-filled nylon cover and exterior shell provide impact resistance in abusive environments

6 Quick-drive stainless steel assembly screws provide corrosion resistance and fast assembly

7 Nickel-plated power contacts, blades and terminal screws provide corrosion resistance

8 Tapered individual wire pockets guide stranded wire into contact area for ease of installation

9 Glass reinforced nylon interior and elastomeric exterior molded together for watertight seal and rugged support

10 Santoprene™ thermoplastic elastomeric exterior outperforms rubber when exposed to moisture, chemicals, oils, and the effects of UV exposure and ozone

11 Sealing system provides multipoint watertight seal

11 Neoprene grommet ensures a watertight seal

Industrial Specification Grade Straight Blade Devices

FEATURES

- Thermoplastic elastomeric exterior outperforms rubber when exposed to moisture, chemicals, oils, and the effects of UV exposure and ozone attack.
- Mated plug and connector or plug and receptacle form a watertight seal that meets NEMA and IEC IP ratings (see specification sheet for details) and withstands water spray test at 1000 psi.
- High visibility safety yellow for identification.
- Power contacts, blades and terminal screws nickel-plated for corrosion resistance.
- Quick-drive stainless steel assembly screws for corrosion resistance and fast installation.
- Color coded neoprene grommets for a watertight seal on a wide range of cord sizes.
- Receptacles have self-closing spring loaded flip lid covers.

Severe Duty Insulated Device Applications

COOPER Wiring Devices

Choose from an extensive line of rugged industrial devices

Where typical devices fail, Arrow Hart's® Industrial Severe Duty Insulated Devices exceed expectations. Select from a complete line of locking or straight blade plugs and connectors for your industrial application.

ARROW/HART®

Application

Severe Duty Insulated Devices have been designed specifically for industrial applications where electrical connections are exposed to dust, dirt, corrosive elements and physical abuse.

Insulated devices are ideal for industrial manufacturing, agriculture applications, construction, warehousing and chemical processing environments.

These products have excellent resistance to physical abuse, metal chips, foreign particulates, corrosion, airborne contaminants, UV exposure and ozone attack.

Superior materials and design provide excellent insulation and durability properties in complex industrial environments.

Our Santoprene™ Thermoplastic Elastomer devices easily outperform rubber construction plugs and connectors under any conditions.

Severe Duty Insulated Device Features & Benefits

Solid construction to meet your rigorous demands

Ideal for manufacturing locations, industrial plants and agricultural applications, our insulated devices are designed to resist dust, dirt, chemicals, corrosion and physical abuse.

Related Products

A full range of complimentary products designed specifically for industrial environments are available.

Industrial Specification Grade Straight Blade & Hart-Lock® Devices

FEATURES

- Thermoplastic elastomeric exterior outperforms rubber in harsh environments.
- Connector and plug exteriors can be reversed to shroud plug blades.
- Available closure cap can be used on plug or connector to protect from contamination.
- High visibility safety yellow for identification.
- Power contacts, blades and terminal screws are nickel-plated for corrosion resistance.
- Stainless steel assembly and cord grip screws provide corrosion resistance.

 30A; 125/250, 3Ø 250, 3Ø 480, 3Ø 600V/AC

Industrial Specification Grade Hart-Lock® Devices

FEATURES

- Thermoplastic elastomeric exterior outperforms rubber in harsh environments.
- Connector and plug exteriors can be reversed to shroud plug blades.
- Available closure cap can be used on plug or connector to protect from contamination.
- High visibility safety yellow for identification.
- Power contacts, blades and terminal screws are nickel-plated for corrosion resistance.
- Stainless steel assembly and cord grip screws provide corrosion resistance.

Corrosion Resistant Device Applications

The right device for moist and humid applications

Select from a wide range of truly unique locking and straight blade plugs, connectors and receptacles designed for use in corrosive environments.

Application

Corrosion Resistant devices have been designed specifically for environments where moisture and humidity create problems for electrical connections.

Corrosion Resistant devices are ideal for industrial manufacturing, food processing, agriculture applications, and washdown environments.

These products have excellent resistance to physical abuse and corrosive elements plus airborne particulates and contaminants, providing dependable performance where typical devices fail.

Nickel-plated power contacts, terminals, blades and straps deliver enhanced corrosion resistance with excellent electrical performance.

ARROW/HART®

Corrosion Resistant Device Features & Benefits

Designed specifically for longevity in harsh, corrosive environments

Perfect for industrial or commercial applications, corrosion resistant devices are engineered to deliver long, dependable performance in moisture, humidity, and airborne contaminant-laden corrosive environments.

Related Products

A full range of complimentary products designed specifically to protect the electrical infrastructure in corrosive environments are available.

Straight Blade & Locking Receptacles, Plugs & Connectors

2-Pole, 3-Wire Grounding; 3-Pole, 4-Wire Grounding
 15A; 125V/AC
 20A; 125, 250, 125/250, 3Ø 250V/AC
 30A; 125, 250, 125/250V/AC

Industrial Specification Grade Straight Blade & Hart-Lock® Devices

FEATURES

- Nickel-plated straps, blades, power contacts and terminals provide corrosion resistance.
- All-nylon construction for high impact- and chemical-resistance.
- Back wire terminal clamps for fast, easy and secure wiring.
- Combination head screws standard.
- Receptacles feature one-piece nickel-plated brass power contacts to provide superior performance and minimum heat rise.
- Plugs and connectors have a cord hole neoprene gasket to seal out dust and debris.
- Plugs and connectors feature individual wiring compartments with tapered channels for easy insertion of wires.

TESTING & CODE COMPLIANCE

- Listed to UL 498, file no. E2369 (receptacles) or E3663 (plugs & connectors)
- UL verified to Federal Spec. WC-596F
- CSA certified to C22.2, no. 42, file no. 6914 (6233-01) (receptacles) or cUL Certified to C22.2, no. 42 (plugs & connectors)
- NOM certified (straight blade receptacles only)

MATERIAL CHARACTERISTICS

- Environmental: Flammability: meets UL 94 requirements; V2 rated
- Temperature Rating: -20°C to 70°C (-4°F to 158°F), except straight blade plugs & connectors: -20°C to 75°C (-4°F to 167°F) and locking plugs & connectors: -40°C to 75°C (-40°F to 167°F)

Choose from a variety of rugged, dependable devices for complex environments

Cooper Wiring Devices has the products and accessories you need to protect your wiring devices from corrosion, wet locations, environmental exposure and hose-down applications.

Deluxe Wet Location Cover WLRD1

Nylon Wet Location Cover 7788CR

Wet Location Covers

Rugged metal deluxe wet location covers feature self-closing spring door covers and quality diecast aluminum with EDMP gasket material to withstand the harshest of environments. Heavy duty nylon covers are also available, and provide excellent protection with corrosion resistance. Available in a variety of configurations for 15A, 20A, 30A and 50A devices.

Weather Box™ Metal Cover WIUMV-1 & WIUMH-1

While-In Use Covers

Metal While-In-Use covers feature diecast metal construction and superior gasketing to provide a NEMA 3R enclosure rating. Innovative design is lockable to prevent accidental disconnects and meets NEC requirements for receptacles in damp or wet locations. Available in horizontal or vertical configurations with a variety of inserts for 15 & 20A devices.

Cast Aluminum Back Box CDBB1

FS Non-Metallic Back Box 6080

Back Boxes

Available in cast aluminum and impact-resistant plastic, these boxes are designed to resist corrosion and mate with either our wet location covers, stainless steel wallplates or watertight pin & sleeve receptacles and inlets.

Weather Protective Boot BS1

Stainless Steel Wallplate 93971

Other Complex Environment Products

We also offer a wide variety of other corrosion resistant products that are necessary when creating safe and dependable electrical connection points in harsh environments. Choose from stainless steel wallplates, stainless steel wire mesh grips, corrosion resistant weather protective boots and closure caps for plugs and connectors in 15A, 20A, 30A and 50A versions.
