About GiGi's Playhouse Atlanta

Everything at GiGi's Playhouse Atlanta is **FREE** - even the parking!

Currently over 260 families with T21 (Down syndrome) are actively receiving a wide range of support.

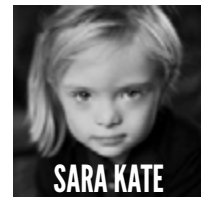

Our kids at GiGi's receive **FREE** therapy-styled classes in Physical, Occupational and Speech therapies.

More **FREE** services include literacy and math tutoring.

Families have a place to belong and to have fun.

GiGi's Playhouse is not just for the kids, it's for everyone:

- our **volunteers**
- our neighbors
- our local teachers
- therapists
- teenagers
- retired persons
- the **whole community** is playing an important role.

T21 Facts

SLEEP APNEA: 7.5 out of 10 kids with T21 suffer from sleep apnea from under the age of five years old.

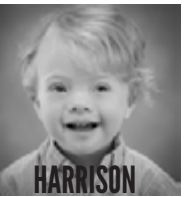

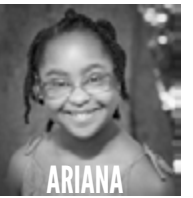

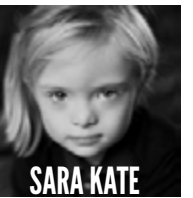

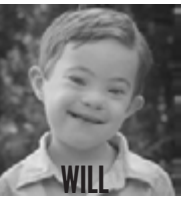

HYPOTONIA: global low muscle tone presents a range of obstacles beginning with basic gross and fine motors skills.

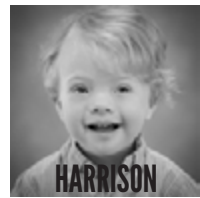

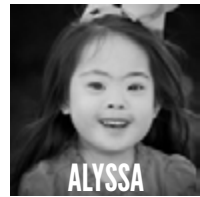

POOR MOUTH CONTROL: the highest concentration of fine motor muscles is in the mouth and without intervention the ability to eat, speak and breathe properly is not possible.

LOW SENSORY AWARENESS: hypotonia also diminishes the sense of touch, making motor planning and movement very difficult.

NUTRITIONAL DEFICITS: blood tests prove that babies born with T21 have deficiencies in a range of nutrients, most notably Vitamin E and Zinc, both known as learning enablers.

Everything listed above has solutions. Early intervention, ongoing therapies plus a little extra time and love enable our kids to achieve a normal life.
