

Fundamentals of Floating Liquefied Natural Gas (FLNG)

Date & Time : 25 February 2015 (Wednesday) | 09:00 – 17:00 hr
Host Company : The EIC Asia Pacific Regional Office, Kuala Lumpur
Location : 17-01, 17th Floor, Menara HLA,
3 Jalan Kia Peng, 50450 – Kuala Lumpur
Contact : Dhena Doraisamy – dhena.doraisamy@the-eic.com

Who Should Attend

The workshop is designed for a wide range of attendees with both technical and non-technical background including:

- Suppliers to the FLNG industry to have a broad knowledge of the processes involved and the technical/commercial issues affecting the business
- Managers with a specific knowledge of part of the FLNG business with a broader understanding of the overall LNG value chain
- New entrants to the FLNG business with an understanding of scope and size of the business and the activities involved.
- Sales, finance and non-technical staff who require an overview of the FLNG business.
- Anyone requiring an understanding of how the FLNG industry works

Company Profile

eMJay LNG Company Ltd provides expert tuition, advice and consulting services to the Liquefied Natural Gas and related industries, based on more than 30 years' experience with one of the global leaders in the LNG business.

This includes advice and training in:

- Fundamentals of the LNG Value Chain
- LNG production processes and project developments
- LNG shipping
- Terminals and regasification
- LNG markets, pricing and trading
- Regional trends and developments
- LNG agreements and commercial issues

Training: Industry Overview

Overview

Liquefied Natural Gas (LNG) is well established and one of the fastest growing energy businesses. A key challenge in developing new LNG projects is to bring together the technical and commercial needs of many stakeholders involved including project developers, EPC contractors, shipping companies, financial institutions, government bodies, traders and regulators.

This workshop provides an understanding of the scope and size of the LNG industry, the value chain elements, the basic technologies involved, a commercial understanding of the value chain elements and the complexities involved in developing an LNG project.

The workshop provides a broad overview of the LNG industry which includes the following topics:

The LNG Value Chain

- LNG properties
- Drivers for LNG
- Elements of the value chain (Upstream, LNG Plant, Shipping and Regasification)

Liquefaction

- Basic Principles
- Gas treatment
- Liquefaction Processes
- Gas Quality

Comparative FLNG Technologies

- Large scale FLNG (e.g. Prelude)
- Bespoke FLNG facilities

FLNG Project Development

- Project phases
- Timescales involved
- Costs/Expenditures

FLNG Projects: Current status

- Overview of F LNG plants
- Growth of the FLNG industry
- Regional summaries

The main players in FLNG projects

- Stakeholders in an FLNG project
- Roles and responsibilities
- Agreements
- Financing
- Risks

Future Perspectives on FLNG

- Outlook on potential developments/opportunities

FLNG Marketing and Commercial issues

- FLNG market growth
- Overview of regional markets
- Agreements
- Financing
- Risks
