

OPPORTUNITIES WITH AMEC

Thursday 21st March 2013
Middlesbrough Football Club, TS3 6RS

This presentation is open to EIC Members Only

AMEC is one of the world's leading engineering, project management and consultancy companies.

Our goal is to deliver profitable, safe and sustainable projects and services for our customers in the oil and gas, mining, clean energy, environment and infrastructure markets, including sectors that play a vital role in the global and national economies and in people's everyday lives.

We design, deliver and maintain strategic assets for our customers, offering services which extend from environmental and front end engineering design before the start of a project to decommissioning at the end of an asset's life.

We are truly international, with major operations centres based in the UK and Americas and offices and projects in around 40 countries worldwide. We work in diverse and often challenging environments, from sub-zero temperatures in the north of Canada to the sweltering heat of the Persian Gulf.

In the North East of England AMEC has operations centres for the Asset Management, Environment and Infrastructure and Clean Energy businesses.

This event will give attendees an opportunity to:

- Hear of the groups activities – majoring on current projects managed from the North East offices
- See how the business proposes to work with regional supply chain companies

AMEC Speakers

Mr Dave Atkinson, Business Analyst, Asset Management

Mr Ian Evans, Technical Director, Environment and Infrastructure

Mr Steve Johnson, Supply Chain Management Lead
