

GEOMETRY

Mr. Acosta's Math Class

Student Name _____ Period _____

Dear Parents,

Please read and review the following two attached papers with your child. They are the class objectives, guidelines, rules, and procedures. Your child needs to understand and follow them throughout the year. I prefer to contact parents by email. It is faster, more convenient on both parts, and has been profoundly successful! Please send me an email so that I can add you to my contacts. Please use an email account—(your account, not one that belongs to your child)--which you will check regularly, because this is the one I will use to contact you. Please also include a daytime phone number where you can be reached. If the number changes for any reason, please update it. **For all email contacts, please put your child's name and class period on the subject line.**

My email address is aacostajr@dadeschools.net Please make a note of it, and feel free to email me at any time. Good communication leads to your child's success. Also, be sure to check your child's grades online throughout the year.

Please sign and return only this page, your child needs to keep the other two papers in his/her notebook.
