Having carried out the entire electrical installation work, we confirm that all the electrical equipment in use on the stand and/or for functions has been installed in accordance with the recognised technical rules of the VDE, the technical rules for connections (TAB) of Vattenfall Europe Hamburg AG, the accident prevention regulations of the professional associations (Berufsgenossenschaften) and especially UVV BGV A3 (electrical installations and operating equipment), all taken in conjunction with HMC technical guidelines.

The insulation ratings of this electrical installation have been tested and adequate resistance levels established. A check was also conducted of the required effectiveness of the protective measures.
