

Letha's Youth Outdoors Fund – 2012 Application

The purpose of this fund is to promote youth environmental education through direct contact between children and nature, and to introduce to nature those children who have not had the benefit of previous contact. It is the belief of INPAWS that childhood development will benefit from this connection with nature. Programs that incorporate the importance of native plants and the impacts of invasive plants will be given higher priority.

For the following 3 sections, use as much space as necessary and allow the form to expand to additional pages.

DESCRIPTION OF CONTENT. Describe the program and explain your plans in detail. The narrative should identify the following: program focus, goals and anticipated benefits for the students. It should be clear how the activity(s) meets the Letha's Fund goal of connecting children to nature and native plants.

OUTCOMES. Describe how you will identify or measure success of the program and activities – i.e., how will it be demonstrated that students formed a connection to nature. List any applicable product, such as a report, a take-home craft, classroom discussion, etc. If project is funded, we will expect to receive a sample of these products.

BARRIERS/NEED. Describe the exposure to nature this group of children has. Describe what barriers exist for connecting them to nature. How will your proposal overcome these barriers?
