

Oracle® Retail Value Chain Collaboration
Release Notes
Release 12.0.1

October 2006

Copyright © 2006, Oracle. All rights reserved.

Primary Author: Usha Raj

The Programs (which include both the software and documentation) contain proprietary information; they are provided under a license agreement containing restrictions on use and disclosure and are also protected by copyright, patent, and other intellectual and industrial property laws. Reverse engineering, disassembly, or decompilation of the Programs, except to the extent required to obtain interoperability with other independently created software or as specified by law, is prohibited.

The information contained in this document is subject to change without notice. If you find any problems in the documentation, please report them to us in writing. This document is not warranted to be error-free. Except as may be expressly permitted in your license agreement for these Programs, no part of these Programs may be reproduced or transmitted in any form or by any means, electronic or mechanical, for any purpose.

If the Programs are delivered to the United States Government or anyone licensing or using the Programs on behalf of the United States Government, the following notice is applicable:

U.S. GOVERNMENT RIGHTS Programs, software, databases, and related documentation and technical data delivered to U.S. Government customers are "commercial computer software" or "commercial technical data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the Programs, including documentation and technical data, shall be subject to the licensing restrictions set forth in the applicable Oracle license agreement, and, to the extent applicable, the additional rights set forth in FAR 52.227-19, Commercial Computer Software – Restricted Rights (June 1987). Oracle Corporation, 500 Oracle Parkway, Redwood City, CA 94065

The Programs are not intended for use in any nuclear, aviation, mass transit, medical, or other inherently dangerous applications. It shall be the licensee's responsibility to take all appropriate fail-safe, backup, redundancy and other measures to ensure the safe use of such applications if the Programs are used for such purposes, and we disclaim liability for any damages caused by such use of the Programs.

Oracle, JD Edwards, PeopleSoft, and Siebel are registered trademarks of Oracle Corporation and/or its affiliates. Other names may be trademarks of their respective owners.

The Programs may provide links to Web sites and access to content, products, and services from third parties. Oracle is not responsible for the availability of, or any content provided on, third-party Web sites. You bear all risks associated with the use of such content. If you choose to purchase any products or services from a third party, the relationship is directly between you and the third party. Oracle is not responsible for: (a) the quality of third-party products or services; or (b) fulfilling any of the terms of the agreement with the third party, including delivery of products or services and warranty obligations related to purchased products or services. Oracle is not responsible for any loss or damage of any sort that you may incur from dealing with any third party.

Preface

A Release Notes document includes some or all of the following sections, depending upon the release:

- Overview of the release
- Functional, technical, integration, and/or performance enhancements
- Assumptions
- Fixed, known issues and defects

Audience

Release Notes are a critical communication link between Oracle Retail and its retailer clients. There are four audiences in general for whom a Release Notes document is written:

- Retail clients who wish to understand the contents of this release.
- Integrators and implementation staff who have the overall responsibility for implementing this product into their enterprise.
- Business analysts who are looking for high-level functional information about this release.
- System analysts and system operation personnel who are looking for high-level functional and technical content related to this release.

Related Documents

For more information, see the following documents in the Oracle Retail Value Chain CollaborationRelease 12.0.1 documentation set:

- Oracle Retail Value Chain Collaboration Installation Guide
- Oracle Retail Value Chain Collaboration Operations Guide
- Oracle Retail Value Chain Collaboration User Guide

Customer Support

- <https://metalink.oracle.com>

When contacting Customer Support, please provide:

- Product version and program/module name.
- Functional and technical description of the problem (include business impact).
- Detailed step-by-step instructions to recreate.
- Exact error message received.
- Screen shots of each step you take.

Oracle Retail Value Chain Collaboration

Overview

Oracle Retail Value Chain Collaboration (VCC) is a collaborative planning, forecasting and replenishment (CPFR) application. The system can communicate and control plans, promotions, results, exception conditions, and changes throughout the global value chain, enabling retailers and suppliers to work together to improve their performance.

Oracle Retail Customer Support investigates submitted issues assuming that all release patches have been applied. While it is ultimately at the retailer's discretion as to when to apply patches, delays or lags in their application can complicate the support process.

To assist in the patch review, Oracle Retail Customer Support provides a system-level assessment by assigning a Priority. Please review the "Fixed Issues" and "Known Issues/defects" sections, promptly to determine the impact to your business operations.

Patch acceptance criteria should dictate the manner in which the patch is to be applied.

If no customization needs to be merged, the included archive encompasses all previous patches and is ready for deployment. If there are customizations additional steps need to be taken. Before installing Value Chain Collaboration 12.0.1, confirm that Value Chain Collaboration 12.0.1 and all following patches have been applied. See the Value Chain Collaboration 12.0.1 patch documentation for more information.

This Patch contains the 12.0.1 patch release. Before you apply the Oracle Retail Value Chain Collaboration 12.0.1 patch:

- Check if the Oracle Retail Value Chain Collaboration 12.0 and all previous patches are installed.
- Oracle Retail Value Chain Collaboration is deployed as a standalone product.

The Oracle Retail Value Chain Collaboration 12.0.1 patch contains files that were modified since Oracle Retail Value Chain Collaboration 12.0. For detailed information on all the features and functionalities in this release, refer to the Oracle Retail Value Chain Collaboration 12.0.1 documentation suite.

Running Scripts

Back up data before running any script, as the provided scripts DO NOT preserve data. Please check with your DBA to determine whether your database should be analyzed after running a script. In many cases, analysis of the database is necessary to take advantage of new/modified indexes intended to increase performance of the application.

Defect Documentation

All the fixed issues in VCC are listed below. A defect fix is a modification to the base Oracle Retail VCC code (for example, a bug fix, a performance enhancement, or a functional enhancement). All the bug fixes in each release should be fully reviewed before the patch is implemented.

Fixed Issues

Bug 5450246: Column Header/Data are misaligned.

Bug 5533111: European Date Format not being recognized by the 'default' Events filter for showing the active events.

Bug 5438195: Log File Growing when running extracts.

Bug 5451182: Products in Collaboration Item table and not in product.

Bug 5460129: Local/Products Level Down function in Reports.

Bug 5158970/5472483: Security Certificate has expired or is not valid.

Additional Notes

Managing Fixes Received Between Quarterly Patches

Due to the tight coupling of code in Oracle Retail VCC 12.0.1, clients must make sure to have the most recent patch at the time they apply a fix to a defect they report.

When a client receives a fix to an issue they log between scheduled patch releases, it will typically come in the form of a .zip file containing the documentation, source code, and any required database scripts for that fix only.

The source code will then need to be applied and the application re-compiled and application server restarted. Please contact Oracle Customer Support for more information.

Technical Enhancements

Upgrade script from patch 12.0 schema to 12.0.1

Known Issues/Defects

- The VCC Online help has been restructured to OHJ (Oracle Help for Java) format. When VCC online help is called, an extra window is invoked. The user needs to shut it down.
- There are additional steps the retailer must take to ensure that the VCC Online Help is accessible in Japanese. For more information, see the section, 'Updating the Help, in the VCC Installation Guide.
