Gourmet Flavours

All our cookie dough is carefully made from “scratch” using the finest quality ingredients available. Our concern for nutritional value has resulted in the creation of a cookie dough that bakes a great tasting cookie that is trans fat free, low in saturated fat, low in sodium and low in sugar content, as well as providing 4-6% of rdv of iron per 28g serving.

It is important to know that these nutritional considerations leave our gourmet cookie dough, for the most part, within British Columbia school nutritional guidelines.

The wide variety of flavours offered, as outlined below, brings you right back to the time when grandma took cookies out of the oven and served them to you still warm and chewy, with a glass of fresh milk. Mmm...

Double Chocolate Chip
