Cautionary Information

Users of this information should be cautioned about several points:
--

The General Fund financial information in this document has been prepared using what is believed to be the best available data for these purposes. The tables in this document have been prepared using the same procedures used to prepare similar information for the State of Wisconsin Continuing Disclosure Annual Report, Official Statements prepared for specific securities, or reports filed in conjunction with various securities. This information is, however, preliminary in nature and subject to change.

- This information is unaudited and is not a “financial statement.” None of the data presented here has been subjected to customary fiscal period closing procedures or the procedures used in the preparation of a financial statement, including verification, reconciliation, and identified adjustments.
- This information only speaks as of the date on which it was prepared.
- Statements of information for dates before the date this information is prepared will most likely be restated or revised. Information classified as “actual”, and any difference from any prior estimate, does not signify a change to official estimates. Any official revenue or expenditure re-estimates that do occur will be separately identified, and if material, appropriately noted.
- The information does not intend to reflect the State’s projected budgetary balance for FY15.
- Projections of results for dates after the date this information is prepared are forward looking. Actual results will almost certainly differ.
 - It is important to note that cash flow projections are expressed on a *cash basis* while the tax revenue collection estimates released by the Department of Revenue (**DOR**) and the Legislative Fiscal Bureau (**LFB**) are expressed on a *budgetary basis* and net of any refunds.
 - Projections are not adjusted to reflect actual revenues and expenditures and routine variability in the timing of receipts and disbursements, but may be adjusted to reflect unique events.
 - Projections of remaining fiscal year cash flow may be adjusted when necessary to reflect unforeseen events or additional revised forecasts of the General Fund condition statement.
- Data in the tables of financial information are subject to revision and reclassification for prior periods. This is particularly true for revenue data, where proper classification depends on tax returns which are received and processed significantly after the tax payments are received through electronic transfers.
- Some information is presented on a cash basis of accounting while other data is presented on a budgetary or agency-recorded basis. Users should not compare information that is presented on one basis of accounting with information that is presented on a different basis of accounting.
- Comparison of monthly General Fund financial information has many inherent problems. Unforeseen events (including even a change in weather conditions) or variations from underlying assumptions may cause a decrease in receipts or an increase in disbursements from those projected for a given month. In addition, comparison of year-to-date annual General Fund financial information also has many inherent problems due to the potential of different revenue and budget provisions for each fiscal year.
- The following tables of General Fund financial information may be material to an investment decision in securities of the State of Wisconsin, although the presence of information here does not imply the State of Wisconsin has made a determination of its materiality.
- The State of Wisconsin is not obligated to provide this information or make it available on its website.
- None of the information in these tables of financial information is required by the State of Wisconsin’s continuing disclosure undertakings pursuant to the Securities and Exchange Commission (**SEC**) Rule 15c2-12; however this information is filed with the MSRB’s EMMA system as an additional voluntary filing.
 - This information is not, and does not replace, a listed event required by SEC Rule 15c2-12.
 - This information is not, and does not replace, the annual financial information required by SEC Rule 15c2-12.

General Notes to the Financial Information

- **Updated Revenue Estimates – FY15.** The Legislative Fiscal Bureau (**LFB**) released a report on January 23, 2015 (**January 2015 LFB Report**) that included estimated General Fund tax collections for FY15 of \$14.470 billion. This estimate was approximately \$174 million, or 3.7%, greater than the actual General Fund tax collections for FY14, but \$173 million less than projections the Department of Revenue (**DOR**) provided for the report released by the Department of Administration on November 20, 2014 (**November 2014 DOA Report**).

A complete copy of the January 2015 LFB Report is available from the Capital Finance Office website (www.doa.state.wi.us/capitalfinance) or the (**MSRB**) through its (**EMMA**) system.

- **Projected FY15 General Fund Condition Statement.** The January 2015 LFB Report also included a projected FY15 General Fund condition statement. The table on the following page includes this projected General Fund condition statement and also includes, for comparison purposes, the actual FY14 General Fund condition statement and the estimated FY15 General Fund condition statements from the 2013-15 biennial budget, May 6, 2014 actions of the Legislative Joint Committee on Finance (**JCF**), and November 2014 DOA Report.

The Wisconsin Constitution requires the Legislature to enact a balanced biennial budget (which the Legislature did for the 2014-15 fiscal year). The Wisconsin Statutes provide that, following the enactment of the budget, if the Secretary of Administration determines that budgeted expenditures will exceed revenues by more than one-half of one percent of general purpose revenues, then the Secretary of Administration must notify the Governor and the Legislature, and the Governor must submit a bill correcting the imbalance. At this time, and at the time of the January 2015 LFB Report, the Secretary of Administration has not made such a determination.

The Secretary of Administration intends to utilize fiscal controls and other measures provided by Wisconsin Statutes to address the projected shortfall. If the final budgetary expenses of any fiscal year exceed available revenues, then the Legislature must take action to balance the budget in the succeeding fiscal year.

- **Other FY 15 Developments.** The revenues included in the November 2014 DOA Report and the January 2015 LFB Report do not include any amounts for tribal gaming. This was due to one of the larger tribal governments withholding its payment due in FY14 while the Governor considered an application for a new off-reservation casino in the State. On January 23, 2015, the Governor announced that he had rejected this application, and on the same date, that tribal government made the FY14 payment that it had been withholding. This late payment, and receipt of a payment due in FY15, could increase revenues by approximately \$50 million compared to the revenues included in the projected General Fund condition statement in the January 2015 LFB Report.

On January 23, 2015, DOR provided a letter to the Secretary of Administration stating that its analysis shows estimated General Fund tax collections for FY15 of \$14.568 billion, or approximately \$99 million more than the projected \$14.470 billion included in the January 2015 LFB Report.

Finally, the executive 2015-17 budget, as released by the Governor of February 3, 2015, incorporates a FY15 gross ending balance of \$0.3 million.

**CASH BALANCES IN FUNDS AVAILABLE FOR
TEMPORARY REALLOCATION ^{(a) (g)}
July 31, 2012 to January 31, 2015 — Actual
February 28, 2015 to June 30, 2015 — Projected ^(b)
(Amounts in Millions)**

The following two tables show, on a monthly basis, the cash balances available for temporary reallocation. The first table does not include balances in the Local Government Investment Pool (LGIP) and the second table does include such balances. Though the LGIP is available for temporary reallocations, funds in the LGIP are deposited and withdrawn by local units of government, and thus are outside the control of the State. The monthly average daily balances in the LGIP for the past five years have ranged from a low of \$2.113 billion during November 2011 to a high of \$3.464 billion during February 2013. The Secretary of Administration may not exercise the authority to use temporary reallocation if doing so would jeopardize the cash flow of any fund or account from which a temporary reallocation would be made.

Endnotes

- (a) Please refer to the cautionary statements at the beginning of this document. The cautionary statements are an integral part of this table. None of the data presented here has been subjected to customary fiscal period closing procedures or other procedures used in the preparation of a financial statement, including verification, reconciliation, and identified adjustments. In addition, comparison of monthly General Fund financial information has many inherent problems. Unforeseen events (including even a change in weather conditions) or variations from underlying assumptions may cause a decrease in receipts or an increase in disbursements from those projected for a given month.
- (b) The results, estimates, and projections for FY15 (cash basis) reflect the 2013-15 biennial budget (2013 Wisconsin Act 20), withholding table changes, implemented on or after April 1, 2014 by the Wisconsin Department of Revenue (**DOR**), the General Fund income tax cuts and other provisions from legislation approved in a special session of the Legislature and enacted by Governor Walker on March 24, 2014, and estimated General Fund tax collections released by Legislative Fiscal Bureau (**LFB**) on January 23, 2015.
- (c) The General Fund cash balances presented are not based on Generally Accepted Accounting Principles. The General Fund includes funds designated for operations and capital purposes for certain proprietary programs of the State's universities. Receipts and disbursements of such funds for the designated programs and the disbursement of such funds for other purposes are reflected in the cash flow. A use of the designated funds for purposes other than the proprietary programs is, in effect, a borrowing of such funds. Therefore, at any time that the balance in the General Fund is less than the balance of such designated funds, the State is obligated to replenish the designated funds to the extent of the shortfall. These designated funds ranged from \$550 million to \$1.3 billion in FY12, from \$1.2 billion to \$1.9 billion in FY13, from \$1.2 billion to \$1.9 billion in FY14, and are expected to range from \$1.1 billion to \$1.8 billion in FY15. In addition, the General Fund holds deposits for several escrow accounts pursuant to court orders or federal rulings. These funds are expected to average approximately \$25 million during FY15.
- (d) The Statutes provide certain administrative remedies to deal with periods when the General Fund is in a negative cash position. The Secretary of Administration may temporarily reallocate cash in other funds to the General Fund in an amount up to 9% of the general-purpose revenue appropriations then in effect (approximately \$1.429 billion in FY15) and may also temporarily reallocate for a period of up to 30 days an additional amount up to 3% of the general-purpose revenue appropriations then in effect (approximately \$477 million in FY 15). This results in an aggregate amount of \$1.906 billion for FY15. If the amount of temporary reallocation available to the General Fund is not sufficient, the Secretary of Administration is authorized to set priorities for payments from the General Fund and to prorate and defer certain payments.
- (e) Reflects no operating notes issued for FY13, FY14, and FY15.
- (f) Changes are sometimes made after the beginning of the fiscal year to the projected revenues and disbursements. Depending on when these changes occur, there are situations in which prior estimates can not be changed and the result is a large variance. This column may include adjustments, if any, to the variances to more accurately reflect the variance between the estimated and actual amounts.
- (g) The amounts shown reflect a reduction in the aggregate cash balances available to the extent any fund had a negative balance and temporary reallocation was used for such fund.
- (h) This category includes intergovernmental transfers. The amount of these transfers may vary greatly between fiscal years, and therefore, this category may not be comparable on a historical basis.
- (i) Certain transfers between General Fund appropriations are recorded as both revenues and expenditures of the General Fund. The amount of these transfers may vary greatly between fiscal years, and therefore, this category may not be comparable on a historical basis.
- (j) The amounts are from the Annual Fiscal Report (unaudited, budgetary basis) for FY14, dated October 15, 2014.
- (k) The projections or estimates for FY15 on an agency recorded basis reflect the 2013-15 biennial budget (2013 Wisconsin Act 20), estimated General Fund tax revenues from LFB as included in their January 16, 2014 report, the impact of withholding table changes, implemented on or after April 1, 2014 by DOR and the General Fund

income tax cuts and other provisions from legislation approved in a special session of the Legislature and enacted by Governor Walker on March 24, 2014. The projections for FY15 do not reflect the updated estimates of General Fund tax revenues, as provided by DOR for use in the report released by the Department of Administration on November 20, 2014 and the estimated General Fund tax collections released by LFB on January 23, 2015.

- (l) The amounts shown are FY14 general purpose revenues and program revenues taxes as recorded by state agencies. There may be differences between the tax revenues shown in this report and those that may be reported by DOR from time to time in their monthly general purpose revenue collections report; the DOR report (i) only includes general purpose revenues or taxes that are actually collected by DOR (and not by other state agencies), and (ii) may include accruals or other adjustments that may not be recorded by state agencies until a subsequent month.
- (m) The amounts shown are FY15 general purpose revenues and program revenue taxes as recorded by state agencies. There may be differences between the tax revenues shown in this report and those that may be reported by DOR from time to time in their monthly general purpose revenue collections report; the DOR report (i) only includes general purpose revenues or taxes that are actually collected by DOR (and not by other state agencies), and (ii) may include accruals or other adjustments that may not be recorded by state agencies until a subsequent month.
- (n) The amounts shown are FY14 expenditures as recorded by state agencies.
- (o) The amounts shown are FY15 expenditures as recorded by state agencies.
