

## TOP TEN SELLING R 1200 GS/Adventure **TOURATECH ACCESSORIES**

1

### **OIL COOLER PROTECTION BLACK**

**044-0342** \$85.41

The oil cooler on the R1200GS is also unprotected in the standard model. This protector is made of aluminium and is available in either silver or black. It is effective not only against stones, but also against the countless insects which otherwise become trapped in the cooler.

2

### **CRASH BARS**

**051-0560** \$481.21

These crash bars have been adapted specially for the R1200GS design. The lines and forms of the refined boxer engine have been used again and incorporated beautifully into the whole appearance of the motor cycle. In spite of the fact that they are so good to look at, they are certainly one of the best crash bars on the market because with these crash bars not only is the cylinder protected but also the engine housing stabilised in quite a special way because of a bridge construction with a "predetermined point of inflection". As a result, in most falls there is not such a great strain on this fastening screw thread and the engine housing remains intact - it would, of course, be a shame if the valve cover was protected but the engine housing destroyed. The connecting bar is also very robustly designed because of additional supports on the main frame and can take such greater stresses and forces. The crash bars are made of non-rust stainless steel. The R1200GS really needs this high-quality, refined material. It is very easy and quick to fit. Most necessary maintenance work can be done without removing the crash bars. Can be fitted with the Touratech aluminium cylinder guard (item no. 044-0360 ).

3

### **THROTTLE POTENTIOMETER COVER**

**044-0730** \$50.84

You know the problem, the throttle potentiometer connector, broken by your riding boot. With our attractive rugged cover, this important electrical connector of your fuel injection system is protected. Made of 3 mm anodized aluminium. The cover is fitted using two spacers and longer M4 x 40 head screws. The right side potentiometer is very well protected thus only one cover (LEFT) is necessary.

4

### **KICK STAND SUPPORT EXTENSION**

**044-0205** \$40.67

The R1200GS stands much more firmly even on quite a soft surface with this kick stand support extension. Even if you park the motor bike in a meadow you do not always have to look for a small plank of wood or another base. This practical part is made of a combination of stainless steel laser parts and anodised aluminium. Quick and easy to fit. For R1200GS and Adventure model 2006->.

5

### **STEEL HEADLIGHT PROTECTOR**

**044-0330** \$139.99

The framing of headlight protector R1200GS Steel is laser-cut. The grating mounted in the frame is securely welded and the entire headlight protector plastic-powder coated. A very sturdy design which can withstand even large stones. Mounting is very simple using fastening points directly at the indicator mounts. No effect on the function of the windscreen. The headlight protector does not have German TÜV-type approval and was developed for off-road use. Can only be fitted with original indicators or Touratech LED indicators! Size: approx. 300 mm x 140 mm x 130 mm. For all 1200GS/ADV, also 2008!

6

### HEADLIGHT PROTECTOR

044-0320 \$69.14

Headlight protector is manufactured out of polycarbonate and is stably and securely mounted to the indicator brackets on the R1200GS by means of two braces. The lateral braces are made of non-rusting steel and are laser cut and bent. The material which is used is nearly indestructible, non-shattering and meshes with the appearance of the motorcycle very well. Everything required for mounting is included with delivery. The headlight protector was developed for off-road use. Included glare shield transparency. Size: approx. 300 mm x 140 mm x 130 mm. Weight: approx. 260 g

7

### TANK BAG BLACK

055-1136 \$384.34

The basic construction of the "High End" tank bag is the same as of tank bag R 1200 GS. But it also has the benefit of a number of additional features: A third outer pocket in the front, a document compartment with a separate credit card bag in the lid, and a water-proof zip. As with all Touratech tank bags, a map bag is also included in the delivery. Seen here: the large version with room for maps of up to DIN A4 size. Simply add our waterproof inner bags (055-1071), and you can use this tank bag in any weather. Dimensions (L x W x H): approx. 35 x 26 x 18/25 cm. Capacity: approx. 16/22 litres

8

### ALUMINIUM PANNIER SYSTEM 41/41 L

052-0140 \$2015.99

Our favourite special kit now for the R1200 GS too. Also suitable for the Remus Revolution or Sebring Twister (together with the silencer extension 040-3206). The left box has a gap for the silencer (as a result the capacity is reduced by 5 litres). The overall width of the 41 litre special system is 95 cm.

9

### MECHANICAL CRUISE CONTROL '08 ON

044-2300 \$132.18

The throttle control replaces the original handlebar end weights. The anti-slip knurled screw secures the accelerator in position. This significantly reduces the strain on the right hand during long journeys. Thanks to the continuous adjustment, the accelerator can also be fixed to decelerate very gently - leaving you enough time to take your hand off the handlebar for a moment without immediately losing throttle. Despite that, the motorbike decelerates in a gentle and controlled way. Use at the owners/riders own risk.

10

### ZUMO 660 LOCKABLE MOUNT

065-0520 \$172.86

The ZUMO 660 Handlebar mounting was specially developed for motorbike use. The motorbike mounting supplied with the ZUMO including the power supply and connections for the headset are to be integrated in the Touratech handlebar mounting. If the original Garmin motorbike mounting is used on its own, motorbike vibrations can cause the unit to oscillate severely within its mounting. Consequential damage may occur: - large potholes, kerbs or accidental touching of the lever can unlock the unit - the original mounting has no fully-fledged vibration decoupling

All prices plus install & GST. Retail prices may change, please call for current pricing.
