

Networkfleet 4200/3500/5000 Product Line Limited 3 Year Warranty (Direct and VAR)

General Terms of Coverage

The limited warranty coverage described in this policy applies to 4200/3500/5000 series which were purchased new from Networkfleet between 05/01/10 and 03/31/13. Networkfleet warrants to Customer/VAR that for a period of three (3) years from the initial activation that a 4200/3500/5000 series device which has been purchased new from Networkfleet by Customer/VAR, will be free from defects in material and workmanship that prevent it from functioning in accordance with its specifications. The limited warranty term is divided into two periods.

1. The first year (i.e. comprehensive period) of coverage includes; the device & the device peripherals (e.g. Antenna¹ & Connecting Harness²). The comprehensive period also includes the option to have Networkfleet provide, at no charge, all labor associated with removal and replacement of a non-functioning unit and/or device peripherals as part of a Networkfleet approved Return Authorization Number (RA #)³.
2. The second and third years of the coverage includes only the device and the device peripheral(s). Labor expenses for device removal and replacement are the responsibility of the customer/VAR during this period.

Networkfleet Limited 3 Year Warranty	
<i>Year 1</i>	<i>Years 2 & 3</i>
<p>Included at no charge with approved Networkfleet RA #</p> <p>Device GPS/Cell Antenna Power Harness (Light, Universal, 6 pin, 9 pin or 9 pin D Flange Heavy) Ground Shipping</p> <p>No Charge Labor for Removal & Replacement</p>	<p>Included at no charge with approved Networkfleet RA #</p> <p>Device GPS/Cell Antenna Power Harness (Light, Universal, 6 pin, 9 pin or 9 pin D Flange Heavy) Ground Shipping</p>

¹ For 5000 Series devices there is an internal cellular/GPS antenna. Window Mount Antennas are available and when needed are covered under this limited warranty.

² 5000 Series harnesses are purchased *a la carte*. Harness type governs device functionality rather than standalone Light Heavy and Universal devices. Each device limited warranty will cover one (1) harness, whichever is initially installed.

³See the RA Policy and Process – **Installation** for details.

General Terms of Coverage Continued

The device is designed to resist normal physical wear and tear in vehicles that meet compatibility/appropriateness guidelines (see [Compatibility Guide](#)). Limited warranty coverage is activated by device malfunction according to pre-determined specifications as determined at the sole discretion of Networkfleet.

Limited warranty coverage is VOID if Networkfleet determines that device failure is due to any of the following reasons⁴:

1. Physical damage to the unit caused by vehicle operation or negligent/improper handling and treatment of the device on the part of the customer/VAR or any other non-Networkfleet individual.
2. Damage caused by water or any other liquid.
3. Tampering with the unit *or* associated peripherals *or* the vehicle itself e.g. intentionally denying power to the device.
4. Improper installation. All installations must conform to Networkfleet's Installation Guidelines.
5. Cutting or otherwise impairing the device Connector Harness.
6. Cutting or otherwise impairing the Antenna and/or Antenna Cables.
7. Defects or damage caused by the use of non-Networkfleet branded or approved products, accessories or other peripheral equipment.
8. Networkfleet serial number has been removed or defaced.
9. Any other circumstance that Networkfleet deems to constitute intent on the part of the customer/VAR, vehicle driver or any other party to purposefully impair the functionality of the device whether directly or indirectly.

Outside of these conditions, Networkfleet devices that are not operating to specifications and are within the term of limited warranty may be eligible for an RA # authorizing replacement of the device and/or device peripherals as needed. For details please see the Authorization Policy and Process information below.

Return Authorization Policy & Process

If your Networkfleet device is not functioning properly, contact the Networkfleet Customer Care department at 866.227.7323 to assist you in troubleshooting the device. Our Customer Care team will work with you to resolve the issue. If Networkfleet is unable to resolve the issue remotely the device, antenna or harness may need to be replaced. The procedure for issuance of the Networkfleet RA # and for shipment of replacement parts depends on the limited warranty coverage status of the particular device.

For devices under limited warranty:

1. Troubleshoot
 - a. Contact Networkfleet Customer Care at 866.227.7323 to remotely troubleshoot⁵ the device and peripherals.

⁴ Should the damage be determined by Networkfleet to be caused by a Networkfleet Certified Installer or any Networkfleet employee or Networkfleet subcontracted service provider, the limited warranty will remain in effect.

⁵ Limited warranty coverage requires adherence with Networkfleet's established device troubleshooting procedures. See Networkfleet Troubleshooting guide for troubleshooting steps and requirements.

2. Return Authorization Number
 - a. If the issue cannot be resolved by Customer Care, Networkfleet will issue an RA # authorizing limited warranty coverage for replacement of the defective device and/or peripherals.
 - b. Devices and peripherals under limited warranty cannot be repaired, they must be replaced.
 - c. The RA # issued can only be used for the unit and/or peripherals with the serial numbered unit specified by Networkfleet.
3. Replacement Unit
 - a. Networkfleet will ship a replacement device (with equal functionality) and/or peripherals, within 48 business hours of issuing the RA #. Replacement device may be a refurbished product. Refurbished devices are previously used, reconditioned and tested devices, which must pass strict quality control standards established by Networkfleet.
 - b. For approved RA's Networkfleet will pay for standard ground shipping of replacement device and/or peripherals. Expedited shipping is available at the customer/VAR's expense. The customer/VAR is required to provide a shipping carrier account number (UPS) or provide consent to be billed for the expedited shipping charges.
 - c. Replacement Devices are covered under limited warranty for *the greater of*, (1) the balance of the remaining limited warranty period of the original device or (2) ninety (90) days from date of activation of the replacement device. Limited warranty coverage on the replacement device will match the limited warranty coverage inherited from the original device. Limited warranty coverage for the ninety (90) days is the same as the 2nd and 3rd year i.e. no labor reimbursement.
4. Return Shipping
 - a. All materials replaced under an approved Networkfleet RA # are property of Networkfleet. You are required to return the defective device to Networkfleet. For your convenience, a pre-paid return shipping label will be sent to you along with the replacement device. The defective device must be returned to Networkfleet within 30 calendar days after the shipment of the replacement device. If the defective device is not returned within 30 calendar days you will be billed a Device Non-Return Fee at the then current rate.⁶
 - b. The shipping box used to return the device must clearly be labeled "Networkfleet RA#XXXXXX" and the serial number of the defective device must match the device stipulated at the time the RA# was issued. If you return the wrong device and the serial number does not match our records, Networkfleet will return the device to you at your expense and the RA will remain open pending return of the correct device.
5. Installation
 - a. You have the option to request that labor associated with removal of a defective device and installation of a replacement device (Device Swap) be handled by a Networkfleet Certified Installer. During the 1st year of coverage on a device this service is provided free of charge subject to the following conditions.
 - i. You must first contact Networkfleet Customer Care and complete our required troubleshooting protocol.
 - ii. You must have an approved RA# for each device that is to be swapped.
 - iii. You must adhere to all policies and procedures pursuant to use of Networkfleet's Certified Installer Network.
 - b. The Certified Installer who provides the service will inspect the vehicle, the device and device peripherals prior to completing the swap. Installers will document and submit any evidence of the following;
 - Tampering (e.g. absence of security zip-ties, cut cables),
 - Failure to comply with troubleshooting requirements (e.g. blown fuse, unplugged antenna, unplugged power harness) or
 - Any other condition that voids the device limited warranty

⁶ If device removal is performed by a Networkfleet Certified Installer, the installer bears responsibility and liability for return of the defective device. Rate for Device Non Return Fee is equal to then-current price of a new corresponding device.

In the event these conditions are found you will be charged for an Installer Troubleshooting Visit (at the then current rate) and for any parts needed to complete the service call at then current retail prices. In addition, repeated violation of these terms puts you at risk of exclusion from further limited warranty coverage.
