HOW TO PREPARE THE SHIPMENT

Shipment weight

If you are sending a large but lightweight shipment, where its volumetric weight exceeds its actual weight, the cost of the shipment is calculated on the space your consignment takes up on the aircraft. This is a standard IATA method. To calculate the volumetric weight of your shipment, simply multiply the length (cm) by the height (cm), multiply that sum by the width (cm), then divide the total sum by 5 000. Helpful application calculating volumetric weight is available at www.dhl.com.pl/wagawolumetryczna.

Documentation required

Waybill

All shipments sent with DHL Express need to have a fully completed DHL waybill or label securely attached to each piece. This will enable the successful movement of your shipment through the DHL Express network. Each waybill or label is individually numbered to allow you to track your shipment from collection through to delivery. Your shipment may also need to be accompanied by required customs documentation, such as a commercial or proforma invoice, as well as additional paperwork depending on the contents and value of the shipment and the country you are sending to.

Commercial invoice

A commercial or proforma invoice is required when sending goods to countries and territories outside your origin country or customs union. All non-document shipments must be accompanied by an invoice. This is essentially a declaration containing all the details of a transaction and is used by customs authorities to assess if duties or taxes are payable. A commercial invoice is used when goods are part of a commercial transaction or intended for resale. A proforma invoice is used when sending goods of no commercial value (for example, when sending samples).

Invoice should be prepared in triplicate (original and two copies). Polish translation should be placed on one of these copies.

Your invoice will require the following details:

1 Bank Details

These are the bank details that will be used for the transaction between the seller and buyer. These details are not required for non-commercial / proforma invoices.

2 Description

Generic or broad descriptions are no longer permitted and are likely to cause delays. Descriptions should include the items, how many there are, what they are made of, and what they will be used for. For example, describing items as 'samples', 'parts' or 'spares' is not acceptable for customs classification, safety and security reasons.

3 Commodity Code

This is the product identification code used by the exporting country to classify the goods to be exported. It assists clearance and avoids delays.

4 Country of Manufacture / Origin

This relates to the place of manufacture, not the country of export. If items are manufactured in more than one country, please list the origins.

Packaging Guidelines

- If you are re-using envelopes or boxes, please ensure that old labels and markings are removed.
- Securely fix the waybill to the shipment. The waybill can be thought of as the shipment's airline ticket and it will delay delivery if it becomes separated from your shipment.
- The barcodes on the waybill are scanned at numerous points during your shipment's journey. Please ensure the barcode is flat and not covered by tape, shrink-wrap or strapping.
- Place the waybill on the top or side of your shipment and please ensure it does not overlap the corners or edges of boxes.
- Use adequate protective wrapping for fragile or delicate items and ensure they are packed as far away as possible from the corners of boxes.

- To prevent injury to our employees, please pay special attention to the packaging of sharp items. There should not be any possibility of the contents piercing the packaging.
- Any individual pieces over 70 kg should be placed on a pallet. If you are sending a multi-piece shipment, it is not necessary to place the individual pieces on a pallet unless they exceed 70 kg. For example, a shipment comprising four 25 kg pieces does not have to be placed on a pallet.

PAYING FOR YOUR SHIPMENT

Customers can pay for DHL Express services either with cash, a credit card (only in DHL Express Customer Service Point) or by bank transfer (after opening DHL Express Customer Account – on the basis of separate agreement concerning such payment method).

Custom and tax duties can be paid with cash or by bank transfer (in the latter case – only on the basis of the separate DHL Express approval expressed after the Customer's corresponding obligation).
