

## Wireless PACS

**Description:** Mobile picture phone technology is compelling and easy to acquire. A clinician can simply walk into a high street store and purchase a handset and the network services required to support a basic wireless PACS application. This has encouraged a great deal of experimentation – much of it without the support of either a vendor or the health provider's own IT department. <BR><BR>While some of these experiments may fail, those that succeed will translate into products and services that compete with conventional PACS technology. Already a number of health providers are purchasing wireless enabled imaging products. <BR><BR>In this report we examine the wireless medical imaging and PACS market, discuss the impact of a new generation of handset and PDA technology on this market and look at existing and potential applications of wireless imaging within the healthcare sector.<BR><BR>Who should purchase this report:- <BR><BR> PACS vendors. <BR> Healthcare providers.<BR> Mobile network operators.<BR> Handset and PDA manufacturers.<BR> eHealth equipment vendors.<BR> Investors in the healthcare sector.<BR> Other organisations active in ehealth provision<BR>

**Contents:** Introduction<BR> Lessons Learned From PC Based PACS<BR> Overcoming Technical Limitations<BR> Formal Versus Informal Systems<BR> Market Drivers And Inhibitors<BR> Conclusions<BR> Case Studies<BR> Royal Glamorgan Hospital<BR> Fife Fire And Rescue<BR> Vendor Profiles And Analysis<BR> Agfa<BR> Given Imaging<BR> Pedagog<BR> FujiFilm<BR> Kodak<BR>
