Equivalent Form 5

Equivalent Form 5 is a report detailing dose history for an individual for the year at a given location. The report can include internal dose (CDE organ, CEDE total), if provided to Landauer.

This report contains all the information required by NRC Form 5, which satisfies the requirement for an annual report to workers, the NRC, and other regulatory bodies (check with your regulatory agency for your specific requirements). Reports are generated annually after the close of a calendar year or quarterly with current data up to the last wear period reported.

Equivalent Form 5 reports are available in a wide variety of formats. Standard reports are provided in a hardcopy paper format. Electronic reporting services are available for an additional fee. Landauer can manage and store report data that can be mailed, faxed, or emailed upon request. A CD-ROM that stores the annual accumulation of reports and incorporates a search and print functionality is also available after the close of the calendar year. Reports on the CD-ROM can be searched by account number, series, participant name or number and wear date.

Landauer also provides electronic media containing year-end exposure data compatible with the REMIT program used to electronically transmit information to NRC's REIRS database.
