## TRUCKING CHECKLIST

In Order to determine the fleet's appropriate ranking for each category, carefully read over the factors on the matrix below. Next, determine the level that the *majority* of responses fall into, i.e. 80% to 90%. For example, if your entity is compliant with 80% to 90% of the factors listed in the ABOVE AVERAGE section, the entity would receive an above average ranking in that category. On the other hand, if most of the entity's practices fall into the AVERAGE level, it would be eligible for Average ranking. If the preponderance of characteristics (80% to 90%) fall into the **BELOW AVERAGE** category, it will be eligible for Below Average ranking. NOTE: if there is a 50/50 split in any of the characteristics of a particular ranking, always use the lower ranking.
