

Take a Closer Look at Plants!

A dynamic program about growing and eating plants

Rotary Botanical Gardens invites students in grades 1 & 2 to participate in our curriculum-based spring plant program on select dates in May 2016. Students will learn-by-doing in this fun, interactive workshop via hands-on activities, demonstrations, garden tours and an awesome grand finale!

Topics covered include:

- Plant part ID, plant life cycles, and plant growth requirements
- Tasting plant parts, learning their nutritional value, and discovering products made from plants
- Touring the gardens to see how they are prepared for spring. Witness early bloomers.

The program is available in two time slots, either 9:30 a.m.-11:30 a.m. a.m. or 12:30 p.m.-2:30 p.m. and dates are available on a first come-first served basis. Please select 2-3 dates in case your first or second choice is filled. Note your preferred time slot and preferred date on the enclosed registration form and rank them 1st, 2nd or 3rd as listed. Your date/time will be confirmed as soon as possible after it is received, preferably by email.

The cost is \$3 per student (no charge for chaperones) and is payable the day of the program. If your school serves a low-income population, please contact Bev Feltz at the information below to discuss the possibility of a reduced entry fee.

Groups of up to 60 students at a time are welcome. Because this program includes an outdoor component, we ask that participants dress appropriately for the weather. It will be held rain or shine. In case of bad weather, RBG will offer a fun indoor activity.

To register your class or group, call Bev Feltz at 608-212-9044, send an email to: pengnix@yahoo.com or mail the enclosed registration form to the address indicated on the form.
